An Historical Geography of Europe Robin Alan Butlin, Robert A. Dodgshon, 1998 An Historical Geography of Europe represents the first multi authored comprehensive study on the subject It provides the reader with an analytical and explanatory account of European historical geography from classical times to the modern period including the vast changes to landscape settlements population and in political and cultural structures and character that have taken place since 1500 The book takes account of the vast volume of relevant research and literature that has been published over the past two or three decades in order to achieve a unique coverage and synthesis of this very broad range of evidence and opinion and has tried to engage with many of the main themes and debates to give a clear indication of changing ideas and interpretations of the subject This book brings together British and European authors from a number of disciplines who have considerable distinction in the various fields of historical geography and related fields including a significant number who have already written on the wider problem of European historical geography It is amply illustrated with maps and diagrams to present many of the issues in a visual form

Europe in the Eleventh Century Charles West, 2025-10-16 Eleventh century Europe was diverse and fast changing Historians have often debated this change through two sets of competing arguments one about the shifting role of the Church and the Papacy and the other about the rise of castellan lords and a proliferation in violence Yet these arguments about Church Reform and Feudal Revolution only really apply to one part of Europe the Latin West This book takes its cue from contemporary perceptions of Europe and includes Byzantium or East Rome and Muslim al Andalus in scope In doing so it presents a new perspective on Europe in the period Its chapters assess different scales of action and interaction within this wide space They take from the reader from the peasants living in small village settlements via the great city of Constantinople the taifa emirates kingdoms from Ireland to Hungary and the two universal empires up to contemporary ideas cosmologies and representations of the wider world Viewed in this broad setting the Latin West s remarkable expansion during this period dramatically illustrated by the First Crusade at the century s end can best be understood as the poorly controlled overspilling of internal dynamics as the established public order was disrupted Elsewhere in Europe existing structures proved more resilient and better able to accommodate internal economic and social development though remaining vulnerable to aggression from outside

The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Włodzimierz Borodziej, Ferenc Laczó, Joachim von Puttkamer, 2020-08-02 Intellectual Horizons offers a pioneering transnational and comparative treatment of key thematic areas in the intellectual and cultural history of Central and Eastern Europe in the twentieth century For most

of the twentieth century Central and Eastern European ideas and cultures constituted an integral part of wider European trends. However, the intellectual and cultural history of this diverse region has rarely been incorporated sufficiently into nominally comprehensive histories of Europe. This volume redresses this underrepresentation and provides a more balanced perspective on the recent past of the continent through original critical overviews of themes ranging from the social and conceptual history of intellectuals and histories of political thought and historiography to literary, visual and religious cultures, to perceptions and representations of the region in the twentieth century. While structured thematically, individual contributions are organized chronologically. They emphasize where relevant generational experiences, agendas and accomplishments while taking into account the sharp ruptures that characterize the period. The third in a four-volume set on Central and Eastern Europe in the twentieth century, it is the go-to resource for understanding the intellectual and cultural history of this dynamic region.

Democracy in Southern Europe Isabelle Calleja Ragonesi, 2019-02-28. How have Malta and Cyprus, both EU members, transitioned from colonial island states to independent democracies? With the assistance of primary documentation, this book traces the difficult path of these two states to becoming independent liberal democracies by using the pathway of democratization through decolonization. Using socio-economic and political data analysed through the microscope of political science and international relations theories, Isabelle Calleja Ragonesi charts the progress of the two islands in the context of a number of four distinct phases: Firstly, decolonization, independence and achieving the status of procedural democracies; secondly, post-colonial independence, consolidating democracy and regime breakdown; thirdly, sovereign nation state status and second attempts at consolidating democracy; and finally, attempting to reach substantive democracy status and EU membership. The study of these two states is contextualized within the context of democratization in Southern Europe, and the cases of Malta and Cyprus provide new insights on the region for scholars of political science and international institutions.

