Bureau of Naval Personnel,1949 *The Exhibitor* ,1947 Some issues include separately paged sections Better management Physical theatre extra profits Review Servisection *An Empire of Memory* Matthew Gabriele,2011-03-24 Beginning shortly after Charlemagne s death in 814 the inhabitants of his historical empire looked back upon his reign and saw in it an exemplar of Christian universality Christendom They mapped contemporary Christendom onto the past and so during the ninth tenth and eleventh centuries the borders of his empire grew with each retelling almost always including the Christian East Although the pull of Jerusalem on the West seems to have been strong during the eleventh century it had a more limited effect on the Charlemagne legend Instead the legend grew during this period because of a peculiar fusion of ideas carried forward from the ninth century but filtered through the social cultural and intellectual developments of the intervening years Paradoxically Charlemagne became less important to the Charlemagne legend The legend became a story about the Frankish people who believed they had held God s favour under Charlemagne and held out hope that they could one day reclaim their special place in sacred history Indeed popular versions of the Last Emperor legend which spoke of a great ruler who would reunite Christendom in preparation for the last battle between good and evil promised just this to the Franks Ideas of empire identity and Christian religious violence were potent reagents The mixture of these ideas could remind men of their Frankishness and move them for example to take up arms march to the East and reclaim their place as defenders of the faith during the First Crusade *An Empire of Memory* uses the legend of Charlemagne an often overlooked current in early medieval thought to look at how the contours of the relationship between East and West moved across centuries particularly in the period leading up to the First Crusade *The Medieval Account Books of the Mercers of London* Lisa Jefferson,2016-04-15 As the premier livery company the Mercers Company in medieval England enjoyed a prominent role in London s governance and exercised much influence over England s overseas trade and political interests This substantial two volume set provides a comprehensive edition of the surviving Mercers accounts from 1347 to 1464 and opens a unique window into the day to day workings of one of England s most powerful institutions at the height of its influence The accounts list income derived from fees for apprentices and entry fees from fines whose cause is usually given sometimes with many details from gifts and bequests from property rents and from other sources and then list expenditures on salaries to priests and chaplains to the beadle the rent collector and to scribes and scriveners on alms payments on quit rents due on their properties on repairs to properties and on a whole host of other costs differing from year to year and including court cases special furnishings for the chapel or Hall negotiations over trade with Burgundy transport costs funeral costs or those for attendance at state occasions etc Included also in some years are ordinances deeds and other material of which they wanted to ensure a record was kept Beginning with an early account for 1347 48 and the company s

ordinances of that year the accounts preserved form an entire block from 1390 until 1464 The material is arranged in facing page format with an accurate edition of the original text mirrored by a translation into modern English A substantial introduction describes the manuscripts in full detail and explains the accounting system used by the Mercers and the financial vocabulary associated with it Exhaustive name and subject indexes ensure that the material is easily accessible and this edition will become an essential tool for all studying the social cultural or economic developments of late medieval England
