Empowering the People Richard A. Horsley, 2022-03-25 In this innovative study Horsley builds on his earlier works concerning the problematic and misleading categories of magic and miracle to examine in depth the meaning and importance of the narratives of healing and exorcism in the Gospels Incorporating his work on oral performance and turning to important works in medical anthropology a new image emerges of how these narratives help us re evaluate Jesus's place in first century Galilee and Judea In his exorcisms and healings Jesus in interaction was empowering the villagers in their struggles for renewal of personal and communal dignity in resistance to invasive Roman rule

Jesus and Magic Richard A Horsley, 2015-04-30 It has become standard in modern interpretation to say that Jesus performed miracles and even mainline scholarly interpreters classify Jesus's healings and exorcisms as miracles Some highly regarded scholars have argued more provocatively that the healings and exorcisms were magic and that Jesus was a magician As Richard Horsley points out if we make a critical comparison between modern interpretation of Jesus's healing and exorcism on the one hand and the Gospel stories and other ancient texts on the other hand it becomes clear that the miracle and magic are modern concepts products of Enlightenment thinking Jesus and Magic asserts that Gospel stories do not have the concepts of miracle and magic What scholars constructed as magic turns out to have been ritual practices such as songs incantations medicines potions and appeals to higher powers for protection Horsley offers a critical reading of the healing and exorcism episodes in the Gospel stories This reading reveals a dynamic relationship between Jesus the healer the trust of those coming for healing and their support networks in local communities Horsley's reading of the Gospel stories gives little or no indication of divine intervention Rather the healing and exorcism stories

portray healings and exorcisms **The Encyclopedic Sourcebook of New Age Religions** James R. Lewis, 2004-08-30 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public's curiosity. While the movement was at its height, scholars of religion generally sneered at what was perceived to be a daffy, shallow craze and ignored it as a subject of serious study. Professor James R. Lewis was among the first to examine this growing religious phenomenon scientifically. In previous books, he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy, Spiritualism, and New Thought. The present collection pursues this theme, bringing together some of the best recent scholarship on new religions. Since the height of its popular influence, the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality. Reflecting the emergence of this new denominational structure, the core chapters of this book focus on specific groups. Other chapters examine the movement's historical roots. A unique feature of Dr. Lewis's work is his inclusion of extensive selections from New Age literature, thus allowing readers to experience firsthand the unusual perspectives of the various groups. This is a fascinating examination of a significant and persistent religious and social phenomenon.

Truth Claims in a Post-Truth World Erkan Ali, 2023-08-18 Drawing on debates from a multi disciplinary perspective this book examines what it means to offer a genuine sociological critique of religious faith illiberalism and anti secularism from a macro perspective Arguing that as a discipline concerned with real issues in the social world sociology should be at the forefront of any analysis of religious power and legitimacy the author contends that much religious faith is

fundamentally incompatible with any twenty first century society that seeks inclusive utilitarian and humanistic principles as its goals. With an emphasis on sociology the effects of organised religion's overall decline in modern Western contexts are explored while the troubling re emergence or persistence of faith based and other non evidentiary perspectives is also discussed via debates around identity politics postmodernism and multiculturalism. Through an analysis of the rise of irrational thinking in our politics and our entire social and cultural fabric the book moves to conclude that religious beliefs and other forms of dogmatism are underpinned by powerful influential and potentially dangerous ideological structures at various levels of society and that viable secular alternatives to faith teachings ought to be nurtured in their place. A critique of religion that advances modern secular humanistic thought. *Truth Claims in a Post Truth World* will appeal to scholars of sociology social theory and philosophy with interests in religion political thought ethics and civil society. *Religion in the Contemporary World* Alan Aldridge, 2013-04-12. In the new edition of this widely praised text Alan Aldridge examines the complex realities of religious belief practice and institutions. Religion is a powerful and controversial force in the contemporary world even in supposedly secular societies. Almost all societies seek to cultivate religions and faith communities as sources of social stability and engines of social progress. They also try to combat real and imagined abuses and excess regulating cults that brainwash vulnerable people containing fundamentalism that threatens democracy and the progress of science and identifying terrorists who threaten atrocities in the name of religion. The third edition has been carefully revised to make sure it is fully up to date with recent developments and debates. Major themes in the revised edition include the recently erupted culture war between progressive secularists and conservative believers the diverse manifestations of fundamentalism and their impact on the wider society new individual forms of religious expression in opposition to traditional structures of authority and the backlash against multiculturalism with its controversial implications for the social integration of ethnic and religious minority communities. Impressive in its scholarly analysis of a vibrant and challenging aspect of human societies the third edition will appeal strongly to students taking courses in the sociology of religion and religious studies as well as to everyone interested in the place of religion in the contemporary world. *The Social Unconscious* Earl Hopper, 2003. The social unconscious and its manifestations in group analysis are the focus of this important new book of Earl Hopper's selected papers. Drawing on sociology psychoanalysis and group analysis he argues that groups and their participants are constrained unconsciously by social cultural and political facts and forces. Traumatic Experience in the Unconscious Life of Groups Earl Hopper, 2003. Working within the traditions of Bion Turquet Foulkes and Pines and drawing on concepts and data from psychoanalysis group analysis and sociology this volume develops Earl Hopper's theory of the fourth basic assumption in the unconscious life of groups and group like social systems within a social cultural and political context. **A Church Drawing Near** Paul D.