Cosmopolitan Memory in Europe's 'Backwaters' Rodanthi Tzanelli, 2011-05-30. The book reconsiders definitional relationships of national character and national heritage in the context of Western industrial modernity. It highlights the gendered and racialised histories of this modernity, arguing that today they continue to play a significant role in global circulations of national heritage by creative industries.

Sexuality in Premodern Europe Franz X. Eder, 2023-10-19. How did sexual relationships work before in and outside of marriage in the pre-modern era? What problems did contraception and sexually transmitted diseases pose? How did people deal with prostitution and pornography back then? What were the possibilities for same-sex and queer desire and practice? Using numerous examples and sources from across the continent, *Sexuality in Premodern Europe* shows that even in earlier centuries, sexual life had an elementary significance for the coexistence of couples and communities. It was just as decisive for how individuals saw themselves and others as it was for maintaining the social, economic and political order. Franz X. Eder interestingly emphasises the socio-historical view of sexuality, offering an apt foil for the cultural perspective which is so prevalent in the field. In this book

sexual behaviour is understood and thought about as social practice From this vantage point Eder deals with the function of the sexual in upbringing and socialization its significance for the image of men and women its role in marriage initiation and the importance of sexual life for marital relationships and concubinage Deviant and discriminated sexual forms such as prostitution pornography and same sex acts are also addressed throughout The book explores the ways in which many people gained sexual experiences before besides or beyond marriage even if these experiences were forbidden in former societies While research into the history of sexuality has so far dealt with such forms of the sexual primarily from the point of view of regulation and sanctioning here they are understood as positive practices that allowed people to understand and take ownership of their sexual desire

The Oxford Handbook of Early Modern European History, 1350-1750 Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching research and scholarly publishing More recently however the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity Volume II is devoted to Cultures and Power opening with chapters on philosophy science art and architecture music and the Enlightenment Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments notably the expansion of state power

The Routledge Companion to Early Modern Europe, 1453-1763 Chris Cook, Philip Broadhead, 2006 Covers the events as Europe transformed during the period from the Renaissance to the Enlightenment

Fiscal Policy in Early Modern Europe Rodrigo da Costa Dominguez, 2019-09-02 This book will examine the gradual assembly and consolidation of Portuguese fiscal policy in the second half of the fifteenth century providing a comparative analysis of the Portuguese State's finances and fiscal dynamics with other Western European monarchies This book examines relevant aspects of the Portuguese Royal finances particularly the different instruments employed to provide income and the rubrics involving all types of expenditure between the reigns of Afonso V and Manuel I at the dawn of Modern Ages The analysis of Portugal's case will also serve as a main conducting wire to a broader fiscal examination of other Latin rooted Mediterranean and North Atlantic kingdoms This book will be of interest to students and researchers of economic history fiscal history economic theory and history of economic thought as well as students of Medieval History the history of the Western Europe and the Iberian Peninsula

Finding Europe Anthony Molho, Diogo Ramada Curto, Niki

Koniordos,2007 In the last decade or so many books have been devoted to the history of Europe Two conceptual axes predominate in a large number of these accounts a discourse focusing on Europe s values and another discourse fashioned largely in opposition to the first which emphasizes the process of European construction The first conceives of Europe s past teleologically as a process by which certain values Christian ethics individualism capitalism tolerance republicanism due process etc were affirmed and came to define European culture The second approach rejects the discourse on values emphasizes the post Enlightenment emergence of the concept of Europe and the political and ideological implications in its continuous redefinitions and re elaborations during the past two or more centuries This volume offers new approaches that integrate the long temporal dimension of the values based approach albeit devoid of its teleological element with the constructivist interpretation

Europe's Changing Geography Nicola Bellini,Ulrich Hilpert,2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe s new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe s Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners

