

SIDE EFFECTS OF A SEDENTARY LIFESTYLE

DIGESTIVE ISSUES

Sitting down compresses the abdomen and slows down digestion, which can cause constipation – when stools become dry, hard, and difficult to pass.

POOR MENTAL HEALTH

Sitting down for extended periods of time can decrease a person's motivation and make it difficult for them to manage symptoms of anxiety and depression.

POOR CIRCULATION

When you sit a lot, the heart isn't given a chance to pump blood around the body efficiently, which allows waste products to build up and slow cell regeneration.

BONE MASS LOSS

When you sit a lot, you stop loading your skeletal system with stimulus, which makes the bones weak and more prone to fractures.
