conduct a critical survey of the main tools devised for the synthetic measurement of globalization processes To this end the first part of the book discusses the meaning of the concept considered highlighting the different and often contradictory interpretations put forward in its regard in the literature Subsequently analysed are the passages and issues that must be addressed when constructing an instrument intended to measure a social phenomenon of such complexity as globalization Stressed in particular is that the researcher's subjectivity is repeatedly involved in these passages so that no instrument can have objective validity Given these premises the book presents the principal tools employed in attempts to measure globalization starting with those whose unit of analysis is the state In this regard particular space is devoted to indexes which take a multidimensional approach to the concept of globalization There follows a comparison among the results obtained using these indexes and criticisms are made of the ways in which the latter have been constructed A limitation or if one wishes a paradox concerning such tools is that they measure in relation to states a process which has as one of its principal features the fact that it extends beyond the confines of states For this reason the final chapter considers whether globalization can be measured with different units of analysis in particular people and cities The books concludes with discussion of the general limitations of globalization indexes Lucia and the Loom: Weaving Her Way to Happiness Volume 2 Hisaya Amagishi, 2024-10-10 It's been two months since Lucia Fano left her family s workshop and was appointed the head manager of the Magical Garment Factory and she's starting to wonder just how long it ll be until she's replaced with someone more experienced Construction on the new factory building has been completed and the staff are eager to celebrate their official opening However it s not long before they represented with another project courtesy of Lucia s friend and magical toolmaker Dahlia the zephyricloth a fabric enchanted with air magic to produce a refreshing breeze The clothing applications are endless and Lucia is determined to do her best in the role she's been given With the help of friends she tackles all the challenges that come her way Reports on the Botanic Station, Agricultural School, Experiment Station ..., St. Lucia Saint Lucia.
