New Directions In Rubian International Studies:

International Studies Stanley W Toops, Mark Allen Peterson, Sheldon Anderson, 2018-04-24 This core text is the first to provide a much needed interdisciplinary approach to international studies Emphasizing the interconnected nature of history geography anthropology economics and political science International Studies details the methodologies and subject matter of each discipline then applies these discipline lenses to seven regions Europe East Asia and the Pacific South and Central Asia sub Saharan Africa the Middle East and North Africa Latin America and North America This disciplinary and regional combination provides an indispensable cohesive framework for understanding global issues The fully updated fourth edition includes four new global issues chapters The Refugee Crisis in Europe The Syrian Civil War and the Rise of the Islamic State Global Climate Change and The Globalization of Modern Sports *Canada, Latin America, and the New Internationalism* Brian J.R. Stevenson, 2000-12-06 In *Canada Latin America and the New Internationalism* Brian Stevenson argues that Canada's foreign policy toward Latin America has been profoundly affected by these three factors and has evolved in response to both changing domestic demands and shifting international circumstances By analysing a pivotal period in Canada Latin American relations he shows us how successive Canadian governments made important initiatives toward closer relationships with Latin America and were also pressured by non governmental organizations to play a bigger role in the region Canada's increased role can be seen in official foreign policy commitments such as the decision to join the Organization of American States and in policy decisions on political refugees He explains that while the United States has played a key role in sometimes constraining Canadian foreign policy in the region it is important to realize that Canadian foreign policy has been steadied by a long standing tradition of internationalism *Canada Latin America and the New Internationalism* demonstrates that the tradition of internationalism in Canadian foreign policy as viewed from the perspective of foreign policy analysis provides the framework within which to understand and accommodate changes in its policy toward Latin America The period which the book explores is critical in order to understand the contemporary nature and future direction of Canada Latin America relations *Rethinking the Third World* Mark T Berger, Heloise Weber, 2014-09-22 A systematic reassessment by two leading figures in the field of the paradigm of international development in both theory and practice It offers an overview and critique of development theory and strategy and a new framework for the analysis of global inequality poverty and development in an era of globalization **The Polythink Syndrome** Alex Mintz, Carly Wayne, 2016-01-20 Why do presidents and their advisors often make sub optimal decisions on military intervention escalation de escalation and termination of conflicts The leading concept of group dynamics groupthink offers one explanation policy making groups make sub optimal decisions due to their desire for conformity and uniformity over dissent leading to a failure to consider other relevant possibilities But presidential advisory groups are often fragmented and divisive This book therefore scrutinizes polythink a group decision making dynamic whereby different members in a

decision making unit espouse a plurality of opinions and divergent policy prescriptions resulting in a disjointed decision making process or even decision paralysis The book analyzes eleven national security decisions including the national security policy designed prior to the terrorist attacks of 9 11 the decisions to enter into and withdraw from Afghanistan and Iraq the 2007 surge decision the crisis over the Iranian nuclear program the UN Security Council decision on the Syrian Civil War the faltering Kerry Peace Process in the Middle East and the U S decision on military operations against ISIS Based on the analysis of these case studies the authors address implications of the polythink phenomenon including prescriptions for avoiding and or overcoming it and develop strategies and tools for what they call Productive Polythink The authors also show the applicability of polythink to business industry and everyday decisions

Islam and Statecraft Jon Hoffman, 2025-01-23

Instead of religion influencing political outcomes this analysis examines how politics influences religious outcomes Dominant analyses examining the utilization of religion as a tool of statecraft in the Middle East remain overwhelmingly fixated on how Islam influences the foreign policies of different state actors not how political considerations often influence the forms Islam assumes and how religion itself is often molded according to strategic considerations of political elites That Islam due to its unique or exceptional relationship with politics drives political outcomes at the international level in the Middle East is a myth this book shatters by demonstrating how the political considerations of ruling elites specifically the intersection of domestic and foreign threats influence and constrain the kinds of religious soft power strategies adopted by states in the region This book develops a comprehensive analytical framework for the notion of religious soft power capable of incorporating power based identity based and ideational variables to examine how states couple religion with their broader foreign policy conduct This framework is applied to the Middle East through the specific examination of three countries Saudi Arabia Qatar and the United Arab Emirates in the period following the Arab Uprisings to demonstrate how specific religious narratives identities histories and ideologies are constructed by political elites in the Middle East for the advancement of what are inherently political objectives namely the imperatives of regime preservation and power projection

Conversational Interaction in Second Language Acquisition A. D. Cohen, Ernesto Macaro, 2013-05-20 Provides a unique and timely re examination of key issues such as strategies in context strategy instruction and strategy research methods by numerous experts in the field Offers an invaluable overview of what is known from empirical research about listening reading speaking writing vocabulary and grammar strategies Proposes a clear and focused research agenda for the next decades Research into language learner strategies has the fundamental goal of improving the teaching and learning of second languages This book explores the notion that the reason

some learners of second languages excel and others struggle lies in what the learners themselves do the strategies they bring to language learning and to language use Trafficked Children and Youth in the United States Elzbieta M.

