Seeing Century Film Vision And Identity:

The Seeing Century, 2021-10-25 The twentieth century with all its turbulence and change its conflicts and its discoveries was perhaps above all the century of cinema and The Seeing Century offers an innovative international and interdisciplinary exploration of the role cinema plays in contemporary life and culture and the complex and fascinating relationship between screen images and our changing concepts of personal and national identity Rejecting the compartmentalisation that has traditionally marked film studies and confronting an impressively eclectic range of material fifteen essays by leading academics from around the world cut across divergent cultures languages and genres mainstream Hollywood rubs shoulders with low budget Icelandic or Sicilian cinema and the popular and the esoteric feature alongside each other In this way the reader is offered a stimulating overview which directly addresses the contradictions and ambiguities inherent in the relationship between film and identity and reveals the vibrancy of contemporary film debate to which The Seeing Century makes an important and thought provoking contribution

Terence Davies Wendy Everett, 2004-09-04 Terence Davies has made some of the most innovative harrowing and hauntingly lyrical films of the contemporary era This first ever book length study of his work combines detailed analysis of all his films with a persuasive and stimulating investigation of key filmic issues of time and memory identity and selfhood and the nature of literary adaptation as well as a previously unpublished interview with Davies himself The book demonstrates that Davies s films successfully subvert traditional division between popular culture and art house cinema Gardner explores not only Davies s debt to social realism the British Documentary movement and Ealing comedies but equally to the European auteur tradition and to the great Hollywood musicals and melodramas that continue to inspire him It provides fresh insight into the centrality of music in Davies s work and into his conviction that film itself is closer to music than to any other art form

The Geschlecht Complex Oscar Jansson, David LaRocca, 2022-01-13 The polysemous German word *Geschlecht* denoting gender genre kind kinship species race and somehow also more exemplifies the most

pertinent questions of the translational transdisciplinary transhistorical and transnational structures of the contemporary humanities What happens when texts objects practices and concepts are transferred or displaced from one language tradition temporality or form to another What is readily transposed what resists relocation and what precipitate emerges as distorted or new Drawing on Barbara Cassin s transformative remarks on untranslatability and the activity of philosophizing in languages scholars contributing to *The Geschlecht Complex* examine these and other durable queries concerning the ontological powers of naming and do so in the light of recent artistic practices theoretical innovations and philosophical incitements Combining detailed case studies of concrete category problems in literature philosophy media cinema politics painting theatre and the performing arts with a range of indispensable excerpts from canonical texts by notable field defining thinkers such as Apter Cassin Cavell Derrida Irigaray Malabou and Nancy among others the volume presents the *Geschlecht* complex as a condition to become aware of and in turn to companionably underwrite any interpretive endeavor Historically grounded yet attuned to the particularities of the present the *Geschlecht* complex becomes an invaluable mode for thinking and theorizing while ensconced in the urgent immediacy of pressing concerns and poised for the inevitable complexities of categorial naming and genre discernment that await in the so often inscrutable translation resistant twenty first century

Benjamin Studien Helga Geyer-Ryan, 2002 The first volume of Benjamin Studies publishes the keynote lectures of the first Congress of the International Walter Benjamin Association which took place in Amsterdam July 1997 Its title bears witness to the most central concepts of Benjamin s philosophy of culture Strongly influenced as he was by Kant Benjamin never lost his inclination to analyse the components of reality as fashioned by ourselves Because he was also a materialist for him the modes of fashioning were shaped in turn by the times and places we occupy in history As a consequence Benjamin s theory assigns a pivotal role in the interaction between the world and its inhabitants to the media language with its plethora of discourses the arts and the whole technology of reproduction The historical and social development of the media is translated according to him into our instruments of perception and this perception constructs the elements of the world the knowledge of this construction and the knowledge of the constructor The self knowledge of the constructor is what we call experience Within this broad epistemological framework the diversity and complexity of Benjamin s project acquires a fundamental coherence and is therefore able to accommodate the temporal volatility of the phenomena of our world It s not surprising therefore that *Perception Experience* offers the most stimulating variety of topics and that the keynote lectures reflect merely an intensification of interest in certain areas within a much larger field of investigation The texts presented here pinpoint the central preoccupations of today s debates amongst Benjamin scholars preoccupations which are themselves responses to our own historical imperatives

Fantastic Spaces Matthew J. Fee,2025-08-15 While the connection between Ireland and the otherworldly has long been a staple of literature and the arts it finds its most consistent and compelling expression in the medium of cinema In the first comprehensive scholarly study of the fantastic in Irish film *Fantastic Spaces* explores how the spatial dimensions of supernatural phenomena in Irish cinema interpret and engage with the dynamic changes that have swept across Ireland over the past four decades Drawing on a wide range of both canonical and lesser known Irish films Matthew J Fee closely examines how the fantastic including a multiplicity of supernatural occurrences and creatures drawn from Irish folklore as well as global popular culture functions to make meaning across a period of profound social political and cultural transformation in Ireland From providing platforms for female agency and interrogating rural heritage and nostalgia to articulating anxieties over modernization and globalization and questioning national identities the fantastic spaces of Irish cinema reveal a sophisticated capacity to grapple with the complexities and contradictions of historical change
