Luck Of The Draw Reflections On The Air War In Europe:

Luck of the Draw Frank Murphy, 2023-02-28 THE INSTANT NEW YORK TIMES BESTSELLER In the pursuit of authenticity of accurate history and undeniable courage no words matter more than I was there Read Luck of the Draw and the life of Frank Murphy and ponder this how did those boys do such things Tom Hanks The epic true story of an American hero who flew during WWII as featured in the Steven Spielberg and Tom Hanks TV Series Masters of the Air Beginning on August 17 1942 American heavy bomber crews of the Eighth Air Force took off for combat in the hostile skies over occupied Europe The final price was staggering 4 300 B 17s and B 24s failed to return nearly 21 000 men were taken prisoner or interned in a neutral country and a further 17 650 made the ultimate sacrifice Luck of the Draw is more than a war story It is the incredible inspiring story of Frank Murphy one of the few survivors from the 100th Bombardment Group who cheated death for months in a German POW camp after being shot out of his B 17 Flying Fortress Now with a new foreword written by his granddaughter Chloe Melas of NBC and daughter Elizabeth Murphy A gripping inspirational account of incredible bravery resilience and sheer will to survive A truly extraordinary story General David Petraeus U S Army Ret **Air Force Magazine** , 2001-07 **The Wild Blue Yonder and Beyond** Ian Hawkins, 2012-07-31 The 95th Bomb Group Heavy the most highly decorated bomb group of World War II participated in every major mission of the war in Europe from May 1943 through the war's end and was awarded an unprecedented three Presidential Unit Citations Flying the celebrated B 17 Flying Fortress the 95th was the first U S bomb group to bomb Berlin a feat that put it on the centerfold of Life magazine and the last group to lose a plane over Europe in World War II Over six hundred men in the 95th never came home The Wild Blue Yonder and Beyond is the first book to cover a World War II bomb group from its inception through the present day Utilizing interviews with nearly a hundred air war veterans dozens of unpublished crew memoirs all the bomb group's official mission reports from the National Archives and nearly a hundred other sources author Rob Morris assisted by air war historian Ian Hawkins provides a deep tactical and human understanding of the group Also included are the stories of the veterans wives and families who fought a different kind of war at home and the residents of Horham whose tiny English village was suddenly on the war's front lines Intensely human exhaustively researched and lovingly told this book is certain to be a classic in the field and a resource for anyone interested in the workings of a World War II bomb group Flying against Fate S. P. MacKenzie, 2017-08-04 During World War II Allied casualty rates in the air were high Of the roughly 125 000 who served as aircrew with Bomber Command 59 423 were killed or missing and presumed killed a fatality rate of 45 5% With odds like that it would be no surprise if there were as few atheists in cockpits as there were in foxholes and indeed many airmen faced their dangerous missions with beliefs and rituals ranging from the traditional to the outlandish Military historian S P MacKenzie considers this phenomenon in Flying against Fate a pioneering study of the important role that superstition played in combat flier morale among the Allies in World War II Mining a wealth of documents as well as a trove of published

and unpublished memoirs and diaries MacKenzie examines the myriad forms combat fliers superstitions assumed from jinxes to premonitions Most commonly airmen carried amulets or talismans lucky boots or a stuffed toy a coin whose year numbers added up to thirteen counterintuitively a boomerang Some performed rituals or avoided other acts e g having a photo taken before a flight Whatever seemed to work was worth sticking with and a heightened risk often meant an upsurge in superstitious thought and behavior MacKenzie delves into behavior analysis studies to help explain the psychology behind much of the behavior he documents not slighting the large cohort of crew members and commanders who demurred He also looks into the ways in which superstitious behavior was tolerated or even encouraged by those in command who saw it as a means of buttressing morale The first in depth exploration of just how varied and deeply felt superstitious beliefs were to tens of thousands of combat fliers Flying against Fate expands our understanding of a major aspect of the psychology of war in the air and of World War II

Luck of the Draw Frank D. Murphy, 2001-01-01 *Interrogations, Confessions, and Entrapment* G. Daniel Lassiter, 2013-11-11 Coerced confessions have long been a staple of TV crime dramas and have also been the subject of recent news stories The complexity of such situations however is rarely explored even in the scientific literature Now in softcover Interrogations Confessions and Entrapment remains one of the best syntheses of the scientific legal and ethical findings in this area uncovering subtle yet powerful forces that often compromise the integrity of the criminal justice system Editor G Daniel Lassiter identifies the exposure of psychological coercion as an emerging frontier in legal psychology citing its roots in the third degree approach of former times and noting that its techniques carry little scientific validity A team of psychologists criminologists and legal scholars asks and goes a long way toward answering important questions such as What forms of psychological coercion are involved in interrogation Are some people more susceptible to falsely confessing than others What are the effects of psychological manipulation on innocent suspects Are coercive tactics ever justified with minors Can jurors recognize psychological coercion and unreliable confessions Can entrapment techniques encourage people to commit crimes What steps can law enforcement take to minimize coercion Throughout this progressive volume readers will find important research based ideas for educating the courts changing policy and implementing reform from improving police interrogation skills to better methods of evaluating confession evidence For the expert witness legal consultant or student of forensic psychology this is material whose relevance will only increase with time

Masters of the Air MTI Donald L. Miller, 2024-01-23 A history recounting the events and experiences of the World War II bomber pilots of the U S Eighth Air Force the armed forces group that conducted daytime bombing of Germany in advance of the Allied soldiers arrival on the ground

Odyssey of a Bombardier John J. Hurt, Steven E. Sidebotham, 2014-09-26 Odyssey of a Bombardier is the illustrated Prisoner of War log that depicts the experiences of bombardier Richard M Mason in German prison camps after his B 17 Flying Fortress was shot down by the Germans in France in 1944 the final year of World War II The log follows Mason from the day his plane crashed until his liberation in

April 1945 and his return home to the United States Included are such topics as medical treatment and rehabilitation for wounded prisoners of the Germans life in Stalag Luft III a difficult long march in an arctic winter to another camp the travails of prisoners in the overcrowded filthy camp at Moosburg critical food shortages and the arrival of General George Patton with the liberating forces Mason was an amateur artist and illustrated his journal with moving depictions of prison life and comradeship This book shows U S airmen demonstrating grace and courage under pressure and meeting every challenge that their imprisonment presented

Rise of the War Machines Raymond Patrick O'Mara,2022-03-15 Rise of the War Machines The Birth of Precision Bombing in World War II examines the rise of autonomy in air warfare from the inception of powered flight through the first phase of the Combined Bomber Offensive in World War II Raymond P O Mara builds a conceptual model of humans machines and doctrine that demonstrates a distinctly new way of waging warfare in human machine teams Specifically O Mara examines how the U S Army s quest to control the complex technological and doctrinal system necessary to execute the strategic bombing mission led to the development of automation in warfare Rise of the War Machines further explores how the process of sharing both physical and cognitive control of the precision bombing system established distinct human machine teams with complex human to human and human to machine social relationships O Mara presents the precision bombing system as distinctly socio technical constructed of interdependent specially trained roles the pilot navigator and bombardier purpose built automated machines the Norden bombsight specialized navigation tools and the Minneapolis Honeywell C 1 Autopilot and the high altitude daylight bombing doctrine all of which mutually shaped each other s creation and use
