## **Order And Constituency In Mandarin Chinese:**

*Order and Constituency in Mandarin Chinese* Audrey Li Yen Hui, 2012-12-06 Recent developments in generative grammar have been very stimulating. The current theory defines a small set of principles that apply to all human languages. Efforts have been made to demonstrate the adequacy of this theory for a wide range of languages. We thus see an interesting interface of theory and empirical data: the study of natural languages contributes to defining the properties of Universal Grammar, and the predictions of the theory help in uncovering generalizations regarding natural languages. This book aims to add to this exciting development by showing how the analysis of Mandarin Chinese constituent structures helps to define Case Theory and how interesting generalizations concerning Chinese grammar are uncovered through verification of the theoretical predictions. Starting from the inadequacy of work by Koopman, Li and Travis on the effect of Case directionality on word order, the book shows that a detailed study of Chinese constituent structures allows us to reduce the phrase structure component to a minimal statement concerning the position of the head in a given phrase. It argues that in a given language the constituent structures can be adequately captured by the interaction of Case Theory, Theta Theory, Government Theory and X Theory. Long-standing controversies concerning Chinese basic word order are resolved by showing that underlying word order generalizations can differ from surface word order generalizations. *Order and Constituency in Mandarin Chinese* Yen-hui Audrey Li, 1990-01-01

*Acquisition of Word Order in Chinese as a Foreign Language* Wenying Jiang, 2009-09-04 Research in the field of Chinese as a second foreign language L2 acquisition at present does not match the increasing demand to learn Chinese as an L2 given that Chinese is the fastest growing foreign language in countries such as Japan, South Korea, the United States, Canada, UK and Australia. Particularly, research in Chinese L2 word order acquisition requires more attention because word order plays a more complex role in Chinese than in English due to the fact that Chinese relies heavily on word order for information structuring. Experience with Chinese L2 learning and teaching shows that Chinese word order errors are a significant problem with adult English speaking learners. However, Chinese L2 researchers and teachers are left with no means to adequately describe and explain these errors for instruction purposes. This book is specifically written to provide such a means for them to understand Chinese word order to describe and explain Chinese word order errors and also to help treat such errors in L2 classrooms. The centrality of word order in Chinese grammar and the emerging popularity of learning Chinese L2 make this book an important resource for both the learner and the teacher. **The Wiley Blackwell Companion to Syntax, 8 Volume Set** Martin Everaert, Henk Van

Riemsdijk, 2017-12-26 An invaluable reference tool for students and researchers in theoretical linguistics. The Wiley Blackwell Companion to Syntax, Second Edition, has been updated to incorporate the last 10 years of syntactic research and expanded to include a wider array of important case studies in the syntax of a broad array of languages. A revised and expanded edition of this invaluable reference tool for students and researchers in linguistics, now incorporating the last 10 years of syntactic

research Contains over 120 chapters that explain analyze and contextualize important empirical studies within syntax over the last 50 years Charts the development and historiography of syntactic theory with coverage of the most important subdomains of syntax Brings together cutting edge contributions from a global group of linguists under the editorship of two esteemed syntacticians Provides an essential and unparalleled collection of research within the field of syntax available both online and across 8 print volumes This work is also available as an online resource at [www.companionstosyntax.com](http://www.companionstosyntax.com)

Current Issues in Chinese Linguistics Hooi Ling Soh, Liang Tao, Yun Xiao, 2011-07-12 Chinese is the most commonly spoken language in the world and one of the very few contemporary languages whose history is documented in an unbroken tradition extending back to the second millennium Compared with Western languages Chinese has a typology with distinguished features in sound system syntax and discourse that have a strong impact on Chinese linguistics studies and language learning Drawing on theoretical models from formal and functional linguistics discourse analysis computer assisted corpus studies language socialization and second language acquisition this volume presents new advances and addresses a broad range of current issues in the study of Chinese linguistics with research studies that originated from the proceedings of the 21st North American Conference on Chinese Linguistics NACCL 21 As globalization presses on more and more people are interested in Chinese its history structure research and new developments This volume aims to be instrumental Written in a coherent and structured style each section is concentrated on a particular linguistic area and each chapter is self contained with a clear focus and theoretical framework It will be valuable to linguists educators administrators specialists teachers and students of Chinese as a native second heritage or foreign language **Representational Deficits in SLA**

