Seeing Red Redshifts Cosmology And Academic Science:

Seeing Red Halton C. Arp, 1998 *Gonzo Science* Jim Richardson, Allen Richardson, True believers and skeptics beware what you know about science may be wrong Science commentators Jim and Allen Richardson are more faithful than the believers and more skeptical than the skeptics and they're funnier too

Dismantling the Big Bang Alex Williams, John Hartnett, 2005 Why did Ptolemy's theory cause problems for the church What is the big secret concerning the Age of the earth Why do many scientists reject the use of design in explaining origins The seemingly absurd idea that all matter energy space and time once exploded from a point of extreme density has captured the imagination of scientists and laypersons for decades The big bang has provided a central teaching for the eons of time of cosmic evolution undermining the history and cosmology of the Bible It is a theory that fails even violating the very physical laws on which it is purportedly based In this easy to read format authors Alex Williams and John Hartnett explode this naturalistic explanation for the universe and show that the biblical model provides a far better explanation of our origins This fully indexed illustrated analysis of the big bang theory is an invaluable help in understanding and countering a world view that is as chaotic and destructive as its name implies

Dogmatism in Science and Medicine Henry H. Bauer, 2014-01-10 The nature of scientific activity has changed dramatically over the last half century and the objectivity and rigorous search for evidence that once defined it are being abandoned Increasingly this text argues dogma has taken the place of authentic science This study examines how conflicts of interest both institutional and individual have become pervasive in the science world and also explores the troubling state of research funding and flaws of the peer review process It looks in depth at the dominance of several specific theories including the Big Bang cosmology human caused global warming HIV as a cause of AIDS and the efficacy of anti-depressant drugs In a scientific environment where distinguished experts who hold contrary views are shunned this book is an important contribution to the examination of scientific heterodoxies

Cosmological Frontiers Anab Whitehouse, 2018-11-06 *Cosmological Frontiers* explores a variety of topical themes within the general fields of cosmology and astrophysics such as Dark matter dark energy black holes theory of gravity redshift plasmas cosmic microwave background radiation branes the Big Bang theory and the Steady State model More generally the current volume gives expression to a process of critically reflecting on some of the discoveries of astrophysics and the field of cosmology as a means of seeking the truth about the nature of certain aspects of reality

Science Discovers God Ariel Adrean Roth, 2008 Does God exist Did a Master Designer create our universe or did life spontaneously evolve Can science retain objectivity in the search for truth while allowing for the possibility that God exists Does it make any difference Ariel A Roth scientist and Christian believer examines key issues related to the God question the intricate organization of matter in the universe the precision of the forces of physics the complexity of the eye and the brain the elaborate genetic code the disparity between the fossil record and the vast amount of time necessary for evolution Faced with so much evidence that seems to require a God in order to explain

what we find in nature why does the scientific community remain silent about God Hypotheses and speculations that attempt to fit data into a predetermined conclusion about What overriding influence prevents scientists from following the data of nature wherever it may lead *Seeing Red* Halton C. Arp,1998 **Apocryphal Science** Neil DeRosa,2004 This book is a review of extraordinary new hypotheses that might reasonably be characterized as dissenting science It spotlights the principal scientists world class thinkers all who have proposed these theories and the difficulties they encountered in their conclusions challenges to existing paradigms By laying out these theories in terms that any intelligent reader can understand they become accessible to the non specialist who is then able to evaluate them on their merits Uncommon Knowledge Al McDowell,2012-10-26 This book develops new science of gravity and light based on the century old Le Sage theory of an ether that was replaced by Einsteins Theory of Relativity After presenting astrophysical data contradicting the theory that the universe is expanding from a Big Bang experiments believed to prove Relativity are shown to actually prove the ether theory instead Freedom from the speed limit of light enables a science of subatomic particles traveling faster than light to produce gravity electric and magnetic fields light and radio waves Major technical innovations include solving the two fundamental problems with the Le Sage gravity theory and extending this theory to electromagnetism and consciousness This is a theory of everything that explains the heretofore unknown causes of the forces of nature This book builds on the works of Zecharia Sitchin and other authors to explain how life developed on Earth and that evolution requires direction from intelligence that dwells in the subatomic particles on which this theory of gravity and light is based Our biblical God is shown to be a composite of Sitchins extraterrestrial gods who colonized Earth and the intelligence that dwells alongside our own mind in the particles from which the universe is constructed and powered The Big Argument John F. Ashton,Michael Westacott,2006 Today some of the world s best minds in a variety of disciplines grapple with whether there is any real purpose to our lives Yet not only do many scientists believe in the God who created us with purpose they also understand that what we do in the here and now has consequences in the next life John Ashton has compiled a group of essayists who specialize in fields such as archaeology astronomy biblical scholarship and more The result is a fascinating exploration of an age old question sure to intrigue believers and skeptics alike **Becoming a Christian** Ola Hossjer,2018-02-21 What influences the decision to become a Christian In the seventeenth century the famous scientist Blaise Pascal viewed this as a game with truth our adversary Pascal argued that we are in the game whether we like it or not Christianity is either true or not and we have to weigh the two alternatives According to Pascal s Wager we have everything to win and nothing to lose by taking a leap of faith and becoming a Christian In this book Ola Hossjer extends Pascal s Wager and argues that we respond to the Christian message very differently There are three main attitudes among people the first group follows Pascal s advice even if evidence before the decision is incomplete the second group requires convincing evidence at first and members of the third group will not become Christians regardless of evidence Hossjer contends that the decision consists of three

components a religious disposition from birth evidence and a willingness to act Although we weigh evidence and will differently our priorities may change after a life crisis so that we either reevaluate evidence or become more positive toward Christianity This is illustrated by a number of people who became Christians

