Madhav, 2022-04-18 This text presents up to date knowledge regarding lowlands which are lands affected by fluctuating water levels By collating and examining relevant information concerning lowlands in one volume this text should be of use to engineers planners managers administrators and scientists

*Low Impact Development and Sustainable Stormwater Management* Thomas H. Cahill, 2012-07-17 Sustainable Stormwater Management introduces engineers and designers to ideas and methods for managing stormwater in a more ecologically sustainable fashion It provides detailed information on the design process engineering details and calculations and construction concerns Concepts are illustrated with real world examples complete with photographs This guide integrates the perspectives of landscape architects planners and scientists for a multi disciplinary approach This is an enlightening reference for professionals working in stormwater management from engineers and designers to developers to regulators and a great text for college courses

Urban Water in Japan Rutger de Graaf, Fransje Hooimeijer, 2014-04-21 Water control is essential to Japan as more than half of its invested capital is concentrated in elevations under sea level and the majority of the island nation is exceptionally vulnerable to flooding To avoid potential crisis the Japanese have developed exceptionally innovative water management practices Offering the unique perspective of Dut

**Geomorphic Approaches to Integrated Floodplain Management of Lowland Fluvial Systems in North America and Europe** Paul F. Hudson, Hans Middelkoop, 2015-04-29 This volume provides a comprehensive perspective on geomorphic approaches to management of lowland alluvial rivers in North America and Europe Many lowland rivers have been heavily managed for flood control and navigation for decades or centuries resulting in engineered channels and embanked floodplains with substantially altered sediment loads and geomorphic processes Over the past decade floodplain management of many lowland rivers has taken on new importance because of concerns about the potential for global environmental change to alter floodplain processes necessitating revised management strategies that minimize flood risk while enhancing environmental attributes of floodplains influenced by local embankments and upstream dams Recognition of the failure of old perspectives on river management and the need to enhance environmental sustainability has stimulated a new approach to river management The manner that river restoration and integrated management are implemented however requires a case study approach that takes into account the impact of historic human impacts to the system especially engineering The river basins examined in this volume provide a representative coverage of the drainage of North America and Europe taking into account a range of climatic and physiographic provinces They include the 1 Sacramento California USA 2 San Joaquin California 3

Missouri USA 4 Red Manitoba Canada and Minnesota USA 5 Mississippi Louisiana USA 6 Kissimmee Florida USA 7 Ebro Spain 8 Rhone France 9 Rhine Netherlands 10 Danube Romania and 11 Volga Russian Federation Rivers The case studies covered in these chapters span a range of fluvial modes of adjustment including sediment channel hydrologic regime floodplains as well as ecosystem and environmental associations *The Hydraulic System of Uxul* Nicolaus

Seefeld,2018-09-30 This research seeks to close an essential research gap the understanding of the water management strategies of the Maya in pre Hispanic times It focuses on the archaeological investigation of the hydraulic system of Uxul a medium sized Maya centre in the south of the state of Campeche Mexico Crop Production Technologies Peeyush

Sharma,Vikas Abrol,2012-01-05 Crop production depends on the successful implementation of the soil water and nutrient management technologies Food production by the year 2020 needs to be increased by 50 percent more than the present levels to satisfy the needs of around 8 billion people Much of the increase would have to come from intensification of agricultural production Importance of wise usage of water nutrient management and tillage in the agricultural sector for sustaining agricultural growth and slowing down environmental degradation calls for urgent attention of researchers planners and policy makers Crop models enable researchers to promptly speculate on the long term consequences of changes in agricultural practices In addition cropping systems under different conditions are making it possible to identify the adaptations required to respond to changes This book adopts an interdisciplinary approach and contributes to this new vision Leading authors analyze topics related to crop production technologies The efforts have been made to keep the language as simple as possible keeping in mind the readers of different language origins The emphasis has been on general descriptions and principles of each topic technical details original research work and modeling aspects However the comprehensive journal references in each area should enable the reader to pursue further studies of special interest The subject has been presented through fifteen chapters to clearly specify different topics for convenience of the readers

**Irrigation Revisited** Jan Kop,Wim Ravesteijn,Kasper Kop,2016-03-21 In February 2013 a delegation of Dutch technicians working in Indonesia handed over the book For Profit and Prosperity dealing with the Dutch contribution to public works in Indonesia during the period 1800 2000 to dr ir Suyono Sosrodarsono who was Director General of Water Management 1966 1982 and Minister of Public Works 1983 1988 in Indonesia In his expression of thanks dr ir Suyono Sosrodarsono noticed that important information was missing in the book especially in the field of irrigation in modern Indonesia He suggested that Dutch participants of the irrigation projects in Indonesia since 1965 should provide the missing information by putting their memories on paper This suggestion was adopted and has resulted in the present anthology focusing on the rehabilitation and creation of a few irrigation projects with Dutch assistance during the period 1965 2014 Apart from purely technical information legal frameworks policies and programs are treated as well as systems regarding water management settlement training and education Special attention is given to the problematic nature of the West Tarum

