Brighter than Scale, Swifter than Flame Neon Yang,2025-05-06 With an armored oath bound hero reminiscent of The Mandalorian and the Asian inspired epic fantasy of She Who Became the Sun Neon Yang's Brighter than Scale Swifter than Flame is a stunning queer novella about a dragon hunter finding home with a dragon queen Few know the true identity of the masked guildknight of Mithrandon She barely remembers herself The masked guildknight Yeva was thirteen when she killed her first dragon With her gift revealed she was shipped away to the imperial capital to train in the rare art of dragon slaying Now a legendary dragon hunter she has never truly felt at home nor removed her armor in public since that fateful day all those years ago Yeva must now go to Quanbao a fiercely independent and reclusive kingdom It is rumored that there dragons are not feared as is right and proper but instead loved and worshipped It is rumored that there they harbor a dragon behind their borders While Yeva searches for the dreaded beast she is welcomed into the palace by Quanbao's monarch Lady Sookhee Though wary of each other Yeva is shocked to find herself slowly opening up to the beautiful mysterious queen As they grow closer Yeva longs to let Lady Sookhee see the person behind the armor but she knows she must fulfill her purpose and slay the dragon Ultimately she must decide who or what she is willing to betray her own heart or the sacred duty that she has called home for so long At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied *Pathogen-Host Interactions: Antigenic Variation v. Somatic Adaptations* Ellen Hsu,Louis Du Pasquier,2015-11-04 This volume provides in depth reviews of model systems that exemplify the arms race in host pathogen interactions Somatic adaptations are responsible for the individualization of biological responses to the environment and the continual struggle between host immune systems and invading pathogens has given rise to corresponding processes that

produce molecular variation Whether in mollusks or human beings various host somatic mechanisms have evolved independently providing responses to counter rapidly changing pathogens The pathways they utilize can include non heritable changes involving RNA and post translational modifications or changes that produce somatic DNA recombination and mutation For infectious organisms such as protozoans and flatworms antigenic variation is central to their survival strategy Evolving the ability to evade the host immune system not only increases their chances of survival but is also necessary for successful re infection within the host population Richard Scarry's Best First Book Ever Richard Scarry,1979-09-12 Illus in full color Favorite Scarry animal characters introduce simple learning concepts and over 700 words **Uninformed Consent** Hal A. main issues in the philosophies of historiography and history including natural history and the practices of historians Written by an international and multi disciplinary group of experts these clearly written entries present a cutting edge updated picture of current research in the philosophies of historiography and history This Companion will be of interest to philosophers historians natural historians and social scientists

Outers' Book-recreation ,1922 **The Origins of Meaning** James R. Hurford,2007-08-30 In this the first of two ground breaking volumes on the nature of language in the light of the way it evolved James Hurford looks at how the world first came to have a meaning in the minds of animals and how in humans this meaning eventually came to be expressed as language He reviews a mass of evidence to show how close some animals especially primates and more especially apes are to the brink of human language Apes may not talk to us but they construct rich cognitive representations of the world around them and here he shows are the evolutionary seeds of abstract thought the means of referring to objects the memory of events even elements of the propositional thinking philosophers have hitherto reserved for humans What then he asks is the evolutionary path between the non speaking minds of apes and our own speaking minds Why don t apes communicate the richness of their thoughts to each other Why do humans alone have a unique disposition to reveal their thoughts in complex detail Professor Hurford searches a wide range of evidence for the answers to these central questions including degrees of trust the role of hormones the ability to read minds and the willingness to cooperate Expressing himself congenially in consistently colloquial language the author builds up a vivid picture of how mind language and meaning evolved over millions of years His book is a landmark contribution to the understanding of linguistic and thinking processes and the fullest account yet published of the evolution of language and communication A wonderful read lucid informative and entertaining while at the same time never talking down to the reader by sacrificing argumentation for the sake of simplicity Likely to be heralded as the major publication dealing with language evolution to date Frederick J Newmeyer University of Washington
