Loss And Grief Psychological Management In Medical Practice:

Loss and Grief Bernard Schoenberg,1970 Hospice Education Program for Nurses: Participant manual ,1981 **Pain Management in Rehabilitation** Dr. Martin Grabois, MD,Dr. Trilok Monga, MD,2002-09-01 Pain is a common symptom of many diseases and is often referred for a physical medicine and rehabilitation consultation Despite the availability of information on the pathophysiology assessment and management of acute musculoskeletal pain chronic pain still remains an unsolved problem for many patients Pathophysiology in these patients often remains obscure assessment difficult and management frustrating These issues become magnified when pain acute or chronic complicates a primary disabling disease such as spinal cord injury cerebrovascular accident or multiple sclerosis To date the psychiatric management of these complex syndromes has not been dealt with in a comprehensive fashion especially with regard to the relationship of pain functional status and quality of life in these patients Pain Management in Rehabilitation provides a single source that synthesizes information about the diagnosis and management of various pain syndromes in patients with primary disabling diseases It discusses pain as it relates to various disease processes from the perspective of both rehabilitation specialists and primary care providers It describes pain syndromes their assessment and management in some of the most common impairments seen in a rehabilitation setting Relevant literature is reviewed with emphasis on assessment and psychiatric management This valuable text is an unparalleled guide to the successful management of pain in persons with a primary disabling disease with the goal of preventing physiological and functional decline and the improvement of functional abilities which in turn lead to enhanced psychosocial functioning and quality of life Grief and the Healing Arts Sandra L. Bertman,2018-02-06 For nearly three decades Sandra Bertman has been exploring the power of the arts and belief symbols metaphors stories to alleviate psychological and spiritual pain not only of patients grieving family members and affected communities but also of the nurses clergy and physicians who minister to them Her training sessions and clinical interventions are based on the premise that bringing out the creative potential inherent in each of us is just as relevant perhaps more so as psychiatric theory and treatment models since grief and loss are an integral part of life Thus this work was compiled to illuminate the many facets that link grief counseling and creativity The multiple strategies suggested in these essays will help practitioners enlarge their repertoire of hands on skills and foster introspection and empathy in readers Coping With Loss Susan Nolen-Hoeksema,Judith Larson,Judith M. Larson,2013-01-11 Coping With Loss describes the many ways in which people cope with the death of someone they love Most earlier books on bereavement have fallen into two categories distillations of the clinical experience of individual therapists or collections of chapters reporting the results of empirical studies Each category is valuable but has tended to serve a narrow group of readers practitioners with particular theoretical orientations or researchers in quest of the latest findings Coauthored by a leading research psychologist and an experienced therapist who specializes in bereavement education and intervention this book is different The authors weave together the strands of

theory research and clinical wisdom into a seamless and readable narrative While they discuss previous work they also present new data never before published from one of the largest studies of bereaved people ever conducted the Bereavement Coping Project Unlike most studies to date which focused on only one type of bereaved group usually widows or widowers the Bereavement Coping Project examined the experiences of several different groups during the first 18 months after the death The groups included those who had lost a spouse a parent an adult sibling or a child and those who had lost their significant other to cancer or cardiovascular disease on one hand as opposed to the stigmatized disease of AIDS on the other The book begins with a critical overview of theories of bereavement succeeding chapters explore in depth the impact of specific types of loss the impact of particular coping strategies on recovery the impact of social supports and religion and the special cases of children and of people who seem to grow and change for the better after a loss A final chapter considers implications for intervention with bereaved people Each chapter is richly illuminated with real life examples throughout and ends with a section called Voices in which bereaved people describe their various attempts to cope in their own words

