It covers all of the most important Oracle architecture features including Files, memory structures and processes, Locking and latching, Transactions, concurrency and multi versioning, Tables and Indexes, Datatypes, Partitioning and parallelism. Each feature is taught in a proof by example manner, not only discussing what it is but also how it works, how to implement software using it, and the common pitfalls associated with it. This fully revised edition covers both the 9i and 10g versions. It also comes with a CD containing a searchable PDF of the 8i version of the book. Tom has fully revised and expanded the architecture related sections from Expert One on One Oracle, a searchable PDF of which is included on the CD accompanying this book, and added substantial new material.
