economy has set its sights on catching up with the West by the beginning of the 2020s and is making steady progress in building up its innovation capabilities although this is presently in the form of incremental and sustaining types of activities. More high end disruptive forms of innovation that would lead to major breakthroughs are likely to be beyond China's reach in the near to medium term. This volume provides a wide ranging and detailed assessment of the present state of the Chinese defense economy at a time of rapid change and accelerating advancement in its innovation capabilities and performance. This collection of articles has three main goals: 1 to locate China's defense innovation dynamics within broader historical technological and methodological frameworks of analysis; 2 to assess the performance of the Chinese defense economy's six principal subsectors; and 3 to compare China's approach to defense industrialization with major counterparts in the Asia Pacific region. This book was originally published as a special issue of the Journal of Strategic Studies. **Taiwan's**

Relations with Latin America He Li, Antonio C. Hsiang, 2021-10-06. As the first English language book on Taiwan's relations with Latin America, this book examines the major issues and theoretical debates on Taiwan's activities in Latin America and its relations with the US and China. Latin America has become a crucial frontline for Taiwan. Today more than at any time since the end of WWII, Taiwan's future as an independent state hinges on the balance of power between the United States and China. This book provides the most detailed and sophisticated analysis of contemporary Taiwan's relations with Latin America and offers insight into the US-China rivalry in the backyard of the United States. By bringing together a group of scholars from Taiwan, US and Latin America, this book examines Taiwan-Latin America relations on various issues amid the intensifying US-China strategic competition such as public diplomacy, trade, investment, energy and cultural exchanges. More than ever before, an understanding of Taiwan's relations with Latin America and the great power rivalry in the Western Hemisphere is essential for students and policy makers alike. The book will be of great interest to university students at all levels as well as specialists on international relations, foreign policy as well as Asian and Latin American studies.

China-Latin America and the Caribbean Thierry Kellner, Sophie Wintgens, 2021-05-03. This book assesses the political, economic and geopolitical dynamics that China's presence has initiated throughout Latin America and the Caribbean between 2008 and 2020. Written by experts across three continents, contributions to this edited volume explore the bilateral relations that China has developed with almost all Latin American and Caribbean countries, charting both the benefits they have brought and the problems that these relations have created for local actors. The book analyses the emergence of new forms of dependence, considers issues such as the existence of a deindustrialization phenomenon throughout Latin America and ultimately questions whether China and the United States are engaged in a zero-sum game in the region. It also investigates challenges that the densification of the web of China's relations and exchanges with Latin America and the Caribbean countries pose not only to the United States and European countries as traditional partners of these states but also to Latin American regionalism. Including an extensive set of case studies and local, regional and global level analysis.
