to be mastered to design implement and operationalize these strategies Finally what are the unique sustainable competitive advantages of a cooperative organization relative to these same strategies Furthermore for the logic of action specific to the cooperative management method to be expressed the cooperative values principles and rules must be articulated in an appropriate management framework This is what the cooperative balance model proposes The last key idea introduced in this book concerns the denaturalizing tendency observed among many cooperatives which leads to an identity crisis The two theoretical models cited are highly relevant to the challenges resulting from this denaturalizing tendency The three models introduced constitute the first part of this book The second part offers a practical perspective while several cases of cooperatives are included <http://coopmanagement.ca>
