The Cambridge Handbook of Policing in the United States Tamara Rice Lave, Eric J. Miller, 2019-07-04 A comprehensive collection on police and policing written by experts in political theory sociology criminology economics law public health and critical theory **Strategies and Responses to Crime** Melchor de Guzman, Aideo Mintie Das, Dilip K. Das, 2011-10-17 Every year esteemed scholars and practitioners meet at the International Police Executive Symposium to discuss contemporary issues in policing and share ideas about effective strategies in their jurisdictions Drawn from the proceedings at the Thirteenth Annual Meeting held in Turkey and updated with new developments since the conference Strategi The ABC of the OPT Orna Ben-Naftali, Michael Sfard, Hedi Viterbo, 2018-05-10 Israel's half a century long rule over the West Bank and Gaza Strip and some of its surrounding legal issues have been the subject of extensive academic literature Yet to date there has been no comprehensive theoretically informed and empirically based academic study of the role of various legal mechanisms norms and concepts in shaping legitimizing and responding to the Israeli control regime This book seeks to fill this gap while shedding new light on the subject Through the format of an A-Z legal lexicon it critically reflects on challenges and redefines the language knowledge and practices surrounding the Israeli control regime Taken together the entries illuminate the relation between global and local forces legal political and cultural in Israel and Palestine The study of the terms involved provides insights that are relevant to other situations elsewhere in the world particularly with regard to belligerent occupation the law's role in relation to state violence and justice *War Against the People* Jeff

Halper, 2015-09-20 Shortlisted for the Palestine Book Awards 2016 Modern warfare has a new form The days of international combat are fading So how do major world powers maintain control over their people today This book is a disturbing insight into the new ways world powers such as the US Israel Britain and China forge war today It is a subliminal war of surveillance and whitewashed terror conducted through new high tech military apparatuses designed and first used in Israel against the Palestinian population Including nano technology hidden camera systems information databases on civilian activity automated targeting systems and unmanned drones it is used to control the very people the nation s leaders profess to serve Jeff Halper reveals that this practice is much more insidious than was previously thought As Western governments claw back individual liberties War Against the People is a reminder that fundamental human rights are being compromised for vast sections of the world and that this is a subject that should concern everyone International Perspectives on Terrorist Victimisation J. Argomaniz, O. Lynch, 2015-01-15 Considering an under researched dimension of political violence this interdisciplinary collection provides an extensive examination of terrorist victimisation It explores how individual and public experiences of victimisation are constructed and how they are shaped by existing dynamics of violence The Global City 2.0 Kristin Ljungkvist, 2015-08-27 Global cities all over the world are taking on new roles as they increasingly participate directly and independently in international affairs and global politics So far surprisingly few studies have analyzed the role of the Global City beyond its already well explicated role in the globalized economy How is it that local governments of Global Cities claim international political authority and develop what appears to be their own independent foreign and security policies despite the fact that such policy areas have traditionally been considered to be the core function of nation states and central governments What does it mean to be and to govern the contemporary Global City In this book Kristin Ljungkvist claims that we can better understand why local governments find it to be in their Global City s interest to claim international political authority by exploring how the city s role in the globalized world is constructed and narrated locally A core claim is that Global City hood as a specific type of collective identity can play a constitutive part in such interest formation Combining insights from International Relations and Urban Studies scholarship and with the help of a case study on New York City Ljungkvist develops a new analytical framework for studying the Global City as an international political actor The Global City 2.0 shows that even as the Global City engages in various global issues such as global environmental governance or counterterrorism such pursuit will be framed and rationalized in terms of the city s economic growth The quest for growth and global competitiveness are not necessarily the only available meanings attached to the being and governing of the contemporary Global City However there seems to be a remarkable persistency and attraction in economic ideas and an economic conception of the Global City **Latinos and Criminal Justice** José Luis Morín, 2016-03-28 This unique compilation of essays and entries provides critical insights into the Latino a experience with the U S criminal justice system Concerns about immigration s relationship to crime make accurate information and critical analysis of the utmost importance

Latinos and Criminal Justice An Encyclopedia promotes understanding of Latinas and Latinos and the U S criminal justice system at the same time dispelling popular misconceptions about this population and criminal activity in the United States Unlike a traditional encyclopedia comprised solely of A Z entries this work consists of two parts Part I offers detailed essays on particularly important topics Part II provides brief A Z entries Topics are crossreferenced to enable easy research Among the wide range of topics covered are policing and police misconduct incarceration the war on drugs gangs border crime and racial profiling Historically important issues and events relative to the Latino experience of criminal justice in the United States are also included as are key legal cases

Passavant,2021-06-28 In Policing Protest Paul A Passavant explores how the policing of protest in the United States has become increasingly hostile since the late 1990s moving away from strategies that protect protesters toward militaristic practices designed to suppress protests He identifies reactions to three interrelated crises that converged to institutionalize this new mode of policing the political mobilization of marginalized social groups in the Civil Rights era that led to a perceived crisis of democracy the urban fiscal crisis of the 1970s and a crime crisis that was associated with protests and civil disobedience of the 1960s As Passavant demonstrates these reactions are all haunted by the figure of black insurrection which continues to shape policing of protest and surveillance notably in response to the Black Lives Matter movement Ultimately Passavant argues this trend of violent policing strategies against protesters is evidence of the emergence of a post democratic state in the United States

European Journal of Policing Studies ,2018-07-31 Contents Introduction Antoinette Verhage Lieselot Bisschop and Wim Hardyns br Articles How to Police a Porous Fortress Monica den Boer 1 Abstract The purpose of this article is to provide an overview of the way in which the European Union has gradually but steadily built a security architecture based on the control

of mobility and borders Different logics of policing are interwoven in several projects which are strongly interdependent with technological innovation Furthermore the European policing of mobility is primarily performed by mounting surveillance both inside and beyond European borders by means of which all forms of movement transactions travelling etc are subjected to intensive monitoring by multiple actors who are interlinked through strategies and systems The main finding is that border policing is shifting in a fundamental way from fixed to fluid from territorial to virtual and from physical to technological Hence paradoxically though mobility is strongly promoted as one of the main virtues of the European Union Europe's precautionary protection may be at ill ease with the free movement of people The article seeks to stimulate the knowledge and debate about deeper shifts in Europe's security apparatus and develops this from a law enforcement perspective

Abstract In the German speaking academic world Police Science Polizeiwissenschaft is a fairly new and little known area of social science Accordingly the academic status of police science is anything but firmly established but rather at a hybrid stage of development The very combination of policing and academic study research seems to remain largely incompatible not only to police managers but also to main stream sociology German police science differs substantially from the Anglo American Australian approach One main difference pertains to legal traditions others are due to historical and cultural developments that will be taken up in this descriptive essay However Anglo American Australian police theories have a lot to offer to German and European police scientists and this will be demonstrated For a future common approach to an evolving European police science similar descriptions will be required from other European countries to establish a comparative foundation of joint EU police studies Some of the principal dimensions of such a comparison will be sketched in this essay It concludes with a presentation of empirically based police studies carried out by instructors and Master students at the newly founded German Police University in Münster Topics are media coverage of clashes between police and demonstrators a typology of third party intervention in cases of assault in public places and COREPOL EU FP7 a comparative security research project aiming at an improvement of police minority relations through means of restorative justice programs
