**Proceedings of the 2024 3rd International Conference on Information Economy, Data Modelling and Cloud Computing (ICIDC 2024)** Evan Poh Hock Lau, Aslina Baharum, Ali Hussein Wheeb, Lei Chen, 2024-08-30 This is an open access book ICIDC 2024 is to bring together innovative academics and industrial experts in the field of Information Economy Data Modeling and Cloud Computing research to a common forum The primary goal of the conference is to promote research and developmental activities in Information Economy Data Modeling and Cloud Computing research and another goal is to promote scientific information interchange between researchers developers engineers students and practitioners working all around the world The conference will be held every year to make it an ideal platform for people to share views and experiences in Information Economy Data Modeling and Cloud Computing research and related areas 2024 3rd International Conference on Information Economy Data Modeling and Cloud Computing ICIDC 2024 is scheduled to be held in Dalian China from June 21 23 2024 Big

data provides rich resources for modeling in the economic field Through data modeling we can obtain the dynamic change trend of various indicator data analyze the relationship between elements in the process of related economic activities and can reveal the relationship that is difficult to show by traditional technology Therefore how to use big data information to model and study the development trend of economic operation plan is of great significance This conference will continue to focus on the application of big data in the economic field and conduct more in depth research in combination with cloud computing

**Enterprise Modeling** Kurt Sandkuhl, Janis Stirna, Anne Persson, Matthias Wißotzki, 2014-09-15 Enterprise modeling EM methods and techniques are indispensable for understanding the present situation of an enterprise and for preparing for its future particularly in times of continuous organizational change an increasing pace of innovation new market challenges or technology advances The authors combine a detailed description of the 4EM methodology with their concrete experience gathered in projects Their book addresses the modeling procedure modeling language and modeling practices in a uniquely integrated approach It provides practical advice on common challenges faced by enterprises and offers a flexible EM method suitable for tackling those challenges Much of the work presented stems from actual research projects and has been validated with scientific methods The 4EM methodology has proven its practical value in a large number of successful development and or change management projects in industry and the public sector The book was written for anyone who wants to learn more about EM with a specific focus on how to do it in practice and or how to teach it Its main target audience thus includes instructors in the field of EM or business information systems students in Information Systems or Business Administration and practitioners working in enterprise or change management The authors describe a clear reading path for each of these audiences and complement the work with a set of slides and further teaching material available under [www.4emmethod.com](http://www.4emmethod.com)

**Fundamentals of Production Logistics** Peter Nyhuis, Hans-Peter Wiendahl, 2008-09-19 At last here is what logistics researchers have been waiting for a book that comprehensively encapsulates for the first time the fundamentals of modeling Logistic Operating Curves for production and storage processes The text includes information on how they can be derived and calculated based on standard operating data In doing so the authors clearly demonstrate the mutual dependencies between the often contradictory logistic objectives i e on the one hand low throughput times and high delivery reliability and on the other hand low WIP levels and high rates of utilization Moreover they also explain how these objectives can be improved using the Logistic Operating Curve Theory and why this method thus provides an interesting alternative to simulations

**Products and Services** Igor Fuerstner, 2010-11-02 Today s global economy offers more opportunities but is also more complex and competitive than ever before This fact leads to a wide range of research activity in different fields of interest especially in the so called high tech sectors This book is a result of widespread research and development activity from many researchers worldwide covering the aspects of development activities in general as well as various aspects of the practical application of knowledge

*The Practice of Enterprise Modeling* Janis Grabis, Marite Kirikova, Jelena Zdravkovic, Janis Stirna, 2013-11-01 This volume constitutes the proceedings of the 6th IFIP WG 8.1 Conference on the Practice of Enterprise Modeling held in November 2013 in Riga Latvia The focus of the PoEM conference series is on advances in the practice of enterprise modeling through a forum for sharing knowledge and experiences between the academic community and practitioners from industry and the public sector The 19 papers accepted were carefully reviewed and selected from 80 submissions They reflect different topics of enterprise modeling including quality of models change management and transformation approaches and tools for agility and flexibility enterprise modeling and business processes enterprise modeling and information systems and enterprise modeling cases Additionally one of the two keynotes is also included in this volume      **Information Systems: Modeling, Development, and Integration**

Jianhua Yang, Athula Ginige, Heinrich C. Mayr, Ralf-D. Kutsche, 2009-04-17 UNISCON 2009 United Information Systems Conference was the third conference in the series that is based on the idea to pool smaller but highly interesting scientific events on information systems into one large conference Here people from different scientific backgrounds can present their research results share their ideas and discuss future trends in these various areas UNISCON 2009 was held in Sydney Australia in the University of Western Sydney Campbelltown Campus In 2009 the following scientific events were held under the umbrella of UNISCON 2009 the 8th International Conference on Information Systems Technology and Its Applications ISTA 2009 the 8th International Workshop on Conceptual Modelling Approaches for e-Business eCOMO 2009 Second Workshop on Model Based Software and Data Integration MBSDI 2009 We received 115 papers for the three events Papers were submitted from over 25 countries After a rigorous review process 39 papers were accepted as full papers

and 14 papers as short papers for presentation at the conference and published in these proceedings In addition to the above three events we also organized a Doctoral Consortium to provide a forum for doctoral students to get feedback from experts in the area about their research projects