Insightful and informative Essential Papers on Object Loss Rita V. Frankiel, 1994-03 This choice collection contains some of the most significant contributions to psychoanalytic and psychological understanding of the effect of object loss on adults and children Designed for psychoanalysts psychotherapists and students of psychoanalysis and psychotherapy this important volume focuses on those contributions most directly relevant to the clinical situation without neglecting fundamental descriptive and theoretical contributions Rita V Frankiel has culled the literature on object loss and assembled the most salient and conceptually powerful contributions to the field Each paper is introduced with a brief summary of its contribution to the development of our understanding of object loss This valuable resource thus provides the serious student of object loss with a ready source of the most important materials on the subject Contributors Karl Abraham Sol Altschul John Bowlby Helene Deutsch J Marvin Eisenstadt George Engel Joan Fleming Sigmund Freud Erna Furman Robert Furman Edith Jacobson Melanie Klein Paul Lerner Erich Lindemann Hans W Loewald Marie E McAnn George Pollock Hanna Segal Chistina Sekaer Vamik D Volkan and Martha Wolfenstein Death and Spirituality Kenneth Doka, John Morgan, 2016-12-05 An elderly Chinese immigrant hospitalized with terminal disease requests to burn incense A 30 year old Roman Catholic gay male dying of AIDS is consumed by deepening moral guilt troubled by beliefs he thought he abandoned years ago A mother whose teenage son died of an aneurism is angry at God over his death yet fearful of expressing that anger lest He punish her again A young widower seemingly has difficulty expressing grief believing it to be a sign of weak faith All of these examples illustrate the kinds of issues that clinicians and counselors constantly encounter For although North American society has long been characterized as secular this does not deny the potency of spiritual concerns and religious values on the individual level Polls affirm that vast majorities of North Americans both believe in God and consider religion important in their lives This is clearly evident when one faces the crisis of dying or bereavement For one of the strengths of belief is that it provides

support and succor at a time when secular explanations are largely silent For these reasons educators and clinicians have long recognized the significance that religious and spiritual themes have in counseling with the dying and bereaved Yet in cultures as religiously diverse as the U S and Canada caregivers and educators may feel inadequate to the task Death and Spirituality addresses this need Specifically it seeks to reach two perhaps overlapping audiences First it considers the needs death related counselors and educators seeking to provide them with both a sense of the norm of religious tradition and the religious and spiritual issues that might arise in illness and bereavement as well as suitable interventions approaches and resources that might be useful in assisting clients in examining and resolving such issues The book also speaks to the complementary needs of clergy who also may wish to assist parishioners and others as they face the spiritual and psychological crisis of dying and grief

Childhood Cancer Adolf E. Christ, Kalman Flomenhaft, 2012-12-06 The past decade has brought extraordinary gains in the outlook for children stricken with cancer Though cancer remains a leading cause of death for children and young adults more victims of child hood cancer today will survive than will die The therapeutic advances and the optimism they instill have prompted researchers and clinicians to analyze the impact of cancer upon young patients and their families and to devise more effective intervention strategies Hope and survival juxtaposed with the continuing high mortality associated with certain forms of the illness add new challenges to management of the psychosocial aspects of cancer To respond to these challenges we need research as rigorous as that which continues to make inroads in treating the physical illness This specific concern for the needs of children suffering from cancer and their families has paralleled an increasing sensitivity on the part of the medical community and the public at large to the limitations of specialized high technology health care practices

Levin, 2012-12-06 Medicine is changing at a speed never witnessed before in history With each passing year medical technology achieves the capacity to provide cures and improve treatments that even a short time before were difficult to conceptualize and impossible to provide Reproductive technology personifies this concept perhaps better than any other field of medicine The 1990s have seen an explosion in endoscopic and ambulatory procedures the application of molecular biology to clinical conditions and the refinement of assisted reproduction to allow third parties donors and surrogates into the process of family building More than ever before comprehensive medical care requires a team approach However the team comprises not only medical and scientific personnel but also mental health professionals lawyers and ethicists This integrated and multidisciplinary approach to medical care will become even more necessary as medical capabilities continue to develop faster than society can respond This book reflects such an approach It is based on a Harvard Postgraduate Course in June 1990 entitled Infertility in the 1990s Technological Advances and Their Psychosocial Implications that was sponsored by the Faulkner Centre for Reproductive Medicine The first half of the course

was directed by Drs M Seibel A Kiessling and C Richards The second half of the course was directed by Dr M Seibel J Bernstein R N and S Levin LICSW
