Plants in Mesozoic Time Carole T. Gee, 2010-07-16 *Plants in Mesozoic Time* showcases the latest research of broad botanical and paleontological interest from the world's experts on Mesozoic plant life. Each chapter covers a special aspect of a particular plant group ranging from horsetails to ginkgophytes from cycads to conifers and relates it to key innovations in structure, phylogenetic relationships, the Mesozoic flora, or to animals such as plant-eating dinosaurs. The book's geographic scope ranges from Antarctica and Argentina to the western interior of North America with studies on the reconstruction of the Late Jurassic vegetation of the Morrison Formation and on fossil angiosperm lianas from Late Cretaceous deposits in Utah and New Mexico. The volume also includes cutting-edge studies on the evolutionary developmental biology (evo devo) of Mesozoic forests, the phylogenetic analysis of the still enigmatic Bennettitales, and the genetic developmental controls of the oldest flowers in the fossil record.

Dynamic Paleontology Mark A.S. McMenamin, 2016-06-10 Using a series of case studies, the book demonstrates the power of dynamic analysis as applied to the fossil record. Written in an engaging and informative style, *Dynamic Paleontology* outlines the best application of quantitative and other tools to critical problems in the paleontological sciences, including such topics as analysis of the Cambrian Explosion and the question regarding the presence of life on Mars. The book considers how we think about certain types of questions and shows how we can refine our approach to analysis right from the beginning of any particular research effort. The analytical tools presented here will have wide application to other fields of knowledge, as such, the book represents a major contribution to our deployment of modern scientific method.

Paleobotany Edith L.

Taylor, Thomas N. Taylor, Michael Krings, 2009-01-21 This book provides up-to-date coverage of fossil plants from Precambrian life to flowering plants, including fungi and algae. It begins with a discussion of geologic time, how organisms are preserved in the rock record, and how organisms are studied and interpreted, and takes the student through all the relevant uses and interpretations of fossil plants. With new chapters on additional flowering plant families, paleoecology, and the structure of ancient plant communities, fossil plants as proxy records for paleoclimate, new methodologies used in phylogenetic reconstruction, and the addition of new fossil plant discoveries since 1993, this book provides the most comprehensive account of the geologic history and evolution of microbes, algae, fungi, and plants through time. Major revision of a 1993 classic reference. Lavishly illustrated with 1,800 images and user-friendly for use by paleobotanists, biologists, geologists, and other related scientists. Includes an expanded glossary with an extensive up-to-date bibliography and a comprehensive index. Provides extensive coverage of fungi and other microbes and major groups of land plants, both living and extinct.

Biology of the Sauropod Dinosaurs Nicole Klein, 2011 Summarizes the latest research findings on the biology of the sauropod dinosaurs, the largest land living animals, and covers nutrition, physiology, skeletal structure, and growth.

Antarctic Paleobiology Thomas N. Taylor, Edith L. Taylor, 2012-12-06 *Antarctic Paleobiology* discusses the current status of paleobiology, principally paleobotany and palynology, in Antarctica and the interrelationship of Antarctic floras to those of

other Gondwana continents It provides a broad coverage of the major groups of plants on the one hand while on the other seeking to evaluate the vegetational history and the physical and biological parameters that influence the distribution of floras through time and space The biologic activity is discussed within a framework of the geologic history including the tectonic and paleogeographic history of the region Finally the reader will find a comprehensive bibliography of Gondwana paleobotany and palynology Polish Polar Research ,2007 Journal of Vertebrate Paleontology ,2008 Studia geologica Polonica ,2008 **Palaeontographica** ,1989 **New Zealand Journal of Geology and Geophysics** ,2005
