## **Ordos Plateau Of China An Endangered Environment:**

The Ordos Plateau of China Hong Jiang, 1999 The Ordos Plateau of China is an account of the regional human environmental history of the Ordos Plateau a dryland region inhabited by Chinese farmers and Mongolian shepherds The book surveys the environmental change i e changes in vegetation and soil during 1942-92 it also examines such societal factors as government policy resource use institutions economics population and cultural attitudes and beliefs and investigates how these factors have contributed to environmental change in the Ordos Plateau Throughout the discussion the author retains keen awareness of the intricate interrelations among the environmental and societal factors Following the theoretical framework of human dimensions of regional environmental change this book seeks to contribute to the understanding of human environment relationships in the Chinese socio political and historical contexts The Ordos Plateau of China is among a few books written on China's regional human environmental issues by a Chinese and US trained geographer in recent years It reflects a combination of the Chinese strength in regional environmental studies and the western tradition of nature society geography Based primarily on first hand materials and other documents that are not readily accessible in English this book provides a richly contextualized account of Ordos environmental history and its relationship with society to the English speaking world It also helps the reader to better understand human environmental issues in China in general

An Endangered Environmental Region Hong Jiang, 1997      **China's Environmental Crisis** J. Kassiola, 2010-11-08 This path breaking collection covers the significance of China's extreme environmental challenges for both Chinese society and the world how these challenges are impacting domestic Chinese society and its political institutions and how these institutions are responding in their efforts to address the environmental problems

Global Environmental Risk Jeanne X. Kasperson, Roger E. Kasperson, 2013-05-13 Despite international initiatives such as the Earth Summit in 1992 and ongoing efforts to implement the Kyoto Protocol human activities continue to register a destructive toll on the planetary environment At root research on global environmental risk seeks new pathways for reversing unsustainable trends curtailing ongoing destructive activities and creating a life sustaining planet This book takes stock of the distinctive challenges posed by global environmental risks the capacity of knowledge systems to identify and characterize such risks and the competence of human society to manage the unprecedented complexity Particular attention turns on engaging in ways conducive to enhancing social learning and adaptation the large uncertainties inherent in these risks Various chapters enlist different scales of analysis to explore the manifestation and causes of global environmental risks in all the diversity of their regional expression Throughout the editors and contributors accord prominence to the vulnerability of people and places to environmental degradation Understanding vulnerability is a neglected key to assessing the nature of the risks and determining strategies for altering trajectories of threat Global risk futures the editors argue are not intractable and are still amenable to a risk analysis enterprise that is democratic in principle humanistic in concept and geared to the realities that

pertain to the particular societies locales and regions that will ultimately bear the risk

**Globalization and New Geographies of Conservation** Karl S. Zimmerer, 2006-09-15 Examining the geographical dimensions of environmental management and conservation activities implemented on landscapes worldwide Globalization and New Geographies of Conservation creates a new framework and collects original case studies to explore recent developments in the interaction of humans and their environment Globalization and New Geographies of Conservation makes four important arguments about the recent coupling of conservation and globalization that is reshaping the place of nature in human environmental change First it has led to an unprecedented number of spatial arrangements whose environmental management goals and prescribed activities vary along a spectrum from strict biodiversity protection to sustainable utilization involving agriculture food production and extractive activities Conservation and globalization are also leading by necessity to new scales of management in these activities that rely on environmental science thus shifting the spatial patterning of humans and the environment This interaction results as well in the unprecedented importance of boundaries and borders transnational border issues pose both opportunities and threats to global conservation proposed by organizations and institutions that are themselves international Lastly Globalization and New Geographies of Conservation argues that the local level has been integral to globalization while the regional level is often eclipsed at the peril of the successful implementation of conservation and management programs Bridging the gap between geography and life science Globalization and New Geographies of Conservation will appeal to a broad range of students of the environment conservation planning biodiversity management and development and globalization studies

*Encyclopedia of Chinese History* Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture society and economy and increasing coverage of contemporary China in the media Our understanding of China's history has also been evolving The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians Now that the Chinese archives are open to researchers there is a growing body of academic expertise on history in China that is open to western analysis and historical methods This has in many ways changed the way that Chinese history particularly the modern period is viewed The Encyclopedia of Chinese History covers the entire span of Chinese history from the period known primarily through archaeology to the present day Treating Chinese history in the broadest sense the Encyclopedia includes coverage of the frontier regions of Manchuria Mongolia Xinjiang and Tibet that have played such an important role in the history of China Proper and will also include material on Taiwan and on the Chinese diaspora In A-Z format with entries written by experts in the field of Chinese Studies the Encyclopedia will be an invaluable resource for students of Chinese history politics and culture

The Llano Estacado of the US Southern High Plains Elizabeth Brooks,Elizabeth Anne Brooks,2000 The Llano Estacado of the US Southern High Plains shows how this modern irrigation culture developed and questions how it might be viewed through a sustainability lens using a multiplicity of definitions of sustainability and its opposite criticality Jacket The Teleology of the Modern Nation-State Joshua A. Fogel,2017-05-15 Japan and China did not begin to emerge as unified political entities until the nineteenth century Yet scholars and politicians persistently refer to Japan and China in discussions of earlier periods as if the modern nation state had long been established in these regions Joshua Fogel here brings together essays by eight renowned East Asian scholars to demonstrate why this oversight distorts our historical analysis and understanding of both countries The nation states of Japan and China developed much later and indeed far less uniformly than usually conveyed in popular myth and political culture Moreover the false depiction of an earlier national identity not only alters the factual record it serves the contemporary engines of nationalist mythology and propaganda This interdisciplinary volume asks deceptively simple questions When did Japan and China become Japan and China When and why do inhabitants begin to define their identity and interests nationally rather than locally Identifying the role of mitigating factors from disease and travel abroad to the subtleties of political language and aesthetic sensibility the answers provided in these diverse and insightful essays are appropriately complex By setting aside Western notions of the nation state the contributors approach each region on its own terms while the thematic organization of the book provides a unique lens through which to view the challenges common to understanding both Japan and China This highly readable collection will be important to scholars both inside and beyond the field of East Asian studies Land Use and Land Cover Mapping in Europe Ioannis Manakos,Matthias Braun,2014-07-08 Land use and land cover LULC as well as its changes LUCC are an interplay

between bio geophysical characteristics of the landscape and climate as well as the complex human interaction including its different patterns of utilization superimposed on the natural vegetation LULC is a core information layer for a variety of scientific and administrative tasks e g hydrological modelling climate models land use planning In particular in the context of climate change with its impacts on socio economic socio ecologic systems as well as ecosystem services precise information on LULC and LUCC are mandatory baseline datasets required over large areas Remote sensing can provide such information on different levels of detail and in a homogeneous and reliable way Hence LULC mapping can be regarded as a prototype for integrated approaches based on spaceborne and airborne remote sensing techniques combined with field observations The book provides for the first time a comprehensive view of various LULC activities focusing on European initiatives such as the LUCAS surveys the CORINE land covers the ESA EU GMES program and its resulting Fast Track and Downstream Services the EU JRC Global Land Cover the ESA GlobCover project as well as the ESA initiative on Essential Climate Variables All have and are producing highly appreciated land cover products The book will cover the operational approaches but also review current state of the art scientific methodologies and recommendations for this field It opens the view with best practice examples that lead to a view that exceeds pure mapping but to investigate into drivers and causes as well as future projections
