### Abstract

**Objective:** Early motherhood and its impact on mothers, children, families and communities is a prevalent health challenge in developing countries that needs to be urgently explored. The aim of this study was exploring the challenges encountered by Iranian adolescent mothers during the transition to motherhood.

**Materials and methods:** Inductive conventional content analysis approach was used in this qualitative study. Face to face in-depth semi-structured interviews were conducted with 16 Iranian teenage mothers in the Kerman province of Iran from March to December 2016. Data collection continued until the point of data saturation and MAXQDA software was utilized in the analysis of the data.

**Results:** Six main categories increasing burden of responsibility, experiencing physical problems, receiving insufficient support, inefficiency in maternal role, emotional and mental distress; and role conflict and 18 sub-categories were extracted from the data analysis.

**Conclusion:** The findings of this study showed that adolescent mothers experience many physical, psychological, mental and social challenges. Therefore, it is expedient that special attention and care support is made available to them by health care providers. A comprehensive understanding of the challenges encountered by adolescent mothers, will aid the development of culturally appropriate health promotion guidelines and strategies.

It is a must addition for the libraries of clinicians and researchers in women's reproductive mental health. Cheryl Tatano Beck DNSc CNM FAAN, Board of Trustees, Distinguished Professor, School of Nursing, University of Connecticut. Pregnancy and childbirth are generally viewed as joyous occasions. Increased interest in risk reduction and early clinical intervention is bringing reproductive issues to the forefront of women's mental health. The scope of Women's Reproductive Mental Health across the Lifespan begins long before the childbearing years and continues well after those years have ended. Empirical findings, case examples, and dispatches from emerging areas of the field illuminate representative issues across the continuum of women's lives, with the goal of more effective care benefitting women and their families. Chapter authors discuss advances in areas such as fertility treatment and contraception and present current thinking on the psychological impact of pregnancy loss, menopause, cancer, and other stressors. These expert contributors emphasize the connections between an individual's biology and psychology and cultural expectations in shaping women's mental health and the balance between a client's unique history and current clinical knowledge. Clinicians need to address disorders included in the coverage: The experience of puberty and emotional wellbeing, Body image issues and eating disorders in the childbearing years, Risk assessment and screening during pregnancy, Normal and pathological postpartum anxiety, Mood disorders and the transition to menopause, The evolution of reproductive psychiatry. A reference with an extended shelf life. Women's Reproductive Mental Health across the Lifespan enhances the work of researchers and practitioners in social work, clinical psychology, and psychiatry and has potential relevance to all health care professionals.

**Like Mother, Like Daughter?** Jill Armstrong, 2017-10-04. Women are encouraged to believe that they can occupy top jobs in society by the example of other women thriving in their careers. Who better to be a role model for career success than your mother? Paradoxically, this book shows that having a mother as a role

model even for graduates of top universities does not predict daughters progressing in their own careers It finds that mothers with careers whilst highly influential in their daughters choice of career path rarely mentor their daughters as they progress This is partly explained by quiet ambition the tendency of women to be modest about their achievements Bigger issues are the twin pressures from contemporary motherhood and workplace culture that ironically lead career women s daughters to believe that being a good mother means working part time This stalls career progress Based on a large cross generational qualitative sample this book offers a timely and original perspective on the debate about gender equality in leadership positions     A Guide to Mastery in Clinical Nursing Joyce J.
