Promising Practices for Engaging Families in Literacy Holly Kreider, Diana Hiatt-Michael, Margaret Caspe, 2013-03-01 sponsored by the Family School Community Partnership Issues SIG Promising Practices for Engaging Families in Literacy fulfills the need from parents and teachers to improve home school assistance in every child's literacy development. Literacy skills are required and valued in all academic areas and at all levels of education from preschool through adulthood. This volume provides suggestions and support to improve parent-child involvement in literacy activities from preschool through teacher education programs. Research is provided to undergird the documented practices that increase student academic achievement through improved literacy skills across academic areas. Practices include connections between home and school across age groups, developmental needs, groups, universities, community groups, and technologies.

Educational and Industrial Television, 1974 *The USDLA Funding Sourcebook for Distance Learning and Educational Technology* Arlene Krebs, 1991 **Resources in Education**, 2001-04 *Public Accounts of the Province of Ontario* Ontario. Provincial Auditor, 1922 *Innovations in Educational Ethnography* George Spindler, Lorie Hammond, 2012-10-12 This volume focuses on and exemplifies how ethnography, a research tool devoted to looking at human interaction as a cultural process rather than individual psychology, can shed light on educational processes framed by the complex internationalized societies in which we live today. Part I offers theoretical chapters about ethnography and examples of innovative ethnography from particular perspectives. In Part II the emphasis is on the application of ethnographic approaches to educational settings. Each contribution not only takes the reader on a thoughtful and enlightening journey but raises issues that are important to both educators and ethnographers, including the relationship of researcher to subject, the meaning of participant in participant observation, and ways to give voice to disenfranchised players and on the complex ways in which all parties experience identities such as race in the modern world. *Innovations in Educational Ethnography: Theory, Methods, and Results* is a product of both continuity and change. It presents current writings from mentors in the field of ethnography and education as well as the work of their students and of educators engaged in cultural studies of their work. In many ways it provides fresh new vistas on the old questions that have always guided ethnographic research and can be used as a survey both of what ethnography has been and what it is becoming. This book is the work of many hands and provides excellent examples of trends in both basic and applied ethnography of education. These two kinds of work augment and reinforce each other and also represent important current research directions in depth reflection on the process of ethnography itself and an application of its insights to teaching and learning in schools, universities, and communities. No one philosophy guides the contributions to this volume; nor were they chosen as exemplary of a particular approach; yet foundational understandings and principles of ethnography shine through the work in both predictable and unexpected ways.
