Wounded Innocents and Fallen Angels Gregory K. Moffatt, 2003-06-30 Violence of any kind is hard for most people to understand, but crimes against children and crimes committed by children are perhaps the most difficult to comprehend. Child abuse and neglect is a problem with generational effects. Women who were sexually abused in childhood, for example, are more likely than non-abused women to be harsh with their children, withhold affection or even accept the sexual abuse of their own children by a spouse or lover. Yet children are not always merely the victims of aggression. They also perpetrate violent crimes in the form of bullying, assault and homicide, as well as crimes on property such as vandalism. Moffatt addresses the two sides of this cycle of violence, including examples from clinical case studies and treatment options. Moffatt details crimes against children ranging from Munchausen Syndrome by Proxy, sexual and physical abuse, neglect, filicide and infanticide. He addresses aggression committed by children against other people, property and self, including self-mutilation and suicide. Written for both professional and lay audiences, counselors, teachers, psychologists, law enforcement, medical professionals and therapists will benefit from the psychological discussions about causes and effects of aggression.

The Sensory Processing Diet Chynna Laird, 2020 As a mom of a newly diagnosed child with Sensory Processing Disorder (SPD), I relentlessly sought experts in SPD as well as top nutritionists, biopsychologists and neurologists. I figured that if I understood the major functions of the brain and how it's supposed to take in, process and respond to stimulation, I could discover how SPD interferes with these functions. Understanding the whole picture—the combination of body, brain and nutritional health—led me to embrace the Sensory Diet. In this book, I share the keys of a well-balanced nutritional diet and the activities and exercises that truly work. Use the

resources in this book to create a whole picture of your own child's conditions and customize a Sensory Diet for him/her. If you're the parent, teacher, relative, or friend of a sensory kid, *The Sensory Processing Diet* will give you unique insight into his or her world. Reading it was a breath of fresh air as I could relate to so many of her parenting struggles and found her recommended interventions to be both doable and helpful.

I wholeheartedly recommend it to therapists and parents.

Kids' Stuff
Gary Cross, 1999-11-15

To sort out who's who and what's what in the enchanting, vexing world of Barbies, R and Ninja Turtles, R Tinkertoys, R and teddy bears is to begin to see what's become of childhood in America. It is this changing world and what it unveils about our values that Gary Cross explores in *Kids' Stuff*, a revealing look into the meaning of American toys through this century. Early in the 1900s, toys reflected parents' ideas about children and their futures. Erector sets introduced boys to a realm of business and technology, while baby dolls anticipated motherhood and building blocks honed the fine motor skills of the youngest children. *Kids' Stuff* chronicles the transformation that occurred as the interests and intentions of parents, children, and the toy industry gradually diverged, starting in the 1930s when toymakers marketing playthings inspired by popular favorites like Shirley Temple and Buck Rogers began to appeal directly to the young. TV advertising, blockbuster films like *Star Wars*, R and Saturday morning cartoons exploited their youthful audience in new and audacious ways. Meanwhile, powerful social and economic forces were transforming the nature of play in American society. Cross offers a richly textured account of a culture in which Erector sets and baby dolls are no longer alone in preparing children for the future and in which the toys that now crowd the racks are as perplexing for parents as they are beguiling for little boys and girls. Whether we want our children to be high achievers in a competitive world or playful and free from the worries of adult life, the toy store confronts us with many choices. What does the endless array of action figures and fashion dolls mean? Are children or parents the dupes of the film, television, and toy industries with their latest fads and fantasies? What does this say about our

time and what does it bode for our future Tapping a vein of rich cultural history Kids Stuff exposes the serious business behind a century of playthings
