Russian Life, 1998

Architecture at the End of the Earth William Craft Brumfield, 2015-05-29 Carpeted in boreal forests dotted with lakes cut by rivers and straddling the Arctic Circle the region surrounding the White Sea which is known as the Russian North is sparsely populated and immensely isolated It is also the home to architectural marvels as many of the original wooden and brick churches and homes in the region's ancient villages and towns still stand Featuring nearly two hundred full color photographs of these beautiful centuries old structures *Architecture at the End of the Earth* is the most recent addition to William Craft Brumfield's ongoing project to photographically document all aspects of Russian architecture The architectural masterpieces Brumfield photographed are diverse they range from humble chapels to grand cathedrals buildings that are either dilapidated or well cared for and structures repurposed during the Soviet era Included are onion domed wooden churches such as the Church of the Dormition built in 1674 in Varzuga the massive walled Transfiguration Monastery on Great Solovetsky Island which dates to the mid 1550s the Ferapontov Nativity Monastery's frescoes painted in 1502 by Dionisy one of Russia's greatest medieval painters nineteenth century log houses both rustic and ornate and the Cathedral of St Sophia in Vologda which was commissioned by Ivan the Terrible in the 1560s The text that introduces the photographs outlines the region's significance to Russian history and culture Brumfield is challenged by the immense difficulty of accessing the Russian North and recounts traversing sketchy roads crossing silt clogged rivers on barges and ferries improvising travel arrangements being delayed by severe snowstorms and seeing the region from the air aboard the small planes he needs to reach remote areas The buildings Brumfield photographed some of which lie in near ruin are at constant risk due to local indifference and vandalism a lack of maintenance funds clumsy restorations or changes in local and national

priorities Brumfield is concerned with their futures and hopes that the region's beautiful and vulnerable achievements of master Russian carpenters will be preserved Architecture at the End of the Earth is at once an art book a travel guide and a personal document about the discovery of this bleak but beautiful region of Russia that most readers will see here for the first time The Aesthetics of Ruins Robert Ginsberg, 2021-08-04 This book constructs a theory of ruins that celebrates their vitality and unity in aesthetic experience Its argument draws upon over 100 illustrations prepared in 40 countries Ruins flourish as matter form function incongruity site and symbol Ruin underlies cultural values in cinema literature and philosophy Finally ruin guides meditations upon our mortality and endangered world **Solovki** Roy R. Robson, 2008-10-01 div Located in the northernmost reaches of Russia the islands of Solovki are among the most remote in the world And yet from the Bronze Age through the twentieth century the islands have attracted an astonishing cast of saints and scoundrels soldiers and politicians The site of a beautiful medieval monastery once home to one of the greatest libraries of eastern Europe Solovki became in the twentieth century a notorious labor camp Roy Robson recounts the history of Solovki from its first settlers through the present day as the history of Russia plays out on this miniature stage In the 1600s the piety and prosperity of Solovki turned to religious rebellion siege and massacre Peter the Great then used it as a prison But Solovki's glory was renewed in the nineteenth century as it became a major pilgrimage site only to descend again into horror when the islands became in the words of Alexander Solzhenitsyn the mother of the Gulag system From its first intrepid visitors through the blood soaked twentieth century Solovki like Russia itself has been a site of both glorious achievement and profound misery DIV *Preserving Petersburg* Helena Goscilo, Stephen M. Norris, 2008-06-13 Goscilo and Norris innovative anthology provides Slavic scholars with a panoramic view of the city's literary pictorial and social manifestations Europe Asia Studies For more than three centuries St Petersburg founded in 1703 by Peter the Great as Russia's westward oriented capital and as a visually stunning showcase of Russia's imperial ambitions has been the country's most mythologized city Like a museum piece it has functioned as a site for preservation a literal and imaginative place where Russians can commune with idealized pasts Preserving Petersburg represents a significant departure from traditional representations By moving beyond the Petersburg text created by canonized writers and artists the contributors to this engrossing volume trace the ways in which St Petersburg has become a museum piece embodying history nostalgia and recourse to memories of the past The essays in this attractively illustrated volume trace a process of preservation that stretches back nearly three centuries as manifest in the works of noted historians poets novelists artists architects filmmakers and dramatists The collection truly sparkles as the contributors each in turn take up this snuff box of a city and breathe movement and life into the idealized Petersburg museum Gregory Stroud Bennington College This collection brings together history literature architecture and the politics of memory Choice An interesting and important contribution to existing scholarship on St Petersburg's myth cult and text this volume is distinctive Catharine Theimer Nepomnyashchy Columbia University A truly innovative contribution to the

scholarship on Petersburg The volume should be read by all serious Slavic scholars Emily Johnson University of Oklahoma

Mapping St. Petersburg Julie A. Buckler, 2018-06-05 Pushkin's palaces or Dostoevsky's slums Many a modern day visitor to St Petersburg has one or more likely both of these images in mind when setting foot in this stage set like setting for some of the world's most treasured literary masterpieces What they overlook is the vast uncharted territory in between In **Mapping St Petersburg** Julie Buckler traces the evolution of Russia's onetime capital from a conceptual hierarchy to a living cultural system a topography expressed not only by the city's physical structures but also by the literary texts that have helped create it By favoring noncanonical works and underdescribed spaces Buckler seeks to revise the literary monumentalization of St Petersburg with Pushkin and Dostoevsky representing two traditional albeit opposing perspectives to offer an off center view of a richer less familiar urban landscape She views this grand city the product of Peter the Great's ambitious vision not only as a geographical entity but also as a network of genres that carries historical and cultural meaning We discover the busy messy middle ground of this hybrid city through an intricate web of descriptions in literary works nonfiction writings such as sketches feuilletons memoirs letters essays criticism and urban legends lore songs and social practices all of which add character and depth to this refurbished imperial city
