Silicon Based Polymer Science:

Silicon-based Polymer Science John Martin Zeigler, F. W. Gordon Fearon, 1990 This book provides the first unified reference work for silicon based polymers It brings together in one volume research on the synthesis properties chemistry electronic structure applications and technology of these materials The volume is built around a series of critical overviews of these rapidly advancing fields and is supplemented by a substantial number of shorter papers that focus on current findings It also provides insight into possible directions for future scientific and technological advances in the field Silicon-Based Polymer Science - A Comprehensive Resource; Advances in Chemistry ,1990 **Silicon-Based Polymers and Materials**

Jerzy J. Chruściel, 2022-03-07 Silicon based materials and polymers are made of silicon containing polymers mainly macromolecular siloxanes silicones This book covers the different kinds of silicon based polymers silicones silsesquioxanes POSS and silicon based copolymers Other silicon containing polymers polycarbosilanes polysilazanes siloxane organic copolymers silicon derived high tech ceramics silicon carbide and oxycarbide silicon nitride etc have also a very important practical meaning and a huge number of practical applications These materials make up products in a variety of industries and products including technical and medical applications Polycrystalline silicon is the basic material for large scale photovoltaic PV applications as solar cells Technical applications of crystalline c Si and amorphous a Si silicon fully inorganic materials silicon nanowires are still quickly growing especially in the field of microelectronics optoelectronics photonics and photovoltaics catalysts and different electronic devices e.g. sensors thermoelectric devices This book is ideal for researchers and as such covers the industrial perspective of using each class of silicon based materials Discusses silanes silane coupling agents SCA silica silicates silane modified fillers silsesquioxanes silicones and other silicon polymers and copolymers for practical applications as polymeric materials and very useful ingredients in materials science **Silicon Based Polymers**

François Ganachaud, Sylvie Boileau, Bruno Boury, 2008-08-09 Silicon Based Polymers presents highlights in advanced research and technological innovations using macromolecular organosilicon compounds and systems as presented in the 2007 ISPO congress Silicon containing materials and polymers are used all over the world and in a variety of industries domestic products and high technology applications Among them silicones are certainly the most well known however there are still new properties discovered and preparative processes developed all the time therefore adding to their potential Less known but in preparation for the future are other silicon containing polymers which are now close to maturity and in fact some are already available like polysilsesquioxanes and polysilanes All these silicon based materials can adopt very different structures like chains dendrimers hyperbranched and networks physical and chemical gels The result is a vast array of materials with applications in various areas such as optics electronics ionic electrolytes liquid crystals biomaterials ceramics and concrete paints and coatings all needed to face the environmental energetical and technological issues of today Some industrial aspects of the applications of these materials will also be presented **Silicon-Based Polymers and Materials**