Neal Snape, Yan-kit Ingrid Leung, Michael Sharwood Smith, 2009-01-14 The main focus of this collection is to explore the question of representational deficits in second language acquisition currently a much debated topic The volume is intended as a tribute to Roger Hawkins a leading scholar in generative second language acquisition whose research has been devoted to explaining lack of native like success in terms of representational deficits The papers in this volume feature a range of studies all undertaken within a generative linguistic framework which investigate various properties of L2 grammar bearing on the question of whether or not there are representational deficits in the post critical period L2 learners grammar The significance of such deficits if their existence can be confirmed is that they provide support for the claim at least for the type of L2 learner under investigation that there are insurmountable obstacles to ultimate attainment *Give Constructions across Languages* Myriam Bouveret, 2021-03-15 This cognitive contrastive study of ten languages Chinese Dalabon English French Spanish Romanian Kurdish Khmer Polish Tibetan focuses on the concept of giving from six main points of view namely argument structure lexical semantics and event structure role marking in the three argument construction and in other constructions lexicalization grammaticalization and constructionalization of the verb from a cognitive construction grammar point of view and central and extended meanings It is proposed that a continuum approach to grammar and lexicon

is needed in order to describe the typological and historical facts The volume argues for a concrete and abstract transfer cluster model involving coverage of lexical and grammatical extension or bleaching phenomena and that the semantic extensions metaphorical and otherwise exploit various portions of this schema The volume is deeply anchored in the Cognitive Construction Grammar theoretical movement and proposes analyses of constructional phenomena to illustrate a grammar to lexicon continuum in synchrony and diachrony language change grammaticalization chains constructionalization analysis and an invariant hypothesis of giving as a basic activity in human cognition      **Non-Finiteness** Bingjun Yang, 2022-04-28 As a gateway to central questions in linguistics non finiteness is unavoidable in both typological studies and aspects of natural language processing such as text segmentation and annotation This study presents a process relation framework to explain the more complex previously unaccounted for instances of non finiteness in clause structure

**Chinese Lexical Semantics** Meichun Liu, Chunyu Kit, Qi Su, 2021-07-25 This book constitutes the thoroughly refereed post workshop proceedings of the 21st Chinese Lexical Semantics Workshop CLSW 2020 held in Hong Kong China in May 2020 Due to COVID 19 the conference was held virtually The 76 full papers included in this volume were carefully reviewed and selected from 233 submissions They are organized in the following topical sections Lexical semantics and general linguistics AI Big Data and NLP Cognitive Science and experimental studies      **Contrastive Analysis of Chinese and English Syntax** Ruixi Ressayi Ai, 2024-02-27 This book introduces a contrastive analysis of Chinese and English syntax based on generative grammar It covers major syntactic domains including but not limited to noun phrases verb phrases the inflectional domain the discourse related domain and ellipsis Based on the empirical data drawn from both Chinese and English and recast in modern linguistic terminology the book introduces various rules and theoretical modules from the generative framework to analyze the similarities and differences between Chinese and English syntax The chapters are arranged such that the book moves from the easiest syntactic topics gradually towards the more complex and advanced ones Each chapter includes a short summary of major points and references for further reading Readers are not required to have background knowledge in syntax The book can serve as a textbook or a reference book for scholars of Chinese studies Teaching Chinese as a Foreign Language TCFL Chinese linguistics comparative linguistics and theoretical linguistics

*Directional Particles in Cantonese* Winnie Chor, 2018-05-24 This book is the first on Cantonese that deals with the grammaticalization phenomenon systematically Focusing on a group of twelve directional particles this book tracks their grammaticalization pathways from full fledged directional verbs to directional particles indicating meanings relating to tense aspect modality and quantification in the post verbal position Some of these particles have undergone further grammaticalization to convey speaker's subjective as well as intersubjective stances This book is also unique in its diachronic component Examples in the book are drawn from various sources including early Cantonese pedagogical texts Cantonese films and contemporary Cantonese corpora with data ranging from the mid nineteenth century to the present This book will

be a valuable resource not only for all linguists interested in the development of grammatical forms but also for teachers and students in conversation discourse analysis psychology and anthropology interested in deepening their understanding of the interaction between language structure and use

Locality in Grammar Xiaoshi Hu, 2024-05-08 *Locality in Grammar* From Narrow Syntax to Interfaces investigates the operation of locality conditions in syntax and semantics from a cross linguistic perspective It is claimed that there are two different types of locality conditions One is the Generalized Minimality Condition GMC and the other is the Phase Impenetrability Condition PIC This book demonstrates that these locality conditions play different roles in different computational components of human language and therefore cannot be unified as one constraint as proposed in the literature The main idea of the book is that the two different locality conditions are sensitive to the difference between syntactic derivation and semantic interpretation and that of overt and covert syntactic derivations Further investigation shows a more fine grained distinction must be made between syntactic computations It is true that GMC does not constrain overt syntactic derivations and PIC does not play a role in semantic interpretations however they both regulate covert syntactic computations This book will inform postgraduate students and scholars in the field of linguistics

