**Dark Pool of Light, Volume Three** Richard Grossinger, 2012-12-18. In books like *Embryogenesis and Embryos*, *Galaxies and Sentient Beings*, author Richard Grossinger brought together the subjects of biological embryology and the esoteric process of human consciousness becoming embodied. The embryo is the universe writing itself on its own body. In *Dark Pool of Light*, his three-volume series of books discussing the nature of reality and consciousness, Grossinger weaves neuroscience, based behaviorism, and the phenomenology of being and reality together with psychological and psychospiritual views of that single thing which is most difficult to understand or vindicate: our own existence. In 2008, Grossinger began studying with noted psychic teacher John Friedlander, who helped him refine his vision of cerebral and somatic awareness to still subtler levels. *Dark Pool of Light* began unnamed in the journals of my psychic work with John Friedlander, says Grossinger, not so much a record of actual practices as insights from them and extensions out of them. This expansive inquiry into the nature of consciousness ends with this third volume in the series, *The Crisis and Future of Consciousness*. Grossinger addresses the perennial question of evil and shares the author's hopes and fears for the future of humanity. While wisdom gleaned from such seemingly disparate sources as science, philosophy, religion, and spirituality might appear very, very different things, Grossinger nevertheless finds their meeting place in subjective lived experience. *Digital Dharma* Steven Vedro, 2013-08-15. *Digital Dharma* has something for everyone. It is for technology experts and yoga fanatics alike. Whether you're simply seeking the spiritual, already practicing a spiritual tradition, or a Body-Mind-Spirit reader with ambivalent feelings about your computer and cell phone, this book will guide you on the path toward a new consciousness. Similarly, novices of the digital world, media junkies, and technology utopians who understand at some level there is much yet to be learned from the Infosphere will all find intriguing, useful material here. *Dark Pool of Light: The crisis and future of consciousness* Richard Grossinger, 2012. Explores and compares neuroscientific and philosophical views of reality and human consciousness.
