National Geographic New Chimpanzees 1995:

The First Idea Stanley I Greenspan, Stuart Shanker, 2004-08-03 A radical and brilliantly argued new theory about the fundamental origins of human intelligence culture and society *Chimpanzees* Rebecca Stefoff, 2004 Discusses the evolution biology life cycle and social and mating and behavior of chimpanzees **Shooting in the Wild** Chris Palmer, 2010-05-11

Wildlife and nature films are a hugely popular entertainment genre networks such as Animal Planet and Discovery are stars in the cable television universe viewers flock to IMAX theaters to see jaw dropping footage from the wild and the venerable BBC still scores triumphs with series such as Planet Earth As cinematic technology brings ever more breathtaking images to the screen and as our direct contact with nature diminishes an ever expanding audience craves the indirect experience of wild nature that these films provide But this success has a dark side as Chris Palmer reveals in his authoritative and engrossing report on the wildlife film business A veteran producer and film educator Palmer looks past the headlines about TV host Steve Irwin s death by stingray and filmmaker Timothy Treadwell falling prey to his beloved grizzlies to uncover a more pervasive and troubling trend toward sensationalism extreme risk taking and even abuse in wildlife films He tracks the roots of this trend to the early days of the genre and he profiles a new breed of skilled ethical filmmakers whose work enlightens as well as entertains and who represent the future that Palmer envisions for the industry he loves **Wildlife**

Films Derek Bousé, 2011-11-29 If as many argue movies and television have become Western culture s premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a form of entertainment following the established codes and conventions of narrative exposition The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions audience expectations and the demands of competition in the media marketplace *Wildlife Films* traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society Derek Bous contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values our moral vision our

models of society and family structure derive from nature rather than being cultural formations Primates John P. Rafferty Associate Editor, Earth Sciences, 2011-01-15 Presents a comprehensive look at primates detailing their morphology natural history distribution the different types of primates and the evolution of humans **Human Morality and Sociality** Henrik Hogh-Olesen, Christophe Boesch, Leda Cosmides, 2009-12-09 Human nature is enigmatic Are we cruel selfish creatures or good merciful Samaritans This book takes you on a journey into the complexities of human mind and kind from altruism sharing and large scale cooperation to cheating distrust and warfare What are the building blocks of morality and sociality Featuring contributions from leading researchers such as Christophe Boesch Leda Cosmides and John Tooby Azar Gat Dennis Krebs Ara Norenzayan and Frans B M de Waal this fascinating interdisciplinary reader draws on evolutionary and comparative perspectives and is essential reading for any students interested in the unique characteristics that define humanity and society *How To Get a Life, Vol. 1: Empowering Wisdom for the Heart and Soul* Lawrence Baines, Ph.D., Daniel McBrayer, Ph.D., 2003-04 Presented in an easy to digest format with an uplifting message How to Get a Life offers individual chapters on the life views of some of the most important and powerful people in history Written in an engaging style by college professors Lawrence Baines and Daniel McBrayer each chapter contains a brief biographical sketch with that luminary s advice for daily living Take a trip on How to Get a Life and learn easy to understand advice from some of the world s greatest thinkers on The importance of relationships How to get over misunderstandings How to rise above mediocrity What to do when things go wrong Along with topics ranging from God and the universe to conceptions of love sex and death historical figures featured include Martin Luther King Jr Joseph Campbell Bill Wilson Gerda Weissmann Klein Albert Schweitzer Oprah Winfrey Buddha Leo Buscaglia Jane Goodall the Dalai Lama Muhammad Confucius and Richard of St Victor **Freedom: The End of the Human Condition** Jeremy Griffith, 2016-05-24 FREEDOM has its own very informative website visit www.humancondition.com The fastest growing realization everywhere is that humanity can t go on the way it is going Indeed the great fear is we re entering endgame where we appear to have lost the race between self destruction and self discovery the race to find the psychologically relieving understanding of our good and evil afflicted human condition Well astonishing as it is this book by biologist Jeremy Griffith presents the 11th hour breakthrough biological explanation of the human condition necessary for the psychological rehabilitation and transformation of our species The culmination of 40 years of studying and writing about our species psychosis FREEDOM delivers nothing less than the holy grail of insight we have needed to free ourselves from the human condition It is in short as Professor Harry Prosen a former president of the Canadian Psychiatric Association asserts in his Introduction The book that saves the world Griffith has been able to venture right to the bottom of the dark depths of what it is to be human and return with the fully accountable true explanation of our seemingly imperfect lives At long last we have the redeeming and thus transforming understanding of human behaviour And with that explanation found all the other great outstanding scientific mysteries about

our existence are now also able to be truthfully explained of the meaning of our existence of the origin of our unconditionally selfless moral instincts and of why we humans became conscious when other animals haven't Yes the full story of life on Earth can finally be told and all of these incredible breakthroughs and insights are presented here in this greatest of all books
