Secular Theories On Religion:

Secular Theories on Religion Tim Jensen, Mikael Rothstein, 2000 Scholars of religious studies from Europe and North America explore what a secular or scientific study of religion should be like what methods it should apply what aims and what kind of scientific thinking should be pursued They also consider scholars as public intellectuals operating within and influenced by general societal developments The 18 essays provide a survey of current thinking in the field Distributed in the US by ISBS c Book News Inc

Post-Secular Society Peter Nynas, Mika Lassander, Terhi Utriainen, 2012-08-14 Are we still secular If not what can one possibly mean by post secular The answers depend on what one considers secular as well as the people societies and institutions that one considers Post Secular Society argues for the experience of living in a secular world and a secular age and the experience of living without religion as a normal condition Religion in the Western world is often described as being marked to some degree by both innovation and disarray The past couple of decades have seen the emergence of reformulated versions of theories of secularization variants of rational choice and supply side models of religion and new theoretical perspectives on de secularization of religion In spite of these different approaches and perspectives a majority of scholars agree that the West is experiencing a general resurgence of religion and that the public visibility of religious actors and discourses is on the rise across most Western societies Post Secular Society discusses the changes in religion related to globalization as well as New Age and other forms of popular religion The contributors review religion that is rooted in the globalized political economy and the relationship of post secularism to popular and consumer culture They also detail current innovative discourse as a religious belief system discuss theories of the post secular religious and spiritual well being and consider healing practices in Finland and environmentalism

'Religion' and 'Secular' Categories in Sociology Mitsutoshi Horii, 2022-01-01 Informed by critical religion perspective in Religious Studies and postcolonial self reflection in Sociology this book interrogates the ideas of religion and the secular in social theory and Sociology It argues that as long as social theory and sociological discourse embed the religion secular distinction and locate themselves on the secular side of the binary Sociology will continue to serve the very ideologies it tries to subvert namely Western modernity coloniality

Sacred and Secular Pippa Norris, Ronald Inglehart, 2011-10-17 This book develops a theory of existential security It demonstrates that the publics of virtually all advanced industrial societies have been moving toward more secular orientations during the past half century but also that the world as a whole now has more people with traditional religious views than ever before This second edition expands the theory and provides new and updated evidence from a broad perspective and in a wide range of countries This confirms that religiosity persists most strongly among vulnerable populations especially in poorer nations and in failed states Conversely a systematic erosion of religious practices values and beliefs has occurred among the more prosperous strata in rich nations

Deep History, Secular Theory Luther Martin, 2014-05-21 Over the course of his career Luther H Martin has primarily produced articles rather than monographs

This approach to publication has given him the opportunity to experiment with different methodological approaches to an academic study of religion with updates to and different interpretations of his field of historical specialization namely Hellenistic religions the subject of his only monograph 1987 The contents of this collected volume represent Martin's shift from comparative studies to socio-political studies to scientific studies of religion and especially to the cognitive science of religion He currently considers the latter to be the most viable approach for a scientific study of religion within the academic context of a modern research university The twenty-five contributions collected in this volume are selected from over one hundred essays articles and book chapters published over a long and industrious career and are representative of Martin's work over the past two decades

Interpreting Charles Taylor's Social Theory on Religion and Secularization Germán McKenzie, 2016-11-22 This book examines Taylorean social theory its sources main characteristics and impact Charles Taylor's meta-narrative of secularization in the West prominently contained in his major work *A Secular Age* 2007 has brought new insight on the social and cultural factors that intervened in such process the role of human agency and particularly on the contemporary conditions of belief in North America and Europe This study discusses what Taylor's approach has brought to the scholarly debate on Western secularization which has been carried on mostly in sociological terms McKenzie interprets Taylor's views in a way that offers an original social theory Such interpretation is possible with the help of sociologist Margaret Archer's morphogenetic theory and by making the most of Taylor's particular understanding of the method of the social sciences and of his philosophical views on human beings knowledge and modernity After exploring the philosophical and sociological sources informing Taylorean social theory and proposing its basic concepts and hermeneutic guidelines the author compares it with two widespread theories of secularization the now waning orthodox account and that proposed by Rational Choice Theory scholars particularly prevalent in the United States In doing so the book shows in which ways Taylorean social theory supersedes them what new issues it brings into the scholarly discussion and what difficulties might limit its future development

Social Identities Between the Sacred and the Secular Abby Day, 2013 Focusing on the important relationship between the sacred and the secular this book demonstrates that it is not paradoxical to think in terms of both secular and sacred or neither in different times and places International experts from a range of disciplinary perspectives draw on local national and international contexts to provide a fresh analytical approach to understanding these two contested poles *Social Identities between the Sacred and the Secular* provides an essential resource for continued research into these concepts challenging us to re-think where the boundaries of sacred and secular lie and what may lie between

Radical Secularization? Stijn Latré, Walter Van Herck, Guido Vanheeswijck, 2014-12-18 What does it mean for a society to be secular Answering this question from a philosophical angle Radical Secularization delves into the philosophical presuppositions of secularization Which cultural evolutions made secularization possible International scholars from different disciplines assess the answers given by many leading philosophers such as among others L with Blumenberg and Habermas Germany Gauchet and Nancy France Taylor and Bellah North America They examine the theory that secularization cannot only be regarded as a cultural change that was forced upon religion from an external source e g science but should also be considered as a phenomenon triggered by motives internal to religion If religions are indeed capable of inner transformations the question arises whether religions can persist in the secular societies they inadvertently helped to bring about and how secular societies may accommodate religion

