Loving A Psychological Approach:

Loving: a Psychological Approach Howard Lee Miller, Paul S. Siegel, 1972 **The Psychology of Love** Robert J. Sternberg, Michael L. Barnes, 1988-01-01 Psychologische studie over het verschijnsel liefde **Psychology of Love 101** Karin Sternberg, 2014 Print CourseSmart *Handbook of the Sociology of Emotions* Jan E. Stets, Jonathan H. Turner, 2007-10-10

Since the 1970s the study of emotions moved to the forefront of sociological analysis This book brings the reader up to date on the theory and research that have proliferated in the analysis of human emotions The first section of the book addresses the classification the neurological underpinnings and the effect of gender on emotions The second reviews sociological theories of emotion Section three covers theory and research on specific emotions love envy empathy anger grief etc The final section shows how the study of emotions adds new insight into other subfields of sociology the workplace health and more

The New Psychology of Love Robert J. Sternberg, Karin Sternberg, 2019 This is a much needed update on the latest theory and research on love supplied by leading scientific experts It is suitable for psychologists neuroscientists anthropologists sociologists and anyone with an interest in love and what has been learned from scientific studies of it

The Right To Be Loved S. Matthew Liao, 2015-10-01 S Matthew Liao argues here that children have a right to be loved To do so he investigates questions such as whether children are rightholders what grounds a child's right to beloved whether love is an appropriate object of a right and other philosophical and practical issues His proposal is that all human beings have rights to the fundamental conditions for pursuing a good life therefore as human beings children have human rights to the fundamental conditions for pursuing a good life Since being loved is one of those fundamental conditions children thus have a right to be loved Liao shows that this claim need not be merely empty rhetoric and that the arguments for this right can hang together as a coherent whole This is the first book to make a sustained philosophical case for the right of children to be loved It makes a unique contribution to the fast growing literature on family ethics in particular on children's rights and parental rights and responsibilities and to the emerging field of the philosophy of human rights *The Science and Theology of Godly Love* Matthew T. Lee, Amos Yong, 2012-06-15 Arguing that there are ways to move beyond the limitations of methodological atheism without compromising scientific objectivity the essays gathered in *The Science and Theology of Godly Love* explore the potential for collaboration between social science and theology They do so within the context of the interdisciplinary study of Godly Love which examines the perceived experience of loving God being loved by God and thereby being motivated to engage in selfless service to others This volume serves as an introduction to and a call for further research in this new field of study offering ten methodological perspectives on the study of Godly Love written by leading social scientists and theologians Drawing on the work of Douglas Porpora and others the contributors contend that agnosticism is the appropriate methodological stance when religious experience is under the microscope Godly Love does not force a theistic explanation on data instead these essays show that it sensitizes researchers so that they can take seriously

the faith and beliefs of those they study without the assumption that these theologies represent an incontestable truth

The Science of Compassionate Love Beverley Fehr, Susan Sprecher, Lynn G. Underwood, 2009-01-26 The Science of Compassionate Love is an interdisciplinary volume that presents cutting edge scholarship on the topics of altruism and compassionate love The book Adopts a social science approach to understanding compassionate love Emphasizes positive features of social interaction Encourages the appropriate expression of compassionate love both to those in intimate relationships and to strangers Includes articles by distinguished contributors from the fields of Psychology Sociology Communication Studies Family Studies Epidemiology Medicine and Nursing Is ideal for workshops on compassionate love Positive Psychology and creating constructive interactions between health professionals and patients

The Psychology of Love Michele A. Paludi, 2012-03-09 From arranged marriages to online dating this four volume work presents everything from personal accounts to empirical evidence to document what creates love in our culture as well as around the world The field of biology views love as a hard wired mammalian drive akin to thirst and hunger In contrast psychology views love from a social and cultural perspective where our drive to find love and our responses to it are highly dependent on societal norms In *The Psychology of Love* esteemed author and educator Michele A Paludi examines love through all lenses thereby providing readers a deeper understanding of the ways we can express caring sensitivity empathy and respect toward one another Each chapter in this comprehensive four volume work includes a scholarly overview of empirical research and theories about the psychology of love In addition individuals own definitions of love are included Special attention is paid to accepted standards of love across a variety of cultures the ways individuals express liking and love across the lifecycle and patterns in dissolutions of friendships and romantic relationships making note of gender and race differences

Oxford Studies in Experimental Philosophy Volume 3 Tania Lombrozo, Joshua Knobe, Shaun Nichols, 2020-04-10 The new field of experimental philosophy has emerged as the methods of psychological science have been brought to bear on traditional philosophical issues Oxford Studies in Experimental Philosophy is the place to go to see outstanding new work in the field It features papers by philosophers papers by psychologists and papers co authored by people in both disciplines The series heralds the emergence of a truly interdisciplinary field in which people from different disciplines are working together to address a shared set of questions The papers in this third volume illustrate the ways in which the field continues to broaden taking on new methodological approaches and interacting with substantive theories from an ever wider array of disciplines Some recent research in experimental philosophy is going more deeply into well established questions in the field while other strands of research are exploring issues that scarcely appeared in the field even a few years ago Thus we see the introduction of new empirical and statistical methods network analysis new theoretical approaches formal semantics and the development of entirely new interdisciplinary connections in the emerging field of experimental jurisprudence

Contemporary Psychology **The Psychology of Love** Thiago de Almeida, David L. Rodrigues, 2025-01-16 The topic of loving relationships is one of the most important and often problematic areas of people s lives Unfortunately such importance is best perceived when relationships are unsatisfactory and or threatened by the possibility of an imminent breakup When that happens our mood our ability to concentrate our energy our work and our health among other dimensions of our lives can be profoundly affected Although contemporary love life appears to be markedly different from that of predecessor generations given the wide range of current relationships as the hook up living together separate cohabitation virtual love or even betrayal among many other forms of loving interaction we live in a time when relationships between two or more people it seems need more understanding and more accurate research However studying love scientifically is a hard task because of methodological difficulties and conceptual improprieties intrinsically related to this type of investigation Because it can be considered such a familiar concept many researchers should agree on what love is and how it can be measured But this is not what occurs After all what is love Is it as a psychological phenomenon capable of being scientifically studied by psychology

The goal of this Research Topic is to Promote and disseminate publications related to what is conceived scientifically as the Psychology of Love differing from conceptions related to self help and common sense Conceptualize love through psychological science Systematize knowledge about the nature of love and related phenomena such as jealousy shyness inhibition infidelity and other related topics Understand conceptualizations of love and relationship dynamics of people in monogamous and consensually non monogamous relationships Research the establishment and maintenance of romantic relationships and try to understand scientifically the role of love in marital satisfaction
