Lost Wax Casting of Jewelry Keith Edwards, 1974 *Lost Wax Investment Casting* C. W. many times to make to Plates fit properly the Dentist got the patient to bit on a special piece of wax so that they obtained a near perfect fit Then once we were in production we used many different types of Chemical Companies Engineering Companies and with the Investments Suppliers

THE BASIC PRINCIPLE OF LOST WAX CASTING

The problem associated with the first forms of casting was the removal of the original pattern or model therefore the process of lost wax casting is based on the use of a disposable pattern which will burn totally away at high temperature in an oxidizing atmosphere It is possible therefore to cast from any vegetable matter that after having been encapsulated in a suitable refractory type material is capable of being burnt away at high temperature to allow the metal that you which to cast in to be melted and poured in to take its place In lost wax casting the chosen vegetable material will be wax in the beginning Bees wax was used the wax was modeled by hand but in more modern times many different waxes have been developed some for carving the original model which can be cast in metal cleaned up and used as a production model from which are rubber mould is made if you are producing Jewellery Ornaments or Statues but in the case of Industrial Precision Investment casting instead of making a model and then producing a rubber mould from which the wax patterns are made the mould is produced in metal which gives much more accurate dimensions for the finished castings The book is split into five sections in which I will cover a wide variety of aspects of Lost Wax Casting 1 History of Lost Wax Casting 2 The Theory of Lost Wax Casting 3 Step by Step Picture Guide 4 Workshop Manual 5 Autobiography All of the sections are designed to give you a through picture of where the Lost Wax Casting process came from the various ways in which the process has been used and how it is still used today in a myriad of industries from Dentistry through to Jewellery Making and even in the production
