The Killer Whale Journals Hanne Strager, 2023-04-11 Experience the hauntingly beautiful world of orcas and discover the stories that unfold when humans enter oceans alongside them Winner of the National Outdoor Book Award by the NOBA Foundation Honorable mention for the Sigurd Olson Nature Writing Awards by the Northland College When intrepid biology student Hanne Strager volunteered to be the cook on a small research vessel in Norway's Lofoten Islands the trip inspired a decades long journey into the lives of killer whales and an exploration of people's complex relationships with the biggest predators on earth The Killer Whale Journals chronicles the now internationally renowned science writer's fascinating adventures around the world documenting

Strager's personal experiences with orcas in the wild. Killer whales' incredible intelligence, long life spans, and strong family bonds lead many people to see them as kindred spirits in the sea. But not everyone feels this way. Like wolves, orcas have been both beloved and vilified throughout human history. In this absorbing odyssey, Strager traces the complicated relationship between humans and killer whales while delving into their behavior, biology, and ecology. She brings us along in her travels to the most remote corners of the world, battling the stormy Arctic seas of northern Norway with fellow biologists intent on decoding whale song, interviewing First Nations conservationists in Vancouver, observing Inuit hunters in Greenland, and witnessing the dismantling of black market whale jails in the Russian wilderness of Kamchatka. Through these captivating stories, Strager introduces us to a diverse cast of characters, from Inuit elders to Australian Aboriginal whalers, and guides us through the world's wild waters, from fjords above the Arctic circle in Norway to the poaching-infested waters off Kamchatka. Featuring astonishing photographs from famed nature photographer and conservationist Paul Nicklen, *The Killer Whale Journals* reveals rare and intimate moments of connection with these fierce, brilliant predators. **Orca Rescue!** Donna Sandstrom, 2021-10-05 A captivating first-person story of a real-life orca rescue. When a young orca was spotted alone in Puget Sound, no one knew where she'd come from, but they knew it was dangerous for her to be left there alone. Scientists and researchers from two countries had to work together to determine where the orca came from and then to decide how to save her. The riveting story is told by Donna Sandstrom, a citizen volunteer with the rescue effort. From identifying the orca as a missing calf named Springer to transporting her to the north end of Vancouver Island, where she was reunited with her family, this book gives readers behind-the-scenes details on the only successful orca rescue and reunion ever. Kids will be thrilled to be part of the mission when a little lost orca is brought home. [Marine Protected Areas for Whales, Dolphins, and Porpoises](#) Erich Hoyt, 2012-03-29 Erich Hoyt's handbook is an admirable, timely, and highly welcome contribution. Michael Stachowitsch, *Marine Ecology*. What does it mean to save the whales if their habitat is left unprotected? *Marine Protected Areas for Whales, Dolphins, and Porpoises* is the definitive handbook on this pressing issue and the first to bridge the gap between the disciplines of marine protected areas and cetacean conservation. It launches a new chapter in cetacean conservation with its investigation into the crucial habitat needs and protection requirements of some 84 species. The author, one of the world's foremost experts in this field, takes you around the world to investigate the promising results of the latest conservation research and the strategies for obtaining marine protected areas in coastal waters and on the high seas using national legislation and regional and international conventions. This is an essential introduction, guide, and reference work for those working to ensure a future for whales and dolphins. **Orca** Jason M. Colby, 2018-05-01 Since the release of the documentary *Blackfish* in 2013, millions around the world have focused on the plight of the orca, the most profitable and controversial display animal in history. Yet until now, no historical account has explained how we came to care about killer whales in the first place. Drawing on interviews, official records, private archives, and his own family history, Jason M. Colby

tells the exhilarating and often heartbreaking story of how people came to love the ocean's greatest predator. Historically reviled as dangerous pests, killer whales were dying by the hundreds, even thousands, by the 1950s, the victims of whalers, fishermen, and even the US military. In the Pacific Northwest, fishermen shot them, scientists harpooned them, and the Canadian government mounted a machine gun to eliminate them. But that all changed in 1965 when Seattle entrepreneur Ted Griffin became the first person to swim and perform with a captive killer whale. The show proved wildly popular, and he began capturing and selling others, including Sea World's first Shamu. Over the following decade, live display transformed views of *Orcinus orca*. The public embraced killer whales as charismatic and friendly, while scientists enjoyed their first access to live orcas. In the Pacific Northwest, these captive encounters reshaped regional values and helped drive environmental activism, including Greenpeace's anti-whaling campaigns. Yet even as Northwesterners taught the world to love whales, they came to oppose their captivity and to fight for the freedom of a marine predator that had become a regional icon. This is the definitive history of how the feared and despised killer became the beloved orca, and what that has meant for our relationship with the ocean and its creatures.
