Historians of the French extreme right frequently denote the existence of a strong xenophobic and nationalist tradition dating from the 1880s a perpetual anti republicanism which pervaded twentieth century political discourse Much attention is habitually paid to the interwar era deemed the zenith of this success when the leagues attracted hundreds of thousands of members and enjoyed significant political acclaim Most works on the subject speak of the French right or French fascism presenting compendia of figures and organizations from the Dreyfus Affair in the 1890s through the notorious Vichy regime the authoritarian construct which emerged following the defeat to Nazi Germany in June 1940 However historians rarely discuss the programmatic elements of extreme right wing doctrine which demanded the eradication of parliamentary democracy and

the transformation of the nation and state according to group principles Instead most detail the organization and membership of various organizations and often recount their quotidian activities as political actors within and in opposition to the Third Republic This book offers a new interpretation of the extreme right in interwar French politics focusing upon the largest and most influential such groups in 1920s and 1930s the Faisceau and the Croix de Feu It explores their designs for extensive political economic and social renewal a project that commanded significant attention from the leadership and rank and file of both organizations providing the overarching goal behind their aspiration to power The book examines five components of these efforts A renewal of politics and government the establishment of a new economic order a revaluation of gender and familial relations the role of youth in the new socio political construct and the politics of exclusion inherent in every facet of Faisceau and CDF doctrine In so doing it contributes to a historical understanding of the programmatic elements of the interwar extreme right while simultaneously situating its most prominent exponents within their broader historical context

perfect introductory textbook for all students of early twentieth century European history *Thinking Europe* MATS ANDRÉN,2022-10-14 Presenting a new historical narrative on European integration and identity this title examines how the concept of Europe has been entangled in a dynamic and dramatic tension between calls for unity and arguments for borders and division Through an in depth intellectual history of the idea of Europe Mats Andren interrogates the concept of integration and more recent debates surrounding European identity across the nineteenth and early twentieth centuries and the post war period Applying a broad range of original sources this unique work will be key reading for students and researchers studying European History European Studies Political History and related fields *Great Deception* Christopher Booker,2005-04-28 As the European Union moves towards adopting the constitution which will mark its final emergence as a United States of Europe The Great Deception shows how the most ambitious political project of our time has for more than 50 years been based on a colossal confidence trick the systematic concealment from the peoples of Europe of what the aim of this project has always been since its inception in the late 1940s *The Great Deception* Christopher Booker,Richard North,2016-04-07 Now published with a new preface explaining why The Great Deception is of the utmost importance today as it was when it was first published and to coincide with Great Britain s EU referendum in 2016 this book suggests that the United States of Europe and its edict of ever closer union have been based on a colossal confidence trick The Great Deception tells for the first time the inside story of the most audacious political project of modern times the plan to unite Europe under a single supranational government From the 1920s when the blueprint for the European Union was first conceived by a British civil servant this meticulously documented account takes the story right up to the moves to give Europe a political constitution already planned 60 years ago to be the crowning dream of the whole project The book shows how the gradual assembling of a European government has amounted to a slow motion coup d etat based on a strategy of deliberate deception into which Britain s leaders Macmillan and Heath were consciously drawn Drawing on a wealth of new evidence scarcely an episode of the story does not emerge in startling new light from the real reasons why de Gaulle kept Britain out in the 1960s to the fall of Mrs Thatcher The book chillingly shows how Britain s politicians not least Tony Blair were consistently outplayed in a game the rules of which they never understood But it ends by asking whether from the euro to enlargement the project has now overreached itself as a gamble doomed to fail Since their collaboration began in 1992 Christopher Booker a Sunday Telegraph columnist and Richard North who worked for four years in Brussels and Strasbourg as a senior researcher have won a unique reputation for their expertise on Britain s relationship to the European Union Their previous publications included *The Mad Officials* 1994 and *The Castle of Lies* 1996 But they regard *The Great Deception* as the book they had been waiting to write for ten years Christopher Booker s preface now adds up to date detail for the current era as Britain heads inexorably towards a possible Brexit *Ideas of Europe since 1914* M. Spiering,M. Wintle,2002-07-09 This book is about the history of Europe in the twentieth century and concentrates on two particular aspects First it examines

Brian Newsome, 2009 French Urban Planning 1940 1968 explores the creation and progressive dismantling of France's centralized authoritarian system of urban and architectural planning Established in the wake of World War II to facilitate the reconstruction and expansion of cities this planning program led to the evolution of large suburban housing estates plagued by inter intra family conflict juvenile delinquency and other social difficulties which sociologists connected to poor planning and design Critics began calling for the democratization of planning to remedy design problems and the government of Charles de Gaulle started reforming planning procedures in the late 1950s and early 1960s This book moves beyond technical and political issues to explore forces of religion gender and class that affected planning practices Key critics and state officials emerged from the Catholic Left Some were women from working class backgrounds and they manipulated gender stereotypes to insert working and middle class women into the design process Sometimes in opposition but often together these reformers initiated the most significant change of architectural and urban planning until the introduction of François Mitterrand's decentralization reforms in the 1980s French Urban Planning 1940 1968 will appeal to scholars and

technology available No amount of sound tank doctrine could compensate for the fragility of the material for the paucity of battlefield communication equipment and for the lack of tank infantry training opportunities Only by 1918 was the French army equipped with enough reliable tanks as well as aircraft and heavy artillery to begin to exercise a mastery of the new form of combined arms warfare The successful French armoured effort outlined in this study including a listing of all the combat engagements of the French tank service in the Great War highlights a level of military effectiveness within
