Pyne, 2016 A science historian describes seven famous ancestral fossils that have become known around the world including the three foot tall hobbit from Flores the Neanderthal of La Chapelle the Taung Child the Piltdown Man hoax Peking Man Australopithecus sediba and Lucy

*NoveList The Implications of Evolution for Metaphysics* David H. Gordon, 2023-08-22 After the nineteenth century turn from idealism when idealist philosophies were largely abandoned for

materialist ones many analytic philosophers have adhered to scientific naturalism as the new orthodoxy largely due to the success of scientific advancements The New Atheists such as Daniel Dennett and Richard Dawkins claim it is Darwin who deserves much of the credit for repudiating the traditional Mind first world view In The Implications of Evolution for Metaphysics Theism Idealism and Naturalism David H Gordon explores questions such as Is it true that evolution is incompatible with theism and necessarily results in naturalism Is it possible as naturalism maintains that everything can be reduced to physical processes Or are there too many recalcitrant phenomena that defy reduction Can the epistemological conditions for metaphysical knowledge be met If the underdetermination of theory allows for multiple metaphysical theories to cover the same phenomena with each offering an epistemically adequate explanation then neither naturalism nor theism can be asserted to be objectively true Nevertheless it is possible to favor one over the other based on overall coherence and explanatory power

**Bittersweet Destiny** Del Thiessen, 2017-09-08 Bittersweet Destiny combines discourse on the evolution of human behavior with a philosophical perspective It explores evolutionary theory aimed at determining human behavior Del Thiessen presents this material against the broad background of everyday life allowing the reader to see the theory of evolution as it has shaped his or her own behavior However he points out that when evolutionary theory is aimed at human behavior the critics object and controversy results Thiessen argues that nothing in our lives makes sense unless we look at it through a biological lens We can thereby understand our origin our affiliation with all animals and plants and our cultural destination However we can also discover a dark side to our destiny our favoritism to those who share our own genes our ability to deceive and our capacity for abuse rape and murder Good bad and indifferent we serve the replication of our DNA Critics extrapolate evolutionary theory to a wide range of animal species and even human morphology and physiology but when the same perspective is applied to human behavior there is strong dissent What these critics fear according to Thiessen is that accepting evolutionary notions about human behavior strikes at the heart of free will self determination and social equality Bittersweet Destiny describes the heroic efforts of naturalists Charles Darwin and Alfred Wallace to unlock the secrets of evolution It continues with a vivid description of our fossil history and our chance beginnings From there the story implicates disease processes in evolution highlights our rational and irrational nature focuses on those characteristics of brain evolution and language that make us distinctive and illustrates our most basic survival and reproductive mechanisms Thiessen warns the reader that things are as they are no matter what we might wish we ignore facts and controversy at our own risk This book will be significant to anthropologists psychologists biologists and sociologists

assembled of the evidence for human evolution displaying in full color all the key fossils and artifacts of human prehistory

*Pan's Travail* Johnson Donald Hughes, 1994 Many people express surprise writes J Donald Hughes when they are told that environmental problems existed in the ancient world they are used to thinking of the environment as an exclusively modern concern But an examination of the evidence shows that the Greeks and Romans not only suffered from some of the same predicaments that plague the present scene but in many cases they were aware of them and commented on them In *Pan's Travail* Hughes examines the environmental history of the classical period and argues that the decline of ancient civilizations resulted in part from exploitation of the natural world Focusing on Greece and Rome as well as on areas subject to their influences Hughes offers a detailed look at the impact of humans and their technologies on the ecology of the Mediterranean basin He explores the complex relationships of human culture and the environment with topics that include deforestation and overgrazing soil erosion depletion of wildlife and natural resources pollution and urban problems such as water supply and sewage disposal He also compares the ancient world's environmental problems to those of other eras and discusses attitudes toward nature expressed in Greek and Latin literature **BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved**

