Oral Presentation In Medicine:

Oral Presentation in Medicine A. Fingerhut, F. Lacaine, 2013-11-21 Scientific knowledge may be communicated in the written form or orally. Written communication in medical writing usually takes the form of original or research papers which appear in scientific journals. Oral communication in medicine is usually made during a meeting and is often called a free paper. Oral medical communication abides by certain rules. The objectives of this book are to examine and discuss these rules. Oral medical communication involves taking the floor to speak whether it be as a speaker, the person who gives the talk in front of an audience, or as part of the audience who can then ask questions or make comments. The go-between is called the moderator. Some forms of oral communication are more specific to meetings with a large audience: free papers, panel discussions, or roundtables, posters, and videos. Others are more characteristic of smaller audiences: hospital staff meetings or literature update sessions. Educational talks have a didactic goal and resemble a lecture for instance in a course or are closer to a case report when they are given during a small class get together.

Presenting Your Case Clifford D. Packer, 2019-06-09 Medical students often struggle when presenting new patients to the attending physicians on the ward. Case presentation is either poorly taught or not taught at all in the first two years of medical school. As a result, students are thrust into the spotlight with only sketchy ideas about how to present, prioritize, edit, and focus their case presentations. They also struggle with producing a broad differential diagnosis and defending their leading diagnosis. This text provides a comprehensive guide to give well-prepared, focused, and concise presentations. It also allows students to discuss differential diagnosis, incorporate high-value care, educate their colleagues, and participate actively in the care of their patients. Linking in-depth discussion of the oral presentation with differential diagnosis and high-value care, *Presenting Your Case* is a valuable resource for medical students, clerkship directors, and others who educate students on the wards and in the
