Lost Travellers:

Lost in Translation Suzanne Ferriss, 2023-03-09 Sofia Coppola's *Lost in Translation* 2003 brings two Americans together in Tokyo each experiencing a personal crisis Charlotte Scarlett Johansson a recent graduate in philosophy faces an uncertain professional future while Bob Harris Bill Murray an established celebrity questions his choices at midlife Both are distant emotionally and spatially from their spouses They are lost until they develop an intimate connection In the film's poignant famously ambiguous closing scene they find each other only to separate In this close look at the multi award winning film Suzanne Ferriss mirrors *Lost in Translation*'s structuring device of travel her analysis takes the form of a trip from planning to departure She details the complexities of filming a 27 day shoot with no permits in Tokyo explores Coppola's allusions to fine art subtle colour palette and use of music over words and examines the characters experiences of the Park Hyatt Tokyo and excursions outside together and alone She also re evaluates the film in relation to Coppola's other features as the product of an established director with a distinctive cinematic signature Coppolism Fundamentally Ferriss argues that *Lost in Translation* is not only a cinema classic but classic Coppola too **Australia** John Morison (of New South Wales.), 1867

Samuel Johnson and the Age of Travel Thomas M. Curley, 2009-01-01 Although Samuel Johnson's famed ramblings never took him more than five hundred miles from his London home he was an indefatigable planner of distant voyages Sharing with his fellow Englishmen that passion for investigating the unknown which had ushered in a momentous geographical revolution Johnson became the original armchair traveler His writings proclaim a boundless curiosity about the globe and demonstrate a pervasive preoccupation with travel in every conceivable form Travel represented more for him than geographical movement it was a symbol of intellectual growth in his life his morality and his society While Johnson's biographers have all emphasized his fascination with exploration and discovery no comprehensive study of his complex relationship to the epoch making geographical advances of his century has heretofore appeared Thomas Curley's *Samuel Johnson and the Age of Travel* offers new perspectives on this crucial and surprisingly little known concern of the man and his age when English literature brilliantly mirrored the widening frontiers of the British Empire Drawing extensively on Johnson's entire canon the works of his contemporaries and a vast store of much neglected travel books Curley places Johnson's love of travel and travel literature firmly in its literary and historical contexts Johnson's career began with the translation of a travel book yielded numerous articles and essays on the subject in his middle years and culminated in the

publication of his own splendid description of the Highlands in *A Journey to the Western Islands of Scotland* Keenly interested in geography Johnson studied well over two centuries of travel literature to validate his own philosophy of human nature and to promote improved literary standards in what was then the second most popular genre in England His masterpiece *Rasselas* not only enshrined his recurring vision of man as perpetual explorer but also exemplified that fruitful interaction between travel books and belles lettres so prevalent throughout Johnson's age Samuel Johnson and the Age of Travel sheds new light on Johnson's career ambitions his talents in moral observation and literary creation and his inquisitive age Johnson emerges in Curley's study as a truly representative writer completely captivated by the romance of Georgian travel and illustrative of the cultural impact of an expanding world picture upon the minds and letters of eighteenth century Englishmen
