Processes Of Knowledge:

Modeling and Analyzing Knowledge Intensive Business Processes with KMDL Norbert Gronau, 2012 The proportion of value added of knowledge in companies has increased since the last years and in this context the meaning of knowledge flows within business processes has become more important Numerous developed approaches aim at modeling knowledge intensive business processes in order to enable the analysis evaluation and deduction of potentials for optimization of knowledge flows within these processes This book presents the Knowledge Modeling and Description Language KMDL as a modeling approach from a scientific theoretical point of view as well as its practical applicability Practitioners get a deeper comprehension of knowledge intensive business processes and a practical application orientation for the use of KMDL within the company Scientists and students get a summary about actual research efforts on knowledge intensive business processes associated methods and cases of application Back cover

Acquisition and Understanding of Process Knowledge Using Problem Solving Methods J.M. Gómez-Pérez, 2010-07-08 The development of knowledge based systems is usually approached through the combined skills of knowledge engineers KEs and subject matter experts SMEs One of the most critical steps in this activity aims at transferring knowledge from SMEs to formal machine readable representations which allow systems to reason with such knowledge However this is a costly and error prone task Alleviating the knowledge acquisition bottleneck requires enabling SMEs with the means to produce the desired knowledge representations without the help of KEs This is especially difficult in the case of complex knowledge types like processes The analysis of different application domains uncovers that process knowledge is one of the most frequent knowledge types whose complexity requires specific means to enable SMEs to represent processes in a computational form Additionally such complexity and the increasingly large amount of data that process executions generate in knowledge intensive domains like Biology or Astronomy requires analytical means with high abstraction capabilities to support SMEs in the analysis of such processes This book presents methods and tools that enable SMEs to acquire process knowledge from the domains formally represent such knowledge reason about it and understand process executions by analyzing their provenance We describe the utilization of Problem Solving Methods as the main knowledge artifacts for process acquisition and analysis in two innovative ways First as formalizations of the reasoning strategies needed for processes and second as high level domain independent and reusable abstractions of process knowledge to provide SMEs with interpretations of process executions

Integration of Process

Knowledge into Design Support Systems Hubert Kals, Fred van Houten, 2013-04-17 Design is a fundamental creative human activity This certainly applies to the design of artefacts the realisation of which has to meet many constraints and ever raising criteria The world in which we live today is enormously influenced by the human race Over the last century these artefacts have dramatically changed the living conditions of humans The present wealth in very large parts of the world depends on it All the ideas for better and new artefacts brought forward by humans have gone through the minds of designers who have turned them into feasible concepts and subsequently transformed them into realistic product models The designers have been still are and will remain the leading change agents in the physical world Manufacturability of artefacts has always played a significant role in design In pre industrial manufacturing the blacksmith held the many design and realisation aspects of a product in one hand The synthesis of the design and manufacturing aspects took almost implicitly place in the head of the man All the knowledge and the skills were stored in one person Education and training took place along the line of many years of apprenticeship When the production volumes increased assembling to measure was no longer tolerated and production efficiency became essential design process planning production planning and fabrication became separated concerns The designers created their own world separated from the production world They argued that restrictions in the freedom of designing would badly influence their creativity in design

Practical Aspects of Knowledge Management Dimitris Karagiannis, Ulrich Reimer, 2004-12-01 This book contains the papers presented at the 5th International Conference on Practical Aspects of Knowledge Management organized by the Department of Knowledge Management Institute of Computer Science and Business Informatics University of Vienna The event took place on December 02 03 2004 in Vienna The PAKM conference series offers a communication forum and meeting ground for practitioners and researchers engaged in developing and deploying advanced business solutions for the management of knowledge and intellectual capital Contributions pursuing integrated approaches which consider organizational technological and cultural issues of knowledge management have been elected for presentation PAKM is a forum for people to share their views to exchange ideas to develop new insights and to envision completely new kinds of solutions for knowledge management problems The accepted papers are of high quality and are not too specialized so that the main issues can be understood by someone outside the respective field This is crucial for an interdisciplinary exchange of ideas Like its predecessors PAKM 2004 featured two invited talks It is a real joy seeing the visibility of the conference increase and noting that knowledge management researchers and practitioners from all over the world submitted papers This year 163 papers and case studies were submitted from which 48 were accepted
