Holstein, Gale Miller, 2024-11-01 The social constructionist perspective has revolutionized the way that social scientists investigate social problems Constructing Social Problems Spector and Kitsuse 1977 2001 offered the guiding statement of the approach which both transformed and revitalized the sociology of social problems propelling it into a quarter century of exciting and innovative empirical research John Kitsuse and Malcolm Spector challenged conventional approaches to the field they insisted on treating social problems as social constructions as the products of claims making and constitutive definitional processes The purpose of this book is to highlight contemporary challenges to the social constructionist perspective on social problems In 1993 two collections of essays Reconsidering Social Constructionism Debates in Social Problems Theory Holstein and Miller 1993 and Constructionist Controversies Issues in Social Problems Theory Miller and Holstein 1993 brought a wide variety of constructionist challenges into focus Challenges and Choices attempts to distill these debates and offers some compelling suggestions for how challenges may be met and where constructionist studies might proceed in the future While each of the essays in this volume deeply appreciates the constructionist approach each of them points to issues and choices that social constructionists must confront if the perspective is to continue to be a vital part of ongoing debates on social problems The essays critique previous constructionist formulations make suggestions for advancing expanding or diversifying the constructionist agenda and challenge the perspective to move in new directions They remind us that social constructionism is an ongoing not a finished product and the essays point to some of the choices available to social constructionists in moving their projects into new even uncharted territories James A Holstein and Gale Miller are professors in the Department of Social and Cultural Sciences at Marquette University

Social Constructionism in Housing Research Jim Kemeny, 2017-05-15 By stressing the importance of subjectivity and interpretation social constructionism offers a different conception of reality from the traditional approach to housing policy analysis This book provides an up to date review of the social constructionist perspective and considers its philosophical basis It discusses how social problems are constructed and in turn how this informs policy making It is divided into two parts The first section

is theoretical and discusses the variety of conceptual approaches utilised within the constructionist paradigm The second part provides a number of empirically based case studies from the UK and Australia to illustrate the different methodologies that form the social constructionist corpus The book also evaluates both the criticisms that have been made against the social constructionist perspective and the strengths and weaknesses of constructionist methods It therefore contributes to the development of a future research agenda for social constructionist research in housing and urban policy

profession that for over a century has argued that children and their problems medical and otherwise are different and also claimed that it better than anyone else understands these problems *The SAGE Handbook of Political Science* Dirk Berg-Schlosser, Bertrand Badie, Leonardo Morlino, 2020-02-11 The SAGE Handbook of Political Science presents a major retrospective and prospective overview of the discipline Comprising three volumes of contributions from expert authors from around the world the handbook aims to frame assess and synthesize research in the field helping to define and identify its current and future developments It does so from a truly global and cross area perspective Chapters cover a broad range of aspects from providing a general introduction to exploring important subfields within the discipline Each chapter is designed to provide a state of the art and comprehensive overview of the topic by incorporating cross cutting global interdisciplinary and where this applies gender perspectives The Handbook is arranged over seven core thematic sections Part 1 Political Theory Part 2 Methods Part 3 Political Sociology Part 4 Comparative Politics Part 5 Public Policies and Administration Part 6 International Relations Part 7 Major Challenges for Politics and Political Science in the 21st Century *Notes on the Plague Years* Bernard Paillard, An outgrowth of a four year study by Paillard and his research team this volume describes the societal impact of a full force epidemic on a large diversified Mediterranean seaport city In addition to his straightforward empirical reports presented elsewhere the author has here chosen to present a reflexive qualitative study in narrative form portraying the sociologist as participant observer and providing the reader with a pioneering study on problem formation and moral panic For this first English edition Paillard has added an appendix on methodology **Corrupt Exchanges** Donatella Della Porta, Alberto Vannucci, 1999-01-01 Political corruption has traditionally been presented as a phenomenon characteristic of developing countries authoritarian regimes or societies in which the value system favored tacit patrimony and clientelism Recently however the thesis of an inverse correlation between corruption and economic and political development and therefore democratic maturity has been frequently and convincingly challenged Countries with a long democratic tradition such as the United States Belgium Britain and Italy have all experienced a combination of headline grabbing scandals and smaller scale cases of misappropriation In *Corrupt Exchanges* primary research on Italian cases judicial proceedings in depth interviews parliamentary documents and press databases combined with a cross national comparison based on a secondary analysis of corruption in democratic systems is used to develop a model to analyze corruption as a network of illegal exchanges The authors explore in great detail the structure of that network by examining both the characteristics of the actors who directly engage in the corruption and the resources they exchange These processes of degeneration have caused a crisis in the dominant paradigm in both academic and political considerations of corruption The book is organized around the analysis of the resources that are exchanged and of the different actors who take part Politicians in business illegal brokers Mafia members protected entrepreneurs and party appointed bureaucrats exchange resources on the illegal market altering the institutional system of interactions between the state and the market In this

complex web of exchanges bonds of trust are established that allow the corrupt exchange to thrive The book will serve both as a theoretical approach to a political problem of large bearing on democratic institutions and a descriptive warning of a system in peril
