Steffe,John Olive,2009-12-02 Children s Fractional Knowledge

elegantly tracks the construction of knowledge both by children learning new methods of reasoning and by the researchers studying their methods. The book challenges the widely held belief that children's whole number knowledge is a distraction from their learning of fractions by positing that their fractional learning involves reorganizing not simply using or building upon their whole number knowledge. This hypothesis is explained in detail using examples of actual grade schoolers approaching problems in fractions including the schemes they construct to relate parts to a whole to produce a fraction as a multiple of a unit part to transform a fraction into a commensurate fraction or to combine two fractions multiplicatively or additively. These case studies provide a singular journey into children's mathematics experience which often varies greatly from that of adults. Moreover, the authors' descriptive terms reflect children's quantitative operations as opposed to adult mathematical phrases rooted in concepts that do not reflect and which in the classroom may even suppress youngsters' learning experiences. Highlights of the coverage: Toward a formulation of a mathematics of living instead of being; Operations that produce numerical counting schemes; Case studies: children's part-whole, partitive, iterative, and other fraction schemes; Using the generalized number sequence to produce fraction schemes; Redefining school mathematics. This fresh perspective is of immediate importance to researchers in mathematics education. With the up-close lens onto mathematical development found in *Children's Fractional Knowledge*, readers can work toward creating more effective methods for improving young learners' quantitative reasoning skills.

A Place to Live in Peace Free People of Color in West Feliciana Parish, Louisiana reveals a community where free people of color lived harmoniously with white people even as slavery persisted. Author Evelyn L. Wilson documents the presence, land ownership, business development, and personal relationships of free people of color in this Louisiana parish. In the last decade before the Civil War, tensions over slavery in West Feliciana Parish, Louisiana, led to the separation of free people of color from their white counterparts. But until the 1850s, free people of color had lived and thrived there. The free people of color who inhabited West Feliciana Parish were not a settled population with a common background or a long history of freedom. Some entered the parish already free; others purchased their freedom; while others had been freed by slaveholders for differing reasons. Regardless of how they arrived in the parish, they found themselves in a community that valued the talents and skills they had to offer without regard to the color of their skin. These individuals were integrated into their community, lived among white neighbors, provided needed services, and owned successful businesses. Using extensive archival research, including court records, government documents, legal citations, and periodicals, Wilson interprets the lives, experiences, and contributions of free people of color in West Feliciana Parish. The integral role that these free people of color

played in the parish complicates common understandings of the antebellum South **The Hovey Book** ,1914 **The Ontario Weekly Notes** ,1921 **Handbook of Narrative Psychotherapy for Children, Adults, and Families** Jan Olthof,2018-05-08 The Handbook Narrative Psychotherapy for Children Adults and Families combines philosophical scientific and theoretical insights in the field of narrative psychotherapy and links them to sources of inspiration such as poetry film literature and art under the common denominator narrative thinking Sections on theoretical issues alternate with a large number of case histories drawn from different therapeutic contexts The reader can browse at will through the many examples of therapeutic sessions in some cases including literal transcriptions in which narrativity in all its forms is the point of departure What language does the body speak What messages do seemingly random slips of the tongue convey How can a painting help a client to find words for his or her story The discussion of the logic of abduction demonstrates the importance of metaphor and special attention is given to the processes of creating a therapeutic context and defining a therapeutic framework