**Deep Truth** Gregg Braden, 2012-10-15 The Crisis Best selling author and visionary scientist Gregg Braden suggests that the hottest topics that divide us as families cultures and nations seemingly disparate issues such as war terrorism abortion genocide poverty economic collapse climate change and nuclear threats are actually related They all stem from a worldview based upon the false assumptions of an incomplete science The History The obsolete beliefs of our modern worldview have brought us to the brink of disaster and the loss of all that we cherish as a civilization Our reluctance to accept new discoveries about our relationship to the earth one another and our ancient past keeps us locked into the thinking that has led to the crises threatening our lives today The Facts The scientific method allows for and expects new information to be revealed and assimilated into our existing beliefs It's the updating of scientific knowledge with the new facts from new discoveries that is the key to keeping science honest current and meaningful To continue teaching science that is not supported by the new discoveries ones based upon accepted scientific methods is not in fact scientific But this is precisely what we see happening in traditional textbooks classrooms and mainstream media today The Opportunity Explore for yourself the discoveries that change 150 years of scientific beliefs yet are still not reflected in mainstream thinking including Evidence of advanced near ice age civilizations The origin of and reasons for war in our ancient past and why it may become obsolete in our time The false assumptions of human evolution and of the Darwinian theory Let the strongest live and the weakest die and how this plays out in corporations societies warfare and civilization today **Deep Truth** reveals new discoveries that change the way we think about everything from our personal relationships to civilization itself When the facts become clear our choices become obvious **The Archaeology of Mind: Neuroevolutionary Origins of Human Emotions (Norton Series on Interpersonal Neurobiology)** Jaak Panksepp, Lucy Biven, 2012-09-17 What makes

us happy What makes us sad How do we come to feel a sense of enthusiasm What fills us with lust anger fear or tenderness Traditional behavioral and cognitive neuroscience have yet to provide satisfactory answers The Archaeology of Mind presents an affective neuroscience approach which takes into consideration basic mental processes brain functions and emotional behaviors that all mammals share to locate the neural mechanisms of emotional expression It reveals for the first time the deep neural sources of our values and basic emotional feelings This book elaborates on the seven emotional systems that explain how we live and behave These systems originate in deep areas of the brain that are remarkably similar across all mammalian species When they are disrupted we find the origins of emotional disorders SEEKING how the brain generates a euphoric and expectant response FEAR how the brain responds to the threat of physical danger and death RAGE sources of irritation and fury in the brain LUST how sexual desire and attachments are elaborated in the brain CARE sources of maternal nurturance GRIEF sources of non sexual attachments PLAY how the brain generates joyous rough and tumble interactions SELF a hypothesis explaining how affects might be elaborated in the brain The book offers an evidence based evolutionary taxonomy of emotions and affects and as such a brand new clinical paradigm for treating psychiatric disorders in clinical practice Forthcoming Books Rose Arny,1990 **The Origin of Language** Madeleine Beekman,2025-08-14 In a radical new story about the birth of our species The Origin of Language argues that it was not hunting fighting or tool making that forced early humans to speak but the inescapable need to care for our children Journeying to the dawn of Homo sapiens evolutionary biologist Madeleine Beekman reveals the happy accidents hidden in our molecular biology DNA chromosomes and proteins that led to one of the most fateful events in the history of life on Earth our giving birth to babies earlier in their development than our hominid cousins the Neanderthals and Denisovans Faced with highly dependent infants requiring years of nurturing and protection early human communities needed to cooperate and coordinate and it was this unprecedented need for communication that triggered the creation of human language and changed everything Infused with cutting edge science sharp humour and insights into the history of biology and its luminaries Beekman weaves a narrative that s both enlightening and entertaining Challenging the traditional theories of male luminaries like Chomsky Pinker and Harari she invites us into the intricate world of molecular biology and its ancient secrets The Origin of Language is a tour de force by a brilliant biologist on how a culture of cooperation and care have shaped our existence *The Key Reporter* ,1988 **Human Origins** ,2011 Describes how mapping the human genome has aided paleoanthropologists in their study of ancient bones used to explore human origins from the earliest humans bipedal apes up to Martin Pickford s Millennium Man
