Beyond Intellectual Property Darrell Addison Posey, Graham Dutfield, 1996 Cultural property aboriginal people ethnobiology legal status laws Beyond Developmentality Debal Deb, 2009 Local Mediterranean Food Plants and Nutraceuticals Michael Heinrich, Walter Erhard Müller, Claudio Galli, I. Elmadfa, 2006 As a result of domestication considered to be the most important cultural development of the past 13 000 years of human history we depend today on a tiny number of domesticated plant and animal species for our food supply Nevertheless people continue to gather food which grows around their homes or they cultivate local varieties of food plants as well as keep land races of domestic animals Generally wild varieties tend to be richer in micronutrients and bioactive secondary metabolites which are produced in adaptation to local environmental conditions These metabolites trigger further adaptive responses by producing protective bioactive compounds which when ingested result in the transfer of protective effects to our organism The preservation of local

knowledge for future generations as well as the identification of new nutraceuticals by means of characterizing plant extracts with potential health beneficial effects are the main objectives of this book. The first part therefore focuses on the ethnobotanical study of local food plants in selected regions of the Mediterranean i.e. their use as well as beliefs and cultural practices associated with it. The biological pharmacological effects of these plants on selected mostly in vitro targets of the central nervous system and the cardiovascular system make up the second part highlighting the potential of these plants for developing novel health foods, herbal medicines or local products with beneficial effects on health. Those interested in an integrated approach to the identification of new and health beneficial foods will undoubtedly find this book a valuable source of information and an inspiration for new scientific approaches to this age old topic.
