Reyner Banham Nigel Whiteley, 2003-08-29 An intellectual biography of the cultural critic Reyner Banham. Reyner Banham 1922-88 was one of the most influential writers on architecture, design and popular culture from the mid 1950s to the late 1980s. Trained in mechanical engineering and art history, he was convinced that technology was making society not only more exciting but more democratic. His combination of academic rigor and pop culture sensibility put him in opposition to both traditionalists and orthodox Modernists but placed him in a unique position to understand the cultural, social and political implications of the visual arts in the postwar period. His first book, *Theory and Design in the First Machine Age*, still in print with The MIT Press after forty years, was central to the overhaul of Modernism and it gave Futurism and Expressionism credibility amid the dynamism and change of the 1960s. This intellectual biography is the first comprehensive critical examination of Banham's theories and ideas, not only on architecture but also on the wide variety of subjects that interested him. It covers the full range of his oeuvre and discusses the values, enthusiasms and influences that formed his thinking.

Pop L.A. Cécile Whiting, 2008-08-04 In this original and engaging book, Cécile Whiting examines what Pop looked like when it left the highbrow cloisters of Manhattan's art galleries and ventured westward to the sprawling suburbs of Los Angeles.

The Architecture of Entertainment Robert Winter, 2009-09 In L.A. in the 20s, noted architectural historian and author Robert Winter explains this architecture of entertainment, the inherent beauty and mystery of the era when historic architectural styles became adventurous escapades.

Modernism in Design Paul Greenhalgh, 1997-07-01 Ten new and important essays on design cover Modernism's fortunes in Germany, Italy, Sweden, Britain, Spain, Belgium and the USA. They range in subject matter from world fairs and everyday domestic objects to American West coast architecture and French and Italian furniture. With essays by Tim Benton, Gillian Naylor, Penny Sparke, Wendy Kaplan, Clive Wainwright, Martin Gaughan, Guy Julier, Mimi Wilms, Julian Holder and Paul Greenhalgh. The object of this book is to diffuse myths. If modernism has in the past been both absurdly praised and absurdly damned, *Modernism in Design* seeks to lift it out of this cycle and to demonstrate that the modern movement could offer neither Jerusalem nor Babylon. In this, the book succeeds admirably.

Designer's Journal While this collection of essays is aimed primarily at design historians and students of design history, hard pressed practising designers and architects should make room for it on their bookshelves.

Overdrive Wim de Wit, Christopher James Alexander, 2013 This is a fascinating and intelligently illustrated study of architectural innovation in Los Angeles From 1940 to 1990 Los Angeles rapidly evolved into one of the most populous and influential industrial economic and creative capitals in the world During this era the region was transformed into a laboratory for cutting edge architecture Overdrive examines these experiments and their impacts on modern design reframes the

perceptions of Los Angeles dynamic built environment and amplifies the exploration of the city's vibrant architectural legacy. Infrastructural Optimism Linda C. Samuels, 2021-09-29 Infrastructural Optimism investigates a new kind of twenty-first century infrastructure: one that encourages a broader understanding of the interdependence of resources and agencies; recognizes a rightfully accelerated need for equitable access and distribution; and prioritizes rising environmental diligence across the design disciplines. Bringing together urban history, case studies, and speculative design propositions, the book explores and defines infrastructure as the basis for a new form of urbanism emerging from the intersection of architecture, landscape architecture, and urban design. In defining this new infrastructure, the book introduces new dynamic and holistic performance metrics focused on measuring what matters over growth for the sake of growth and twelve criteria that define next-generation infrastructure. By shifting the focus of infrastructure from our largest public realm to environmental symbiosis and quality of life for all, design becomes a catalytic component in creating a more beautiful, productive, and optimistic future with Infrastructural Urbanism as its driver. Infrastructural Optimism will be invaluable to design, non-profit, and agency professionals and faculty and students in the fields of architecture, landscape architecture, and urban design working in partnership with engineers, hydrologists, ecologists, urban planners, community members, and others who shape the built environment through the expanded field of infrastructure.