A Statistical Theory of Gravitating Body Formation in Extrasolar Systems Alexander Krot, 2021-02-22 This book develops the statistical mechanics of the formation of gravitating cosmogonical bodies in the investigation of our solar system and other exoplanetary systems The first part of the text acquaints the reader with the developing statistical theory of gravitating cosmogonical body formation Within the framework of this theory the models and evolution equations of the statistical mechanics are proposed while well known problems of gravitational condensation of infinite distributed cosmic substances are solved on the basis of the proposed statistical model of spheroidal bodies The second section of the book details theoretical and practical approaches to investigating the solar system and other exoplanetary systems In particular it considers a new universal stellar law USL for extrasolar planetary systems connecting the temperature the size and the mass of each star Within the framework of the developed statistical theory a new law generalizing the famous law of O Schmidt for the distribution of planetary in the solar system is also provided

Fred Hoyle's Universe N.C. Wickramasinghe, Geoffrey Burbidge, J.V. Narlikar, 2013-04-18 This volume contains papers presented at an international conference to celebrate Fred Hoyle's monumental contributions to astronomy astrophysics and astrobiology and more generally to humanity and culture The contributed articles highlight the important aspects of his scientific life and show how much of an example and inspiration he has been for over three generations in the 20th century

From Outer Space to Inner Space Dr. Edgar Mitchell, 2023-01-01 The sixth man who walked on the moon shares his journey to the stars into the mind and beyond In February 1971 as Apollo 14 astronaut Edgar Mitchell hurtled Earthward through space he was engulfed by a profound sense of universal connectedness He intuitively sensed that his presence and that of the planet in the window were all part of a deliberate universal process and that the glittering cosmos itself was in some way conscious The experience was so overwhelming Mitchell knew his life would never be the same For the next thirty five years he embarked on another journey an inward exploration of the ineffable mystery of human consciousness and being Mitchell left NASA to form the Institute of Noetic Sciences IONS There he initiated research in areas of study previously neglected by mainstream science and constructed a theory that could explain not only the mysteries of consciousness but also the psychic event what spiritualists call a miracle and scientists dismiss altogether Mitchell also created a new dyadic model of reality revealing a self aware universe not predetermined by the laws of physics preordained by deities or infinitely malleable While human actions are generally subject to the laws of physics these laws are also influenced by the mind From Outer Space to Inner Space traces two remarkable journeys one through space and one through the mind Together they fundamentally alter the way we understand the miracle and mystery of being and ultimately reveal humankind's role in its own destiny Previously published as The Way of the Explorer this edition includes a new

foreword by Avi Loeb an afterword by Dean Radin and a postscript chapter by the author The Way of the Explorer (Easyread Large Bold Edition) Edgar Mitchell, 1996 Astronaut Edgar Mitchell experienced a profound sense of universal connectedness as he returned to Earth from having walked on the moon Since then he has devoted his life to understanding the meaning of that experience investigating its basis both in science and in spirituality **The Way of the Explorer (Volume 2 of 2) (Easyread Super Large 20pt Edition) , The Way of the Explorer (Easyread Super Large 18pt Edition) , The Way of the Explorer, Revised Edition** Dr. Edgar Mitchell, 2008-01-07 In February 1971 as Apollo 14 astronaut Edgar Mitchell hurtled Earthward through space he was engulfed by a profound sense of universal connectedness He intuitively sensed that his presence and that of the planet in the window were all part of a deliberate universal process and that the glittering cosmos itself was in some way conscious The experience was so overwhelming Mitchell knew his life would never be the same *Spirit of Religion* Anab Whitehouse, 2018-11-06 The current volume explores a variety of topical themes within the general field of religion defined as the search for the truth concerning the nature of one's relationship with Being Reality Among the topics explored are Evolution the origins of faith conceptual viruses suffering irreligion the new atheism nihilism sacredness the nature of the self mythology Carl Jung Joseph Campbell free will epistemology and spiritual abuse All of the foregoing topics are critically examined against a backdrop that helps orient the discussion More specifically most human beings wonder in one way or another about the nature of reality that is they seek to deal as best they can with the reality problem The Final Jeopardy challenge refers to the task of trying to work toward providing a best effort final response to the reality problem that resonates with and reflects to varying degrees the character of reality before the sands in the hourglass of time run out in a person's life *Explorations in Medicine, Evolution, and Mind* Anab Whitehouse, 2018-11-06 This book explores a variety of topics in science ranging from Evolution and neurobiology to Cancer research SSRIs the HIV AIDS issue as well as various facets of methodology Whatever your present thoughts might be concerning the foregoing topics after reading *Explorations in Medicine Evolution and Mind* you might be willing to entertain the idea of revising certain aspects of your understanding in relation to the aforementioned areas of research
