Natural Gas Industry:

Natural Gas Industry, 1921 **The Natural Gas Industry** Mario Medici, 1974 **The Natural Gas Industry in Appalachia** David A. Waples, 2014-01-10 The large scale practical uses of natural gas were initially introduced by innovators Joseph Pew and George Westinghouse for the steel and glass industries in Pittsburgh and local gas companies evolved from individual wells to an interstate supply network acquired by Rockefeller's Standard Oil interests Natural gas is now a prevalent part of American markets and with the production from the Marcellus shale is filling the critical void left by a lack of new coal oil and nuclear power facilities This vital American enterprise began in the Appalachian states as an accidental and underestimated byproduct of the oil rush of 1859 This book explores the evolution and significance of the natural gas industry to the present day **A Brief History of the Natural Gas Industry...** H. C. Zwetsch, 1927 *The Natural Gas Industry* Edward J. Neuner, 1960 **Regulated Enterprise** Christopher James Castaneda, 1993 Christopher Castaneda's study of the construction of the pipelines that transported southwestern gas to the Northeast traces the ways in which the federal regulatory process fostered competitive growth in the natural gas industry In 1938 the Natural Gas Act granted the Federal Power Commission jurisdiction over the interstate transmission and sale of natural gas The FPC used its new powers to guide shape and manage an intensely competitive period in the industry As Castaneda shows aggressive and politically astute entrepreneurs based in the Southwest took advantage of economic opportunity and a regulatory environment conducive to industry growth They financed and built the nation's longest gas pipelines to connect the massive southwestern reserves with the major northern energy markets The coal industry which supplied the raw product for manufactured gas and the railroad industry which transported the coal adamantly but unsuccessfully opposed the action and attempted to halt the introduction of natural gas into their northeastern markets First during the war years emergency regulatory agencies directed the expansion of the industry into Appalachia Then in the ensuing peacetime market forces prompted entrepreneurs to compete vigorously for regulatory approval to build pipelines to sell natural gas in the Northeast While previous studies have examined the development of the natural gas industry after 1954 when the Supreme Court's Phillips decision established the FPC as a regulator of price control rather than as a manager of industrial growth Castaneda's is the first to examine this earlier entrepreneurial era Based on exhaustive research in corporate records and government documents *Regulated Enterprise* offers a case study of government business relations during a period of rapid industrial expansion and suggests a new way of looking at federal regulation and competitive growth BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved The Natural Gas Industry and the Environment National Industrial Pollution Control Council, 1972 **Fundamentals of the Natural Gas Industry**, 1997 **Cold, Hungry and in the Dark** Bill Powers, 2013-07-02 Examines the natural gas industry arguing that the declining productivity and increasing demand will trigger a crisis that will cause prices to rise and more damage to the economy *Natural Gas* James G. Speight, 2018-11-26