Gozdziak,2016-05-10 Trafficked children are portrayed by the media and even by child welfare specialists as hapless victims who are forced to migrate from a poor country to the United States where they serve as sex slaves But as Elzbieta M Gozdzia reveals in Trafficked Children in the United States the picture is far more complex Basing her observations on research with 140 children most of them girls from countries all over the globe Gozdzia debunks many myths and uncovers the realities of the captivity rescue and rehabilitation of trafficked children She shows for instance that none of the girls and boys portrayed in this book were kidnapped or physically forced to accompany their traffickers In many instances parents or smugglers paid by family members brought the girls to the U S Without exception the girls and boys in this study believed they were coming to the States to find employment and in some cases educational opportunities Following them from the time they were trafficked to their years as young adults Gozdzia gives the children a voice so they can offer their own perspective on rebuilding their lives getting jobs learning English developing friendships and finding love Gozdzia looks too at how the children s perspectives compare to the ideas of child welfare programs noting that the children focus on survival techniques while the institutions focus not helpfully on vulnerability and pathology Gozdzia concludes that the services provided by institutions are in effect a one size fits all trauma based model one that ignores the diversity of experience among trafficked children Breaking new ground Trafficked Children in the United States offers a fresh take on what matters most to these young people as they rebuild their lives in America **Introduction to Emergency Management** Brenda D.

Contemporary Islam Abdul Aziz Said, Mohammed Abu-Nimer, Meena Sharify-Funk, 2006-09-27 Contemporary Islam provides a counterweight to the prevailing opinions of Islamic thought as conservative and static with a preference for violence over dialogue It gathers together a collection of eminent scholars from around the world who tackle issues such as intellectual pluralism gender the ethics of political participation human rights non violence and religious harmony This is a highly topical and important study which gives a progressive outlook for Islam s role in modern politics and society

Conflict Management, Security and Intervention in East Asia , From Research to Clinical Practice George Stricker, Robert H. Keisner, 2013-11-11 It is an intriguing feature of human experience that in our present world amid thousands of indications of the effectiveness of the scientific method so many of us persist in demonstrably illusory or magical beliefs whether religiously related or simply reflections of long standing superstitions At a time when millions can observe on television the first landings of human beings on the moon when our daily lives in the so called developed countries are replete with conveniences that reflect scientific advances we still persist in daily wagers on the state lotteries in paying astrologers or palmists for their readings in investing thousands of dollars and hours of our legislators time in discussing such issues as the value of daily prayer in the elementary schools The emergence of modern medicine based increasingly on scientific research in chemistry biology and physics has considerably reduced people s resort to shamans and witch doctors within the major sectors of our own society although it has by no means eliminated such practitioners

Research Handbook on Conflict Prevention Timo Kivimäki, 2024-06-05 The Research Handbook on Conflict Prevention is a cohesive and comparative analysis of the ways in which organised violence is combatted Renowned experts dissect the complex problem of conflict prevention by investigating its three main aspects agency methods and timing

Routledge Handbook of Space Policy Thomas Hoerber, Mariel Borowitz, Antonella Forganni, Bruno Reynaud de Sousa, 2024-12-30 This volume offers a comprehensive overview of the field of space policy

Space is a technology driven domain and policy development has accelerated in recent years at a time when the space economy has begun to show remarkable potential. Thus this handbook gathers experts from different fields with the aim of 1 offering an overview of the state of play regarding space policy issues and 2 expanding knowledge about possible future developments. Given the cross disciplinary nature of the subject and its vast scope the authors' contributions are grouped within different thematic sections as follows: Theoretical structures for an understanding of space policies; The history of space; Society, justice and the human impact; Governance of space; Popularisation of space; New frontiers in space and expansion into the unknown; World space policies by geographic areas. The introduction and the conclusion chapters provide a coherent connection between the contributions, with each section presenting transversal themes such as power dynamics and rules, commercialisation, sustainability, militarisation, applications and domestic use and justice. This volume will be of much interest to students of space policy and power, security studies and international relations.

Marxism and Social Science David Marsh, Tony Tant, 1999. Has Marxism ceased to be part of our political present and future? Has its theory or doctrine anything to contribute to our understanding of the new millennium? In these original commissioned essays the contributors argue that Marxism continues as a living tradition. They show how it still engages with other theoretical positions, how it has evolved in response to both these engagements and contemporary world changes, and they assess its relevance and contribution to modern social science.

Communication Research Measures II, 2009. Expanding and building on the measures included in the original 1994 volume *Communication Research Measures II: A Sourcebook* provides new measures in mass, interpersonal, instructional and group, organizational communication areas and highlights work in newer subdisciplines in communication including intercultural, family and health. It also includes measures from outside the communication discipline that have been employed in communication research. The measures profiled here are the best of the best from the early 1990s through today. They are models for future scale development as well.

A Guide to Research Methodology Shyama Prasad Mukherjee, 2019-09-04. Research Methodology is meant to provide a broad guideline to facilitate and steer the whole of a research activity in any discipline. With the ambit and amount of research increasing by the day, the need for Research Methodology is being widely appreciated. Against this backdrop, we notice the dearth of well-written books on the subject. *A Guide to Research Methodology* attempts a balance between the generic approach to research in any domain and the wide array of research methods which are to be used in carrying out different tasks in any research. Discussions on these research methods appropriate in various disciplines have focused on the research tasks, keeping in mind the fact that a single such task like a comparison among alternatives may involve several methods from seemingly distinct areas. Unique features of this volume, as will be evident to a discerning reader, include: A detailed discussion on problem areas for research in several domains; An illustrative and amplified list of research problems drawn from different disciplines which can be pursued by interested research workers; A comprehensive delineation of Research Design supported by illustrations.

An elaborate engagement with models with a note on model uncertainty Focus on recent and emerging models methods and techniques A novel treatment of data analysis where the nature of data and the objective s of analysis justify drawing upon a variety of techniques for analysis This book will serve the purpose of a pre PhD or a Master level course work for students of any discipline with a basic knowledge of quantitative analysis In fact anyone aspiring to take up meaningful research work will find the content useful and interesting
