Buildings in Wood Will Pryce,2005 From the very beginning of architecture long before the invention of masonry buildings were constructed of wood With its unique qualities of form color and structure wood is the most reliable building material at the core of architecture This epic history is the first comprehensive survey of the use of wood in architecture throughout the ages The book is organized both chronologically and geographically It surveys works from the oldest heritage of wooden buildings Kyoto s Buddhist temples and Scandinavia s pagan inspired stave churches to the latest cutting edge designs proving that wood is on the rise as the preferred material in these ecologically conscious times No region of the world with a native tradition of building with wood is left out In North America the book demonstrates the European origins of New England s clapboards and saltboxes and later shows how such sophisticated California architects as Greene Greene or Bernard Maybeck could blend age old traditions of the Far East and Switzerland with a Pacific Coast sense of novelty and whimsy Spectacular and diverse photographs highlight the architectural masterpieces of wooden architecture throughout the world illustrating that wood is a building material with a deep history as well as a vibrant future The complete camper guide for Norway YouGuide Ltd, **A History of Norwegian Literature** Harald S. N•ss,1993-01-01 Volume 2 **Sacred Power, Sacred Space** Jeanne Halgren Kilde,2008-07-21 Jeanne Halgren Kilde s survey of church architecture is unlike any other Her main concern is not the buildings themselves but rather the dynamic character of Christianity and how church buildings shape and influence the religion Kilde argues that a primary function of church buildings is to represent and reify three different types of power divine power or ideas about God personal empowerment as manifested in the individual s perceived relationship to the divine and social power meaning the relationships between groups such as clergy and laity Each type intersects with notions of Christian creed cult and code and is represented spatially and materially in church buildings Kilde explores these categories chronologically from the early church to the twentieth century She considers the form organization and use of worship rooms the location of churches and the interaction between churches and the wider culture Church buildings have been integral to Christianity and Kilde s important study sheds new light on the way they impact all aspects of the religion Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice church buildings are in Kilde s view dynamic participants in religious change and goldmines of information on Christianity itself **Norwegian Literature** ,1993 **Architectural Publications Index** ,1996 Astri, My Astri Deb Nelson Gourley,2004 The Norseman ,1993 **News of Norway** ,1991 **Architectural Conservation and Restoration in Norway and Russia** Evgeny Khodakovsky,Siri Lexau,2017-09-07 Norway and Russia have been closely related through the ages both geographically and historically and have experienced similar problems relating to climate

building maintenance and national wooden architecture As a result the parallel study of architectural conservation and restoration theories and practices in both neighbouring Northern states makes for a stimulating collective monograph Architectural Conservation and Restoration in Norway and Russia delves into the main challenges of historic and contemporary architectural preservation practices in the two countries The book consists of three main parts the discovery and preservation of historical architecture in the late nineteenth to early twentieth century contemporary approaches to former restorations and the conservation and maintenance of historical architecture and finally current questions concerning preservation of twentieth century architectural heritage which due to different building technologies and artistic qualities demand revised methods and historical evaluation This is a valuable resource for academics researchers and students in different areas of architecture medieval nineteenth century wooden and contemporary architecture as well as in the fields of art architectural history cultural heritage and Scandinavian and Russian studies **Library of Congress Subject**
