Schwarz, 2023-04-17 The paintings examined and contextualised in this volume are those secured for Giotto through early written sources These sources also help to reconstruct the sequence of his works and artistic inventions as is plausible in the context of media culture in the decades around and after 1300 while Giotto was spiritually and intellectually formed in the sphere of the Florentine Dominicans his artistic path began in Rome in the shadow of the Curia The breakthrough to his own artistic concept came immediately before and during his work in Padua In addition to prominent churchmen ecclesiastical institutions and the King of Naples his clients were predominantly members of Italy's urban and financial elites The adoption and further development of his inventions by other especially Sienese painters pressured him in his later years to try new approaches again **Lorenzo Ghiberti's Gates of Paradise** Amy R. A Documentary History of Art, Volume 1

Elizabeth Gilmore Holt, 2024-05-21 An illuminating one volume compendium of primary documents on the art of medieval and Renaissance Europe This unique collection brings together notebooks letters treatises and contracts dealing with the art of the Middle Ages and Renaissance providing extraordinary insights into the personalities and conditions of the times and revealing the stylistic and philosophical concerns that evolved during these intensively creative eras These documents many of them available here in English for the first time range from Raoul Glaber's famous 1003 treatise on the synthesis of old and new art forms to Durand's essay on Christian symbolism in art and the writings of Leonardo and Durer on anatomy perspective and the recreation of reality They trace how a medieval conception of life that was inspired oriented and dominated by the church evolved gradually into the great reawakening of the Renaissance in which humankind itself assumed primary importance in Western art

Renaissance Vision from Spectacles to Telescopes Vincent Ilardi, 2007 Deals with the history of eyeglasses from their invention in Italy ca 1286 to the appearance of the telescope three centuries later By the end of the 16th century eyeglasses were as common in western and central Europe as desktop computers are in western developed countries today Eyeglasses served an important technological function at both the intellectual and practical level not only easing the textual studies of scholars but also easing the work of craftsmen small business During the 15th century two crucial developments occurred the ability to grind convex lenses for various levels of presbyopia and the ability to grind concave lenses for the correction of myopia As a result eyeglasses could be made almost to prescription by the early 17th century

Romanesque Renaissance Konrad Adriaan Ottenheym, 2021-01-11 In early modern times scholars and architects investigated age old buildings in order to look for useful sources of inspiration They too occasionally misinterpreted younger buildings as proofs of majestic Roman or other ancient glory such as the buildings of the Carolingian Ottonian and Stauffer emperors But even if the correct age of a certain building was known buildings from c 800-1200 were sometimes regarded as Antique architecture since the concept of Antiquity was far more stretched than our modern periodisation allows This was a Europe wide phenomenon The results are rather diverse in style but they all share an intellectual and artistic strategy a conscious revival of an ancient architecture whatever the date and origin of these models

Rosenwein, 2014-01-01 Spanning the period from c 900 to c 1500 and containing primary source material from the European Byzantine and Islamic worlds Barbara H Rosenwein s Reading the Middle Ages Second Edition once again brings the Middle Ages to life Building on the strengths of the first edition this volume contains 24 new readings including 10 translations commissioned especially for this book and a stunning new 10 plate color insert entitled Containing the Holy that brings together materials from the Western Byzantine and Islamic religious traditions Ancillary materials including study questions can be found on the History Matters website www.utphistorymatters.com **Original Treatises, Dating from the XIIth to the XVIIIth Centuries, [o]n the Arts of Painting**, Mary Philadelphia Merrifield, 1849 Imago Musicae, Volume III Tilman Seebass, 1987-06 Each volume in this series for the study of pictorial documents on musical subjects contains articles a catalog published in installments devoted to the complete documentation of specific sources and an annual bibliography that bridges the gap between the bibliographies in art history and musicology The Intellectual Struggle for Florence Arthur Field, 2017-07-21 The Intellectual Struggle for Florence is an analysis of the ideology that developed in Florence with the rise of the Medici during the early fifteenth century the period long recognized as the most formative of the early Renaissance Instead of simply describing early Renaissance ideas this volume attempts to relate these ideas to specific social and political conflicts of the fifteenth century and specifically to the development of the Medici regime It first shows how the Medici party came to be viewed as fundamentally different from their opponents the oligarchs then explores the intellectual world of these oligarchs the traditional culture As political conflicts sharpened some humanists Leonardo Bruni and Francesco Filelfo with close ties to oligarchy still attempted to enrich traditional culture with classical learning while others such as Niccol Niccoli and Poggio Bracciolini rejected tradition outright and created a new ideology for the Medici party What is striking is the extent to which Niccoli and Poggio were able to turn a Latin or classical culture into a popular culture and how the culture of the vernacular remained traditional and oligarchic