Canal and to Indonesia's unique tidal and non tidal swamp development The anthology derives its authenticity from the fact that the authors of the various chapters actually participated in the field **Peatland Restoration and Ecosystem Services** Aletta Bonn, Tim Allott, Martin Evans, Hans Joosten, Rob Stoneman, 2016-06-23 Peatlands provide globally important ecosystem services through climate and water regulation or biodiversity conservation While covering only 3% of the earth's surface degrading peatlands are responsible for nearly a quarter of carbon emissions from the land use sector Bringing together world class experts from science policy and practice to highlight and debate the importance of peatlands from an ecological social and economic perspective this book focuses on how peatland restoration can foster climate change mitigation Featuring a range of global case studies opportunities for reclamation and sustainable management are illustrated throughout against the challenges faced by conservation biologists Written for a global audience of environmental scientists practitioners and policy makers as well as graduate students from natural and social sciences this interdisciplinary book provides vital pointers towards managing peatland conservation in a changing environment

**Plant-Soil Interactions at Low pH: Principles and Management** R.A. Date, N.J. Grundon, G.E. Rayment, M.E. Probert, 2012-12-06 The understanding of plant soil interactions in acid soils is important for improved food production in many parts of the world The context of the book touches on basic and applied aspects of the physics chemistry and biology of acid soils and their effect on growth of plants It contains a large section on management of acid soils for plant food production and on socioeconomic aspects of management of acid soils This is important because a large portion of the world's acid soils occurs in less developed countries Plant Soil Interactions at Low pH Principles and Management contains a substantial number of papers including nine invited reviews presented at the Third International Symposium of Plant Soil Interactions at Low pH The major themes include chemistry and physics of acid soils microbial and faunal activity in acid soils mechanisms of acid tolerance of plants selection and breeding of acid tolerant plants diagnosis and correction of acid soil infertility socioeconomic aspects of acid soil management and management systems for agriculture horticulture and forestry on acid soils

**Flooding and Management of Large Fluvial Lowlands** Paul F. Hudson, 2021-11-25 Pressure on large fluvial lowlands has increased tremendously during the past twenty years because of flood control urbanization and increased dependence upon floodplains and deltas for food production This book examines human impacts on lowland rivers and discusses how these changes affect different types of riverine environments and flood processes Surveying a global range of large rivers it provides a primary focus on the lower Rhine River in the Netherlands and the Lower Mississippi River in Louisiana A particular focus of the book is on geo engineering which is described in a straight forward writing style that is accessible to a broad audience of advanced students researchers and practitioners in global environmental change fluvial geomorphology and sedimentology and flood and water management

**Water for a Changing World - Developing Local Knowledge and Capacity** Guy Alaerts, Nicolas

Dickinson, 2008-12-10 This collection of papers represents the outcomes of the International Symposium held in Delft The Netherlands on June 13 15 2007 at the occasion of the 50th anniversary of the UNESCO IHE Institute for Water Education The papers discuss how to contribute to the sustainability of effective international development and water management with a diges      **Progress in Rainfed Lowland Rice** Jay Maclean, 1986 International networks Varietal improvement Soil crop

and water management Pest management Technology transfer      Nutrient Management in Rainfed Lowland Rice in the Lao PDR Bruce Linqvist, 2001 The objective of this book is to review the research that has been conducted on nutrient management of lowland rice in Laos from 1991 to 2000 and to present an integrated and sustainable nutrient management approach that is relevant to Lao farmers      **Agency and Change** Raymond Caldwell, 2006-04-27 This excellent book remaps

the limits and possibilities of change clearly shifting the focus from outmoded debates on agency and structure to new practice based discourses on agency and change Offering readers a selective and critical review of key literature and empirical research it will help students contextualize this complex subject area and independently evaluate future prospects for effective change agent roles in organizations Presenting an interdisciplinary exploration of competing discourses the book uses two overarching conceptual continua centred agency decentred agency and systems processes thereby allowing a more intensive focus on agency and change Well written with challenging content this book is essential reading for those interested in the origins development and future prospects for change agency in an organizational world characterized by increasing complexity risk and uncertainty      *Tropical Freshwater Wetlands* H. Roggeri, 2013-03-09 Wetlands could be

described as land and water at Tropical wetlands one and the same time and as such are very specific on the brink ecosystems Their often rich variety of resources makes them highly valuable to the peoples who live With a few exceptions like the Everglades in the or regularly stay in them However access to them United States the last remaining large wetlands are to be found in developing countries Perhaps this can be difficult and those unaware of their services be explained by insufficient financial resources frequently associate wetlands with such nuisances and calamities as mosquitos disease floods impen lower population density or a different concept of extractable wastelands etc As a result these areas are development and well being Whatever the reasons often perceived as obstacles to human development many tropical wetlands still exist and support the and well being subsistence of many communities But for how much History reflects these two views Wetlands

may no longer have been the cradle of great civilizations like the Maya Inca Aztec Nilotic and Mesopotamian have also been destroyed or considerably altered Dams and embankments now prevent water from civilizations but elsewhere their destruction allowed other societies to develop For example the Netherlands spreading into the floodplains of several rivers like lands literally emerged from the waters thanks to the Senegal Volta and Nile
