Lost Art Of Caring A Challenge To Health Professionals Families Communities And Society:

The Lost Art of Caring Leighton E. Cluff, Robert H. Binstock, 2003-05-01 In *The Lost Art of Caring* Leighton E Cluff M D and Robert H Binstock Ph D bring together experts to address the importance of caring the reasons why it has eroded and measures that can strengthen caring as provided by health professionals families communities and society *Aging and Caring at the Intersection of Work and Home Life* Anne Martin-Matthews, Judith E. Phillips, 2010-10-18 There are not many books that address the boundaries of care of older people from a work life perspective This book authored by contributors from various countries looks at the boundaries of care by looking at private and public help professional and personal help and paid and unpaid caregivers It captures and conceptualizes the complexity of the intersection of work and home life as it relates to the provision of assistance and support to older relatives in a variety of care work contexts It explores these issues within a critical framework rather than from an assumed stress or burden perspective which dominates current texts on the topic Readers of this volume will gain a deeper understanding of issues of care provision amongst networks of careers and helpers and of the particular dynamics of care when it is episodic or framed by constraints of space and time as a result of geography In addition each chapter addresses issues of diversity with sensitivity to gender race and ethnicity This book will be of use to academics and graduate students in Gerontology Family Studies IO psychology Gender Studies and Sociology

Let Me Heal Kenneth M. Ludmerer, 2014-09-01 In *Let Me Heal* prize winning author Kenneth M Ludmerer provides the first ever account of the residency system for training doctors in the United States He traces its development from its nineteenth century roots through its present day struggles to cope with new bureaucratic work hour regulations for house officers and more important to preserve excellence in medical training amid a highly commercialized health care system *Let Me Heal* provides a highly engaging richly contextualized account of the residency system in all its dimensions It also brilliantly analyzes the mutual relationship between residency education and patient care in America The book shows that the quality of residency training ultimately depends on the quality of patient care that residents observe but that there is much that residency training can do to produce doctors who practice in a better more affordable fashion *Let Me Heal* is both a stunning work of scholarship and a highly engaging account of how one becomes a doctor in the United States It is indispensable reading for those who wish to understand what it means to learn and practice medicine and what is needed to make medical education and patient care in America better The definitive work on the subject it is destined to become a classic that will be consulted by readers far into the future **The Cultures of Caregiving** Carol Levine, Thomas H.

Murray, 2004-05-21 Publisher Description The Ethics of Managed Care: Professional Integrity and Patient Rights W.B. Bondeson, J.W. Jones, 2013-03-09 in the culture of medicine and they saw their mission as a generation of profit for stockholders not necessarily medical care for clients Cost effective medicine was the goal in the context of a profit making enterprise Although preventive health care programs were promised very few were realized and they were not nearly

