Fuzzy Systems Engineering Nadia Nedjah, Luiza de Macedo Mourelle, 2005-05-20 This book is devoted to reporting innovative and significant progress in fuzzy system engineering. Given the maturation of fuzzy logic, this book is dedicated to exploring the recent breakthroughs in fuzziness and soft computing in favour of intelligent system engineering. This monograph presents novel developments of the fuzzy theory as well as interesting applications of the fuzzy logic exploiting the theory to engineer intelligent systems.

Nanomineralogy Yiwen Ju, Quan Wan, Michael F. Hochella, Jr., 2020-12-14 In 2018 the International Symposium on Nanogeoscience was held in Guiyang, China. Scholars from around the globe gathered to discuss recent progress and development trends in various aspects of nanogeoscience including nanomineralogy. Nanomineralogy, an important aspect of nanogeoscience, focuses on the composition, structure, and physical and chemical properties of nanoscale minerals and their interrelations with other Earth critical components. To give a sampling of the latest progress in nanomineralogy and related fields, we offer this Special Issue which describes a full range of recent nanomineralogic achievements relating to everything from nanominerals and geochemistry, mineral nanostructures, and nanomineral deformation to nanopores in oil and gas reservoirs, nanomineral deposits, and nanomineral material. Today nanomineralogy faces a new strategic opportunity as well as a revolutionary challenge. We thus present this special nanomineralogy focused issue of *Minerals* with the aim of encouraging our colleagues to familiarize themselves with current developments, trends, and directions in nanomineralogy, enabling an understanding of the potential of the field as a whole. We look forward to developing further scientific research and cooperation in nanomineralogy, hoping thereby to attract and guide young scholars to participate in this field.

Machines of Youth Gary S. Cross, 2018-05-04 For American teenagers, getting a driver's license has long been a watershed moment separating teens from their childish pasts as they accelerate toward the sweet, sweet freedom of their futures. With a driver's license in hand, teens are on the road to buying and driving and maybe even crashing their first car, a machine which is home to many a teenage ritual: being picked up for a first date, parking at a scenic overlook, or blasting the radio with a gaggle of friends in tow. So important is this car ride into adulthood that automobile culture has become a stand-in for a shortcut to what millions of Americans remember about their coming of age. *Machines of Youth* traces the rise and more recently the fall of car culture among American teens. In this book, Gary S. Cross details how an automobile obsession drove teen peer culture from the 1920s to the 1980s, seducing budding adults with privacy, freedom, mobility, and spontaneity. Cross shows how the automobile redefined relationships between parents and teenage children, becoming a rite of passage, producing new courtship rituals, and fueling the growth of numerous car subcultures. Yet for teenagers today, the lure of the automobile as a transition to adulthood is in decline. Tinkerers are now sidelined by the advent of digital engine technology and premolded body construction, while the attention of teenagers has been captured by iPhones, video games, and other digital technology. And adults have become less tolerant of teens on the

