Doherty, 1960      Louis Houck William T. Doherty (Jr.), 1960      **A Missouri Railroad Pioneer** Joel P. Rhodes, 2017-08-15 Lawyer and journalist entrepreneur and philanthropist Louis Houck is often called the Father of Southeast Missouri because he brought the railroad to the region and opened this backwater area to industrialization and modernization Although Houck's name is little known today outside Missouri Joel Rhodes shows how his story has relevance for both the state and the nation Rhodes presents a more complete picture of Houck than has ever been available reviewing his life from his German immigrant roots considering his career from both social and political perspectives and grounding the story in both state and national history He especially tells how from 1880 to the 1920s this self-taught railroader constructed a network of five hundred miles of track through the wilderness of wetlands known as Swampeast Missouri and how these Houck Roads provided a boost for population agriculture lumbering and commerce that transformed Cape Girardeau and the surrounding area Rhodes discusses how Houck fits into the era of economic individualism a time when men with little formal training shaped modern industry and also gives voice to Houck's critics and shows that he was not always an easy man to work with In telling the story of his railroading enterprise Rhodes chronicles Houck's battle with the Jay Gould railroad empire and offers key insight into the development of America's railway system from the cutthroat practices of ruthless entrepreneurs to the often comic ineptness of start-up rail lines More than simply a biography of a business entrepreneur the book tells how Houck not only developed the region economically but also followed the lead of Andrew Carnegie by making art culture and formal education available to all social classes Houck also served for thirty-six years as president of the Board of Regents of Southeast Missouri State Teacher's College and as a self-taught historian he wrote the first comprehensive accounts of Missouri's territorial period A Missouri Railroad Pioneer chronicles a multifaceted career that transformed a region Solidly researched this lively narrative also offers an entertaining read for anyone interested in Missouri history      Louis Houck Missouri Historian and Entrepreneur William T. Foley, 2014-03-12 The story of the blending of diverse cultures in a land rich in resources and beauty is an extraordinary one In this account the pioneer hunters trappers and traders who roamed the Ozark hills and the boatmen who traded on the Missouri and Mississippi Rivers take their place beside the small coterie of St Louisans whose wealth and influence enabled them to dominate the region politically and economically Especially appealing for many readers will be the attention Foley gives to common Missourians to the status of women and blacks and to Indian-white relations      *Thad Snow* Bonnie Stepenoff, 2003 Thad Snow 1881-1955 was an eccentric farmer and writer who was best known for his involvement in Missouri's 1939 Sharecropper Protest a mass highway demonstration in which approximately eleven hundred demonstrators marched to two federal highways to illustrate the plight of the cotton laborers Snow struggled to make sense of the changing world and his answers to questions regarding race social justice the environment and international war placed him at odds

with many In Thad Snow Bonnie Stepenoff explores the world of Snow providing a full portrait of him Snow settled in the Missouri Bootheel in 1910 Swampeast Missouri as he called it when it was still largely an undeveloped region of hardwood and cypress swamps He cleared and drained a thousand acres and became a prominent landowner highway booster and promoter of economic development though he later questioned the wisdom of developing wild land In the early 1920s cotton fever came to the region and Snow started producing cotton in the rich southeast Missouri soil Although he employed sharecroppers he became a bitter critic of the system that exploited labor and fostered racism In the 1930s when a massive flood and the Great Depression heaped misery on the farmworkers he rallied to their cause Defying the conventions of his class he invited the Southern Tenant Farmers Union STFU to organize workers on his land He became a friend and colleague of Owen Whitfield an African American minister who led the Sharecroppers Roadside Strike of 1939 The successes of this great demonstration convinced Snow that mankind could fight injustice by peaceful means While America mobilized for World War II he denounced all war as evil remaining a committed pacifist until his death in 1955 Shortly before he died Snow published an autobiographical memoir From Missouri in which he affirmed his optimistic belief that people could peacefully change the world This biography places Snow in the context of his place and time revealing a unique individual who agonized over racial and economic oppression and environmental degradation Snow lived worked and pondered the connections among these issues in a small rural corner of Missouri but he thought in global terms Well crafted and highly readable Thad Snow provides an astounding assessment of an agricultural entrepreneur transformed into a social critic and an activist

*The Final Frontiers, 1880-1930* John Otto, 1999-09-30 An examination of the settlement history of the alluvial bottomlands of the lower Mississippi Valley from 1880 to 1930 this study details how cotton growers transformed the swamplands of northwestern Mississippi northeastern Louisiana northeastern Arkansas and southern Missouri into cotton fields Although these alluvial bottomlands contained the richest cotton soils in the American South cotton growers in the Southern bottomlands faced a host of environmental problems including dense forests seasonal floods water logged soils poor transportation malarial fevers and insect pests This interdisciplinary approach uses primary and secondary sources from the fields of history geography sociology agronomy and ecology to fill an important gap in our knowledge of American environmental history Requiring laborers to clear and cultivate their lands cotton growers recruited black and white workers from the upland areas of the Southern states Growers also supported the levee districts which built imposing embankments to hold the floodwaters in check Canals and drainage ditches were constructed to drain the lands and local railways and graveled railways soon ended the area's isolation Finally quinine and patent medicines would offer some relief from the malarial fevers that afflicted bottomland residents and commercial poisons would combat the local pests that attacked the cotton plants including the boll weevils which arrived in the early twentieth century **It Happened in Missouri** Sean Mclachlan, 2013-11-05 It Happened in Missouri takes readers on a rollicking behind the scenes look at some of the characters
