

The background of the book cover is a detailed illustration of a savanna landscape. In the foreground, a large, dark-furred hominid with a prominent brow ridge and a small, protruding lower jaw is shown from the chest up. It is looking off to the left. A young child, also with dark fur and a similar facial structure, is sitting in front of the adult, holding a green leafy plant in its mouth. The background features a river or stream, several acacia-like trees, and a clear blue sky.

Anthony Corey,1995 The Natural History of Creation is the third and final installment in M A Corey s natural theology series This remarkable trilogy has worked in tandem with the findings of modern science to help spearhead the rebirth of the once dead natural theology movement In this detailed yet easy to read work the author focuses on the religious account of creation found in Genesis One and comes to the astonishing conclusion that there is indeed much scientific truth to be found in this ancient work Many other writers have also noticed the breathtaking parallels that exist between modern evolutionism and the creation account given in the Bible but nowhere will the reader find a more thorough description of them than in The Natural History of Creation Back cover **The Political Economy of Contemporary Human Civilisation, Volume I**

Sangaralingam Ramesh,2025-03-21 This book the first of two volumes examines the evolution of humanity and development global economic systems to provide insight into the advances and challenges they have created By placing modern technology and global crises within the context of long term human development it evaluates the threat of climate change on future generations by showing how past civilizations have survived and succumbed to climate events A similar approach is taken with migration where the current migration crisis is contrasted against historic migration patterns The potential for artificial intelligence quantum computing nuclear fusion and biotechnology to combat these challenges as well as tackle poverty and inequality are also discussed This book highlights the consequences of human cognition and the constant desire for economic growth and evaluates whether they have been a net positive for human society It will be of interest to students and researchers working on political economy and global challenges Inventing Africa Robin Derricourt,2011-03-04

Inventing Africa is a critical account of narratives which have selectively interpreted and misinterpreted the continent s deep past Writers have created alluring images of lost cities vast prehistoric migrations and golden ages of past civilisations Debates continue on the African origins of humankind the contributions of ancient Egypt to the world and Africa s importance to global history Images of Africa simplifying a complex and diverse continent have existed from ancient Mediterranean worlds slave trading nations and colonial powers to today s political elites ecotourists and aid givers Robin Derricourt draws on his background as publisher and practitioner in archaeology and history to explore the limits and the dangers of simplifications arguing as with Said s concept of Orientalism that ambitious ideas can delude or oppress as well as inform Defending Africa against some of the grand narratives that have been imposed upon its peoples Inventing Africa will spark new debates in the history of Africa and of archaeology **Layers of Time** NA NA,2016-09-27 Ethiopia is one of the

oldest countries in the world This book traces the country s expansion southward during medieval times its resistance to Muslim invasion and under energetic leaders its defense of its independence during the European scramble for Africa The author is concerned not only with kings princes and politicians but also includes insights on daily life art architecture religion culture customs and observations by travelers Human Evolution Brian Regal,2004-11-23 A fascinating and wide ranging look at the controversies surrounding the search for the origins of the human species Written for those new to the subject

Human Evolution A Guide to the Debates presents the remarkable history of our understanding of human origins as it developed from the 1800s to the present Most works on this topic focus narrowly on one individual theory or debate In contrast Human Evolution draws from a wide range of sources to offer a fully rounded portrait of the entire field The chapters of the book follow a basic chronological order covering the issues personalities and discoveries that are central to the questions and controversies surrounding human evolution The coverage draws from a wide range of associated topics and examines not only controversies of a religious nature but also those that have little to do with religion allowing readers to weigh the information come to their own conclusions and even begin their own debates

*The Truth about Human Origins* Brad Harrub, Bert Thompson, 2003 Ever since Charles Darwin first published *The Origin of Species* on November 24 1859 the subject of origins has been one of the most controversial topics around Sadly it also is a subject that is fraught with erroneous theories and concepts Most students today are taught that organic evolution is not a theory but a fact that all reputable scientists accept Disclaimers from the evolutionary community notwithstanding such a claim is quite simply wrong We believe it is time for someone to offer what renowned news commentator Paul Harvey would call the rest of the story That is what *The Truth About Human Origins* does It tells the rest of the story as it discusses the scientific facts about mankind s beginning For example it investigates the record of the rocks as that record relates to human evolution It demonstrates how evolutionary theory is unable to explain things like the origin of gender and sexual reproduction the origin of language and communication the origin of the brain the mind and human consciousness and the origin of skin colors and blood types It also examines in an in depth fashion the so called molecular evidence of human evolution

*Unthinking Eurocentrism* Ella Shohat, Robert Stam, 2013-09-27 This excellent book corrects eurocentric criticism from media studies in the past by examining Hollywood movie genres such as the western and the musical from a multicultural perspective

**The First Human** Ann Gibbons, 2007-04-10 In this dynamic account award winning science writer Ann Gibbons chronicles an extraordinary quest to answer the most primal of questions When and where was the dawn of humankind Following four intensely competitive international teams of scientists in a heated race to find the missing link the fossil of the earliest human ancestor Gibbons ventures to Africa where she encounters a fascinating array of fossil hunters Tim White the irreverent Californian who discovered the partial skeleton of a primate that lived 4 4 million years ago in Ethiopia French paleontologist Michel Brunet who uncovers a skull in Chad that could date the beginnings of humankind to seven million years ago and two other groups one led by zoologist Meave Leakey the other by British geologist Martin Pickford and his French paleontologist partner Brigitte Senut who enter the race with landmark discoveries of their own Through scrupulous research and vivid first person reporting *The First Human* reveals the perils and the promises of fossil hunting on a grand competitive scale