**PRODUCTION PLANNING AND CONTROL** S.K. MUKHOPADHYAY, 2015-02-26

This comprehensive and up to date text now in its Third Edition describes how the latest techniques in production planning and control are applied to contemporary industrial setups so as to meet the ever increasing demands in industrial organizations for better quality of services for faster delivery of products and for adapting to the rapid changes taking place in the industrial scenario With the demands in the industrial arena increasingly tending to be lumpy the most effective strategy for planning and controlling production processes cannot be a static preconceived one Instead it is one that is flexible and is capable of adapting to the erratic changes in demand patterns Evolving such a strategy requires more of practical skill than mere theoretical knowledge of the subject This book explores the demands of the present day industrial environment and the techniques for addressing these demands through a number of case studies drawn from Indian industries The efficacy of various planning strategies the methods for implementing them and their suitability for different industries have been clearly explained in relation to these cases While the essentials of theory have been covered in a simple and straightforward style the stress is on developing the practical skills required to tackle the unpredictable problems and the unforeseen demands that pose a formidable challenge to modern industries The book places emphasis as much on the principles of heuristic techniques as on the systematic approach to production planning This book would serve as a useful textbook to postgraduate students of management as well as undergraduate students of industrial engineering It will be equally useful to the teaching community and the practicing professionals NEW TO THE THIRD EDITION Includes a new chapter on Agile Manufacturing A Contemporary Manufacturing Syndrome Chapter 11 Provides several references to explore more in the field KEY FEATURES Gives solved problems that serve as numerical illustrations of the theoretical concepts The Case Studies given focus on the Indian scenario these will be of great practical value to students and professionals alike Offers substantial coverage of the modern heuristic methods the Kanban system and the ERP techniques

Operations Research: Introduction To Models And Methods Richard Johannes Boucherie, Henk Tijms, Aleida

Braaksma, 2021-10-26 This attractive textbook with its easy to follow presentation provides a down to earth introduction to operations research for students in a wide range of fields such as engineering business analytics mathematics and statistics computer science and econometrics It is the result of many years of teaching and collective feedback from students The book covers the basic models in both deterministic and stochastic operations research and is a springboard to more specialized texts either practical or theoretical The emphasis is on useful models and interpreting the solutions in the context of concrete applications The text is divided into several parts The first three chapters deal exclusively with deterministic models including linear programming with sensitivity analysis integer programming and heuristics and network analysis The next

three chapters primarily cover basic stochastic models and techniques including decision trees dynamic programming optimal stopping production planning and inventory control The final five chapters contain more advanced material such as discrete time and continuous time Markov chains Markov decision processes queueing models and discrete event simulation Each chapter contains numerous exercises and a large selection of exercises includes solutions

**Advances in Production Management Systems. Smart Manufacturing and Logistics Systems: Turning Ideas into Action** Duck Young Kim, Gregor von Cieminski, David Romero, 2022-09-16 This two volume set IFIP AICT 663 and 664 constitutes the thoroughly refereed proceedings of the International IFIP WG 5.7 Conference on Advances in Production Management Systems APMS 2022 held in Gyeongju South Korea in September 2022 The 139 full papers presented in these volumes were carefully reviewed and selected from a total of 153 submissions The papers of APMS 2022 are organized into two parts The topics of special interest in the first part included AI Smart Manufacturing Simulation Service Systems Design Engineering Industrial Digital Transformation Sustainable Production Management and Digital Supply Networks The second part included the following subjects Development of Circular Business Solutions and Product Service Systems through Digital Twins Farm to Fork Production Management in Food Supply Chains Urban Mobility and City Logistics Digital Transformation Approaches in Production Management Smart Supply Chain and Production in Society 5.0 Era Service and Operations Management in the Context of Digitally enabled Product Service Systems Sustainable and Digital Servitization Manufacturing Models and Practices for Eco Efficient Circular and Regenerative Industrial Systems Cognitive and Autonomous AI in Manufacturing and Supply Chains Operators 4.0 and Human Technology Integration in Smart Manufacturing and Logistics Environments Cyber Physical Systems for Smart Assembly and Logistics in Automotive Industry and Trends Challenges and Applications of Digital Lean Paradigm

provide better service to the customers through faster response higher quality and lowered costs Lean is often described as eyes for flow and eyes for muda philosophy It simply means that value is created only when all the resources flow through the system If the flow is stopped no value but only costs and time are added which is muda Jap waste Since the philosophy was born at the Toyota many solutions were tailored for the high volume environment But in turbulent fast changing market environment and progressing globalization customers tend to require more customization lower volumes and higher variety at much less cost and of better quality This calls for adaptation of existing lean techniques and exploration of the new waste free solutions that go far beyond manufacturing This book brings together the opinions of a number of leading academics and researchers from around the world responding to those emerging needs They tried to find answer to the question how to move forward from Spaghetti World of supply production distribution sales administration product development logistics accounting etc Through individual chapters in this book authors present their views approaches concepts and developed tools The reader will learn the key issues currently being addressed in production management research and practice throughout the world

**Cooperative Design of Manufacturing Systems in SMEs** Dörte Bastian-Köpp, 2009 Planning and improving of production systems and manufacturing processes is a most complex task in engineering In small and medium sized enterprises SME s it is usually carried out by a group of enterprise planners from different departments within a planning project The main issue of this research is to overcome the logical and technical boundaries between the highly interrelated modelling experts and their specific modelling tools and partial planning models as well as to efficiently coordinate their distributed cooperative planning tasks Therefore a methodical integration concept as well as a groupware based cooperation concept was developed Now it is possible to combine the large number of sophisticated modelling tools factory simulators as well as GPM tools and to guarantee a seamless planning process The conceptual ideas were implemented in a prototypical toolbox to show the technical realization of the flexible concepts for integration and cooperation support Back cover