road restricting both cruising and access to drivers licenses Cars are certainly not going out of style Cross acknowledges but how upcoming generations use them may be changing He finds that while vibrant enthusiasm for them lives on cars may no longer be at the center of how American youth define themselves But for generations of Americans the modern teen experience was inextricably linked to this particularly American icon **Somali Piracy** Jade Lindley,2016-06-23 Maritime piracy off the coast of Somalia was first recognised as a global concern in 2008 after the hijackings of World Food Programme vessels It remains a serious impediment to international maritime trade and a significant risk to seafarers Bringing a criminological perspective to the subject this book presents an analysis of Somali piracy by means of Routine Activity Theory and regulatory pluralism Based on data from a range of sources including published documents and in depth interviews with representatives of industry government and international organisations the study concludes that no one institution or policy will suffice to control Somali piracy Accordingly a number of different actors and institutions have a role to play in reducing the supply of motivated offenders the vulnerability of prospective victims and in enhancing guardianship The book envisages a holistic counter piracy program based on a pluralistic regulatory model that is sustainable within the region and managed by the region providing the best opportunity for both the immediate future and for long term success This study will be essential reading for criminologists public policy and legal scholars as well as policy makers and regulators in countries affected by and dealing with piracy and international professional advocacy groups operating in the maritime space **Classic Papers** ,2004-07-02 Advances in Ecological Research was first published in 1962 and has become one of Academic Press most prestigious and successful series In 1999 the Institute for Scientific Information released figures indicating this serial has an impact factor of 9.6 and a half life of 10.0 years ranking it first in the highly competitive category of Ecology This volume continues to publish topical and important reviews and interprets ecology to include all material that contributes to our understanding of the field Advances in Ecological Research presents a wide range of papers on all aspects of ecology Topics include the physiology populations and communities of plants and animals as well as landscape and ecosystem ecology **Advanced Magnetohydrodynamics** J. P. Goedbloed,Rony Keppens,Stefaan Poedts,2010-04-29 Following on from the companion volume Principles of Magnetohydrodynamics this textbook analyzes the applications of plasma physics to thermonuclear fusion and plasma astrophysics from the single viewpoint of MHD This approach turns out to be ever more powerful when applied to streaming plasmas the vast majority of visible matter in the Universe toroidal plasmas the most promising approach to fusion energy and nonlinear dynamics where it all comes together with modern computational techniques and extreme transonic and relativistic plasma flows The textbook interweaves theory and explicit calculations of waves and instabilities of streaming plasmas in complex magnetic geometries It is ideally suited to advanced undergraduate and graduate courses in plasma physics and astrophysics **New Mexico Food Trails** Carolyn Graham,2021-04-15 New Mexico Food Trails takes readers and road trippers on a tour of the state with their taste buds

through towns large and small where cooks and chefs are putting their own spin on New Mexico's most famous ingredients and dishes

Soil Health and Climate Change Bhupinder Pal Singh, Annette L. Cowie, K. Yin Chan, 2011-07-24 *Soil Health and Climate Change* presents a comprehensive overview of the concept of soil health including the significance of key soil attributes and management of soil health in conventional and emerging land use systems in the context of climate change. Starting with a review of the physical, chemical, and biological indicators of soil health and their significance for monitoring the impacts of climate change, this book then focuses on describing the role of soil structure, pH, organic matter, nitrogen, respiration, and biota in sustaining the basic functions of soil ecosystems and their anticipated responses to climate change. Further topics include the management of cropping, pastoral, and forestry systems and rehabilitated mine sites, with a focus on mitigation of and adaptation to climate change impacts. Finally, the opportunities and potential risks of organic farming, biochar, and bioenergy systems and their ability to sustain and even enhance soil health are discussed. Candlestick

Soil Survey of ... [various Counties, Etc.], 1963 Misplaced Objects Silvia Spitta, 2009-07-01 When things move, things change. Starting from this deceptively simple premise, Silvia Spitta opens a fascinating window onto the profound displacements and transformations that have occurred over the six centuries since material objects and human subjects began circulating between Europe and the Americas. This extended reflection on the dynamics of misplacement starts with the European practice of collecting objects from the Americas into Wunderkammern, literally cabinets of wonders. Stripped of all identifying contexts, these exuberant collections, including the famous Real Gabinete de Historia Natural de Madrid, upset European certainties, forcing a reorganization of knowledge that gave rise to scientific inquiry and to the epistemological shift we call

modernity In contrast cults such as that of the Virgin of Guadalupe arose out of the reverse migration from Europe to the Americas The ultimate marker of mestizo identity in Mexico the Virgin of Guadalupe is now fast crossing the U S Mexico border and miracles are increasingly being reported Misplaced Objects then concludes with the more intimate and familial collections and recollections of Cuban and Mexican American artists and writers that are contributing to the Latinization of the United States Beautifully illustrated and radically interdisciplinary Misplaced Objects clearly demonstrates that it is not the awed viewer but rather the misplaced object itself that unsettles our certainties allowing new meanings to emerge