**New Approaches to Chinese Word Formation** Jerome Lee Packard, 1997 *TRENDS IN LINGUISTICS* is a series of books that open new perspectives in our understanding of language The series publishes state of the art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by approaching language from an interdisciplinary perspective *TRENDS IN LINGUISTICS* considers itself a forum for cutting edge research based on solid empirical data on language in its various manifestations including sign languages It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language *TRENDS IN LINGUISTICS* publishes monographs and outstanding dissertations as well as edited volumes which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints High quality standards are ensured through anonymous reviewing

Ultimate Attainment in Second Language Acquisition Donna Lardiere, 2017-09-25 The first book length treatment of its type Ultimate Attainment in Second Language Acquisition is a case study with a solid theoretical grounding that examines the language of an immigrant learner of English and thereby presents a much needed understanding of the linguistic competence of second language speakers Based on longitudinal data collected over a period of 16 years this clear and accessible presentation is well grounded in linguistic theory and in second language acquisition research issues Author Donna Lardiere presents the narrative of Patty an adult Chinese immigrant learner of English who achieves native like proficiency in some areas of her English idiolect although reaches a plateau in her language acquisition known as the concept of fossilization By addressing this concept a central idea in second language acquisition research Lardiere fills a void in existing literature Individual chapters focus on Patty's end state knowledge of grammatical areas of finiteness past tense marking word order wh movement and relativization passivization number marking and use of determiners Important topics discussed throughout the book include learner variability in production case study methodology the roles of motivation and prior language L1 knowledge and sensitivity to input in circumscribing ultimate attainment in adult second language acquisition Ultimate Attainment in Second Language Acquisition is intended for anyone whose research is in the areas of second language acquisition language acquisition theoretical applied or developmental linguistics It is also appropriate for graduate level students of TESOL and teachers who work with more advanced learners of foreign languages

**Coordinating Conjunctions in Sinitic Languages** Kevin Kin-wing Chan, 2024-12-31 The book is a comprehensive typological study of coordinating conjunctions in Sinitic languages and other languages worldwide focusing on the grammaticalization pathways through which conjunctions emerge Utilizing an extensive database of coordinating conjunctions including first hand data from 234 Chinese dialects and 45 non Sinitic languages as well as 830 sets of second hand data this research aims to reconstruct the primary grammaticalization paths of coordinating conjunctions in Sinitic languages while making typological generalizations and classifications The study contributes to the understanding of how coordinating conjunctions develop in various languages and sheds light on the typological patterns that emerge across languages

The Second Language Acquisition of French Tense, Aspect, Mood and Modality Dalila Ayoun, 2013-07-04 Temporal aspectual systems have a great potential of informing our understanding of the developing competence of second language learners So far the vast majority of empirical studies investigating L2 acquisition have largely focused on past temporality neglecting the acquisition of the expression of the present and future temporalities with rare exceptions aside from ESL learners leaving unanswered the question of how the investigation of different types of temporality may inform our understanding of the acquisition of temporal aspectual and mood systems as a whole This monograph addresses this question

by focusing on three main objectives a to contribute to the already impressive body of research in the L2 acquisition of tense aspect and mood modality from a generative perspective and in so doing to present a more complete picture of the processes of L2 acquisition in general b to bridge the gap between linguistic theory and L2 acquisition c to make empirical findings more accessible to language instructors by proposing concrete pedagogical applications

### **Syntax-Phonology Interface**

Hongming Zhang, 2016-11-25 This book centers on theoretical issues of phonology syntax interface based on tone sandhi in Chinese dialects It uses patterns in tone sandhi to study how speech should be divided into domains of various sizes or levels Tone sandhi refers to tonal changes that occur to a sequence of adjacent syllables or words The size of this sequence or the domain is determined by various factors in particular the syntactic structure of the words and the original tones of the words Chinese dialects offer a rich body of data on tone sandhi and hence great evidence for examining the phonology syntax interface and for examining the resulting levels of domains the prosodic hierarchy Syntax Phonology Interface Argumentation from Tone Sandhi in Chinese Dialects is an extremely valuable text for graduate students and scholars in the fields of linguistics and Chinese

*The Lexicon-syntax Interface in Second Language Aquisition* Roeland van Hout, 2003-01-01

Second language acquisition has to integrate the totality of the SLA process which includes both the learning of the core syntax of a language and the learning of the lexical items that have to be incorporated into that syntax But these two domains involve different kinds of learning Syntax is learnt through a process of implementing a particular set of universal structures whereas the learning of lexis is characterised by the building up of associations or connections Yet these two systems must come together in the creation of a whole linguistic system in the mind of an individual This book is designed to state the implications of these two paradigms in as clear a way as possible through examples of the research carried out within each paradigm and to examine how they can be made to inter relate in a way which would enable us to explain better the overall process of SLA