comprehensive The definition of unnecessary testing slowly expanded to mean virtually any high cost test requiring the service of a medical specialist and low priced generalist physicians with limited diagnostic and therapeutic skills were made available to patients with the instruction they should limit their access to high cost specialists Managed care organizations tended to reward primary care physicians who avoided specialty referrals and severed contracts with those who persisted in sending their patients to outside consultants Most notoriously managed care organizations maintained veto authority over the provision of complex and expensive care and that veto was often wielded in defiance of a physician's recommendation by managed care employees without medical training or experience Managed care did indeed slow the rate in increase of medical costs but not without limitations on the care provided to patients and the professional integrity of physicians Managed care organizations were so successful that they could provide extremely high salaries to their executives even in the context of limiting cost and care It is these developments that the papers of this symposium addressed The most fundamental ethical issue is posed in the first paper by Dr Challenges of an Aging Society Rachel Pruchno, Michael A. Smyer, 2007-09-10 In this important and timely collection some of the best minds in gerontology and bioethics including Nancy Dubler Rick Moody Andrew Achenbaum Robert Hudson and Robert Binstock explore the ethical social and political challenges of an aging society A unique combination of disciplines and perspectives from economics to nursing psychology to theology this valuable synthesis of theory and practice provides frameworks and analyses for considering the ethical issues of both individual and societal aging The contributors address the major policy challenges of Social Security Medicare and prescription drugs as well as ethical issues ranging from individual autonomy to family responsibility to distributive justice Specific topics covered include end of life decision making family relations across generations age based intergenerational policies and the reform of Social Security Contributors W Andrew Achenbaum Ph D University of Houston Houston Vern L Bengtson Ph D University of Southern California Los Angeles Robert H Binstock Ph D Case Western Reserve University Christine E Bishop Ph D Brandeis University Thomas R Cole Ph D University of Texas Medical School at Houston Peter A Diamond Ph D Massachusetts Institute of Technology Nancy Neveloff Dubler LL B Albert Einstein College of Medicine Msgr Charles J Fahey Fordham University Lucy Feild Ph D R N Partners Human Research Quality Improvement Program Martha B Holstein Ph D DePaul University Robert B Hudson Ph D Boston University Eric R Kingson Ph D Syracuse University Ronald J Manheimer Ph D University of North Carolina at Asheville Kyriakos S Markides Ph D University of Texas Medical Branch Daniel C Marson J D Ph D University of Alabama at Birmingham H Rick Moody Ph D AARP Peter R Orszag Ph D Brookings Institution Rachel Pruchno Ph D University of Medicine and Dentistry of New Jersey School of Osteopathic Medicine Norella M Putney Ph D University of Southern California Los Angeles Michael Smyer Ph D Boston College Bruce Stuart Ph D University of Maryl Melanie A Wakeman Ph D California State University Los Angeles Steven P Wallace Ph D University of California at Los Angeles John B Williamson Ph D Boston College Meeting the Challenge of Chronic Illness Robert L. Kane, Reinhard

Priester, Annette M. Totten, 2005-12-21 Chronic conditions such as arthritis heart disease and Parkinson disease are the principal cause of all sickness and death in the United States and represent the vast majority of health care expenditures Although we now live in a world dominated by chronic conditions health care is still organized around a commitment to treating acute illnesses Meeting the Challenge of Chronic Illness examines current deficiencies in chronic illness care and explores ways to improve it Addressing the challenges of shifting from the primacy of acute illnesses to the predominance of chronic conditions the authors identify the components necessary to reorganize and reform health care properly prepared health care workers involved patients and families appropriate use of new technologies especially information systems an appropriate role for prevention and the creation of funding approaches that will provide necessary incentives This book calls on policy makers health care providers and educators to address one of the greatest challenges facing the health care system

John C. Burnham, 2015-05-15 A comprehensive history of sickness health and medicine in America from Colonial times to the present In Health Care in America historian John C Burnham describes changes over four centuries of medicine and public health in America Beginning with seventeenth century concerns over personal and neighborhood illnesses Burnham concludes with the arrival of a new epoch in American medicine and health care at the turn of the twenty first century From the 1600s through the 1990s Americans turned to a variety of healers practices and institutions in their efforts to prevent and survive epidemics of smallpox yellow fever cholera influenza polio and AIDS Health care workers in all periods attended births and deaths and cared for people who had injuries disabilities and chronic diseases Drawing on primary sources classic scholarship and a vast body of recent literature in the history of medicine and public health Burnham finds that traditional healing care and medicine dominated the United States until the late nineteenth century when antiseptic aseptic surgery and germ theory initiated an intellectual social and technical transformation He divides the age of modern medicine into several eras physiological medicine 1910s 1930s antibiotics 1930s 1950s technology 1950s 1960s environmental medicine 1970s 1980s and beginning around 1990 genetic medicine The cumulating developments in each era led to today s radically altered doctor patient relationship and the insistent questions that swirl around the financial cost of health care Burnham s sweeping narrative makes sense of medical practice medical research and human frailties and foibles opening the door to a new understanding of our current concerns
