Abstract

Objective: Early motherhood and its impact on mothers, children, families and communities is a prevalent health challenge in developing countries that needs to be urgently explored. The aim of this study was exploring the challenges encountered by Iranian adolescent mothers during the transition to motherhood.

Materials and methods: Inductive conventional content analysis approach was used in this qualitative study. Face to face in-depth semi-structured interviews were conducted with 16 Iranian teenage mothers in the Kerman province of Iran from March to December 2016. Data collection continued until the point of data saturation and MAXQDA software was utilized in the analysis of the data.

Results: Six main categories increasing burden of responsibility, experiencing physical problems, receiving insufficient support, inefficiency in maternal role, emotional and mental distress; and role conflict and 18 sub-categories were extracted from the data analysis.

Conclusion: The findings of this study showed that adolescent mothers experience many physical, psychological, mental and social challenges. Therefore, it is expedient that special attention and care support is made available to them by health care providers. A comprehensive understanding of the challenges encountered by adolescent mothers, will aid the development of culturally appropriate health promotion guidelines and strategies.

widespread calls to either lean in or opt out How are some mothers subverting these contradictions and finding meaningful ways of reconciling their autonomous and maternal selves In *Modern Motherhood and Women's Dual Identities* Petra Bueskens argues that western modernisation consigned women to the home and released them from it in historically unprecedented yet interconnected ways Her ground breaking formulation is that western women are free as individuals and constrained as mothers with the twist that it is the former that produces the latter Bueskens theoretical contribution consists of the identification and analysis of modern women's duality drawing on political philosophy feminist theory and sociology tracking the changing nature of discourses of women freedom and motherhood across three centuries While the current literature points to the pervasiveness of contradiction and double shifts for mothers very little attention has been paid to how some women are subverting contradiction and rewriting the sexual contract Bridging this gap Bueskens interviews ten revolving mothers to reveal how periodic absence exceeding the standard work day disrupts the default position assigned to mothers in the home and in turn disrupts the gendered dynamics of household work A provocative and original work *Modern Motherhood and Women's Dual Identities* will appeal to graduate students and researchers interested in fields such as Women and Gender Studies Sociology of Motherhood and Social and Political Theory

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction

by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points vis a vis research on marriage and the family in the interval since the first Handbook Christensen 1964 appeared namely the impact on this research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook. In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it. Everything that concerned the life of men and women and their children was shrouded from the light. Today much of that has been changed. Gone is the concealment of the way in which life begins gone the irrational sanctity of the home. The aura of sentiment which once protected the family from discussion clings to it no more. We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting. We are engaged in the process of reconstructing our family institutions through criticism and discussion. 1938 pp 3-4

Who better to be a role model for career success than your mother Paradoxically this book shows that having a mother as a role model even for graduates of top universities does not predict daughters progressing in their own careers It finds that mothers with careers whilst highly influential in their daughters choice of career path rarely mentor their daughters as they progress This is partly explained by quiet ambition the tendency of women to be modest about their achievements Bigger issues are the twin pressures from contemporary motherhood and workplace culture that ironically lead career women s daughters to believe that being a good mother means working part time This stalls career progress Based on a large cross generational qualitative sample this book offers a timely and original perspective on the debate about gender equality in leadership positions
