Europe Gerhard Besier, 2019-02-01 The religious association of Jehovah s Witnesses has existed for about 150 years in Europe How Jehovah s Witnesses found their way in these countries has depended upon the way this missionary association was treated by the majority of the non Witness population the government and established churches In this respect the history of Jehovah s Witnesses in Europe is also a history of the social constitution of these countries and their willingness to accept and integrate religious minorities Jehovah s Witnesses faced suppression and persecution not only in dictatorships but also in some democratic states In other countries however they developed in relative freedom How the different situations in the various national societies affected the religious association and what challenges Jehovah s Witnesses had to overcome and still do in part even until our day is the theme of this history volume *Justice and Technology in Europe: How ICT Is Changing the Judicial Business* Marco Fabri, Francesco Contini, 2001-10-31 Like systems and procedures in most areas of modern society the functioning of courts throughout the world has been enormously affected by information and communication technologies ICT It has become crucial for lawyers to keep pace with technical changes in judicial systems especially in international cases where an understanding of procedural variations from one system to another could spell the difference between success and failure This immensely valuable book has been written by experts who in various ways have actually been engaged in the planning and implementation of ICT in the courts of their respective countries To ensure information that is as homogeneous as possible and to facilitate cross border comparisons the authors have followed a common and detailed blueprint which includes a brief description of the judicial system under discussion The papers were originally prepared for presentation at the first European Seminar on Court Technology held in September 2000 at the Research Institute on Judicial Systems IRSIG CNR in Bologna Italy The Seminar brought together delegates from the fifteen member countries of the European Union the Court of Justice of the European Communities Norway Venezuela and The World Bank to discuss topics related to court technology Overall the book offers an in depth up to date overview of

methodology difficulties encountered and results so far achieved in the implementation of ICT in the European judicial systems Specific areas of court technology covered include case management systems electronic filing and electronic data interchange Although the emphasis is on EU Member States a general overview of ICT applications in some Latin American judiciaries is also provided Justice and Technology in Europe will be of great practical value to policy makers judges judicial personnel lawyers and ICT experts as well as to judicial administration scholars interested in ICT in the judicial systems and on the strategy and governance established to increase its diffusion