Beyond Secular Order John Milbank, 2014-01-07 Beyond Secular Order is the first of a two volume work that expands upon renowned theologian John Milbank s innovative attempt to understand both theology and modern thought begun in his previously published classic text Theology and Social Theory Continues Milbank s innovative attempt to understand both theology and modern thought begun in Theology and Social Theory considered a classic work in the development of systematic theology Authored by one of the world s most influential and highly regarded contemporary theologians Draws on a sweep of ideas and thinkers to argue that modern secularism is a form of Christian heresy that developed from the Middle Ages and can only be overcome by a renewed account of Christendom Shows how this heresy can be transformed into a richer blend of religion modernity and politics Reveals how there is a fundamental homology between modern ideas about ontology and knowledge and modern ideas about political action expressed in both theory and practice

Theology and Social Theory John Milbank, 2008-04-15 This is a revised edition of John Milbank s masterpiece which sketches the outline of a specifically theological social theory The Times Higher Education Supplement wrote of the first edition that it was a tour de force of systematic theology It would be churlish not to acknowledge its provocation and brilliance Featured in The Church Times 100 Best Christian Books Brings this classic work up to date by reviewing the development of modern social thought Features a substantial new introduction by Milbank clarifying the theoretical basis for his work Challenges the notion that sociological critiques of theology are scientific Outlines a specifically theological social theory and in doing so engages with a wide range of thinkers from Plato to Deleuze Written by one of the world s most influential contemporary theologians and the author of numerous books

Global Religious and Secular Dynamics José

Casanova,2019-08-12 Global Religious and Secular Dynamics offers a global historical perspective that integrates European theories of modern secularization and competing theories of global religious revival as interrelated dynamics In the first section Casanova examines the emergence of the modern religious secular binary system of classification within a critical review of mile Durkheim s and Max Weber s divergent theories of religion The modern system of classification is contrasted with the pre axial one in which all reality was organized according to the binary sacred profane and with the post axial one which was organized according to the binary transcendent immanent The second and third sections contrast the internal European road of secularization without religious pluralization with the external colonial road of global intercultural and religious encounters particularly in Asia that led to the global system of religious pluralism The final section examines the contemporary intertwinement of religious and secular dynamics through the globalization of the immanent frame and the expansion of global denominationalism *On Secularization* David Martin,2017-03-02 Secularization has been hotly debated since it was first subjected to critical attention in the mid sixties by David Martin before he sketched a General Theory in 1969 On Secularization presents David Martin s reassessment of the key issues with particular regard to the special situation of religion in Western Europe and questions in the global context including Pentecostalism in Latin America and Africa Concluding with examinations of Pluralism Christian Language and Christianity and Politics this book offers students and other readers of social theory and sociology of religion an invaluable reappraisal of Christianity and Secularization It represents the most comprehensive sociology of contemporary Christianity set in historical depth Sacred and Secular Pippa Norris,2004 The belief that religion was dying became the conventional wisdom in the social sciences during most of the 20th century However religion has not disappeared and is unlikely to do so and the secularization thesis needs updating This text develops a theory of secularization and existential security *Manifesto of the Critical Theory of Society and Religion (3 Vols.)* Rudolf Siebert,2010-08-16 The Manifesto develops further the Critical Theory of Religion intrinsic to the Critical Theory of Society of the Frankfurt School into a new paradigm of the Psychology Sociology Philosophy and Theology of Religion Its central theme is the theodicy problem in the context of late capitalist society and its globalization

Sovereignty and the Sacred Robert A. Yelle,2018-11-26 Sovereignty and the Sacred challenges contemporary models of polity and economy through a two step engagement with the history of religions Beginning with the recognition of the convergence in the history of European political theology between the sacred and the sovereign as creating states of exception that is moments of rupture in the normative order that by transcending this order are capable of re founding or remaking it Robert A Yelle identifies our secular capitalist system as an attempt to exclude such moments by subordinating them to the calculability of laws and markets The second step marshals evidence from history and anthropology that helps us to recognize the contribution of such states of exception to ethical life as a means of release from the legal or economic order Yelle draws on evidence from the Hebrew Bible to English deism and from the Aztecs to ancient India to develop a theory of

polity that finds a place and a purpose for those aspects of religion that are often marginalized and dismissed as irrational by Enlightenment liberalism and utilitarianism Developing this close analogy between two elemental domains of society Sovereignty and the Sacred offers a new theory of religion while suggesting alternative ways of organizing our political and economic life By rethinking the transcendent foundations and liberating potential of both religion and politics Yelle points to more hopeful and ethical modes of collective life based on egalitarianism and popular sovereignty Deliberately countering the narrowness of currently dominant economic political and legal theories he demonstrates the potential of a revived history of religions to contribute to a rethinking of the foundations of our political and social order Religion, a Secular Theory Andrew M. Greeley,1982 **Religion and Political Theory** Jonathan Seglow,Andrew Shorten,2019-10-21 Religion and religious diversity now occupy a central place in several prominent debates in contemporary political theory such as those concerning the meaning s and relevance of secularism the place of religious reasons in political deliberation and whether religious beliefs and practices deserve special treatment by laws and public institutions That religion has once again become a divisive topic amongst political theorists is perhaps surprising given the widespread consensus about such staples of liberal political morality as the separation of church and state and the principle of religious freedom Featuring the work of both established and up and coming scholars this collection will take stock of the recent turn towards religion in political theory identify some of the major unresolved challenges and issues and suggest new avenues for theoretical inquiry Taken as a whole the collection showcases some cutting edge work by leading scholars of religion and political theory and demonstrates the vitality of religion and political theory as a research agenda On the Theories of Secularism and Modernization A. K. Saran,2007
