Diane Donovan s Pick of the Month April 2018 **Orchids** ,2008 **The Greatest Show on Earth** Richard Dawkins,2009-09-22

In 2008 a Gallup poll showed that 44 percent of Americans believed God had created man in his present form within the last 10 000 years In a Pew Forum poll in the same year 42 percent believed that all life on earth has existed in its present form since the beginning of time In 1859 Charles Darwin s masterpiece On the Origin of Species shook society to its core Darwin was only too aware of the storm his theory of evolution would provoke But he surely would have raised an incredulous eyebrow at the controversy still raging a century and a half later Evolution is accepted as scientific fact by all reputable scientists and indeed theologians yet millions of people continue to question its veracity Now the author of the iconic work The God Delusion takes them to task The Greatest Show on Earth is a stunning counterattack on advocates of Intelligent Design explaining the evidence for evolution while exposing the absurdities of the creationist argument Dawkins sifts through rich layers of scientific evidence from living examples of natural selection to clues in the fossil record from natural clocks that mark the vast epochs wherein evolution ran its course to the intricacies of developing embryos from plate tectonics to molecular genetics Combining these elements and many more he makes the airtight case that we find ourselves perched on one tiny twig in the midst of a blossoming and flourishing tree of life and it is no accident but the direct consequence of evolution by non random selection The Greatest Show on Earth comes at a critical time systematic opposition to the fact of evolution is menacing as never before In American schools and in schools around the world insidious attempts

are made to undermine the status of science in the classroom Dawkins wields a devastating argument against this ignorance but his unjaded passion for the natural world turns what might have been a negative argument into a positive offering to the reader nothing less than a master's vision of life in all its splendor *The Picture of Dorian Gray* Oscar Wilde,2011-04-11

The Picture of Dorian Gray altered the way Victorians understood the world they inhabited heralding the end of a repressive era Now more than 120 years after Wilde handed it over to his publisher Wilde's uncensored typescript is published here for the first time in an annotated extensively illustrated edition Little Book of Australian Orchids National Library of Australia,2014-09-01 Orchid and flower art enthusiasts will love the last addition to the National Library of Australia's popular Little Books series Little Book of Australian Orchids is a delightful pairing of orchid images from the Library's collections with Australian poetry In the hands of artists such as Ellis Rowan Robert David Fitzgerald and Adam Forster these exquisite flowers enliven the words of such well known poets as Judith Wright David Campbell and Andrew Lansdown **An Atlas of Orchid Pollination** Nelis A. Van Der Cingel,2001-06-01 This work follows on from the 1995 publication on European orchids The atlas is now completed with a second part containing data on the pollination of orchids of the continents of America Asia Africa including Madagascar and Australia including New Zealand The first part of the book is adapted from the general account of the previous publication and is extended with chapters on taxonomy and pollinators The general account deals with such things as the history evolution morphology chemistry and genetics of orchid pollination The second part gives a systematic account for each continent of all well known details The text is designed to have relevance for orchid lovers whether professional or amateur **Moving Picture World and View Photographer** ,1916 *Dark Memory* Jonathan Latimer,2014-04-29 On a mad mission in the African jungle a photographer loses his way Lew Cable is an impulsive man lazy and violent especially when he has been drinking He is a rotten choice to lead a scientific expedition but his wife's money convinces the exploration committee that he is the man for the job Jay Nichols sees right through Cable's bravado but for the chance to photograph African gorillas in their natural habitat he is more than willing to sacrifice his pride If he is not careful he will give up much more than that After accidentally killing a female gorilla Nichols is beset with shame and grief His judgment impaired he makes the mistake of venturing into the jungle alone with the trip leader's wife When they get lost Nichols quickly finds that an angry husband is far more dangerous than any beast the jungle has to offer

Sex Expression and American Women Writers, 1860-1940 Dale M. Bauer,2009-06-01 American women novelists of the late nineteenth and early twentieth centuries registered a call for a new sexual freedom Dale Bauer contends By creating a lexicon of sex expression many authors explored sexuality as part of a discourse about women s needs rather than confining it to the realm of sentiments where it had been relegated if broached at all by earlier writers This new rhetoric of sexuality enabled critical conversations about who had sex when in life they had it and how it signified Whether liberating or repressive sexuality became a potential force for female agency in these women s novels Bauer explains insofar as these novelists seized the power of rhetoric to establish their intellectual authority Thus Bauer argues they helped transform the traditional ideal of sexual purity into a new goal of sexual pleasure defining in their fiction what intimacy between equals might become Analyzing the work of canonical as well as popular writers including Edith Wharton Anzia Yezierska Julia Peterkin and Fannie Hurst among others Bauer demonstrates that the new sexualization of American culture was both material and rhetorical