To Govern the Globe Alfred W. McCoy, 2021-11-16 In a tempestuous narrative that sweeps across five continents and seven centuries this book explains how a succession of catastrophes from the devastating Black Death of 1350 through the coming climate crisis of 2050 has produced a relentless succession of rising empires and fading world orders During the long centuries of Iberian and British imperial rule the quest for new forms of energy led to the development of the colonial sugar plantation as a uniquely profitable kind of commerce In a time when issues of race and social justice have arisen with pressing urgency the book explains how the plantation's extraordinary profitability relied on a production system that literally worked the slaves to death creating an insatiable appetite for new captives that made the African slave trade a central feature of modern capitalism for over four centuries After surveying past centuries roiled by imperial wars national revolutions and the struggle for human rights the closing chapters use those hard won insights to peer through the present and into the future By rendering often opaque environmental science in lucid prose the book explains how climate change and changing world orders will shape the life opportunities for younger generations born at the start of this century during the coming decades that will serve as the signposts of their lives 2030 2050 2070 and beyond

European Muslims and the Qur'an Gulnaz Sibgatullina, Gerard Wiegers, 2023-12-18 This edited volume aims to advance a Muslim centered perspective on the study of Islam in Europe To do so it brings together a range of case studies that illustrate how European Muslims engaged with their Sacred Scripture while being part of a Christian dominated social and political space The research presented in this volume seeks to analyse Muslims practices of translating interpreting and using the Qur'an as a sacred object and thus pursues three main research agendas Part I focuses on the issues of Muslim Christian relations in Europe and studies how these relations have

engendered discursive connections between Muslim and Christian produced texts related to the study and interpretation of the Qur'an Part II aims to bring scholarly attention to the under represented cases of Muslim communities in Europe This part introduces new research on Polish Belarusian Daghestani Bosnian and Kazan Tatars and examines local traditions of producing vernacular Qur'ans and commodification of Qur'anic manuscripts The final section of the volume Part III contributes to filling in the gaps related to the theoretical and conceptual framing of Muslim translation activities The history of religious thought and practice in European history is in many ways still uncharted territory This book aims to contribute to a better understanding of the cultural history of the Qur'an and Muslim agency in interpreting transmitting and translating the Sacred Scripture

Climate Change and Ancient Societies in Europe and the Near East Paul Erdkamp, Joseph G. Manning, Koenraad Verboven, 2021-11-05 Climate change over the past thousands of years is undeniable but debate has arisen about its impact on past human societies This book explores the link between climate and society in ancient worlds focusing on the ancient economies of western Eurasia and northern Africa from the fourth millennium BCE up to the end of the first millennium CE This book contributes to the multi disciplinary debate between scholars working on climate and society from various backgrounds The chronological boundaries of the book are set by the emergence of complex societies in the Neolithic on the one end and the rise of early modern states in global political and economic exchange on the other In order to stimulate comparison across the boundaries of modern periodization this book ends with demography and climate change in early modern and modern Italy a society whose empirical data allows the kind of statistical analysis that is impossible for ancient societies The book highlights the role of human agency and the complex interactions between the natural environment and the socio cultural political demographic and economic infrastructure of any given society It is intended for a wide audience of scholars and students in ancient economic history specifically Rome and Late Antiquity

A Cultural History of the Human Body in the Medieval Age Linda Kalof, 2012-03-01 The Christian Jewish and Muslim communities of medieval Western Europe conceived of the human body in manifold ways The body was not a fixed or unmalleable mass of flesh but an entity that changed its character depending on its age its interactions with its environment and its diet For example a slave would have been marked by her language her name her religion or even by a sign burned onto her skin not by her color alone Covering the period from 500 to 1500 and using sources that range across the full spectrum of medieval literary scientific medical and artistic production this volume explores the rich variety of medieval views of both the real and the metaphorical body A Cultural History of the Human Body in the Medieval Age presents an overview of the period with essays on the centrality of the human body in birth and death health and disease sexuality beauty and concepts of the ideal bodies marked by gender race class and age cultural representations and popular beliefs and the self and society
